featured = 被特別挑選出來作重點介紹、展示或呈現的

Important distinction: **feature** vs **function**

This matters especially for products.

feature

= any notable characteristic or capability

function

= what something specifically does

For example:

> “Noise cancellation is a **feature**.”

「降噪是一項產品特點／功能。」

> “Its **function** is to reduce background noise.”

「它的功能是減少背景噪音。」

So a **feature** may include:

- * function
- * design
- * size
- * material
- * appearance

while **function** focuses more narrowly on **purpose or operation**.

Important distinction: feature vs characteristic

feature

often emphasizes something noticeable or worth mentioning.

characteristic

means a quality that is typical or defining.

> “Long battery life is a useful feature.”

「長續航是一項實用功能。」

> “Patience is one of her main characteristics.”

「耐性是她其中一個主要性格特徵。」

They overlap, but **feature** is especially common for products, design, appearance, and media.

Important distinction: feature vs quality

feature

= a specific characteristic or element

quality

can mean:

1. a characteristic, or
2. how good something is

Compare:

> “Battery life is a feature.”

「電池續航力是一項特點。」

> “The sound quality is excellent.”

「音質很好。」

So **sound quality** is itself a **feature**, but **quality** here refers to **how good the sound is**.

Important distinction: **feature vs benefit**

Very useful in marketing.

feature

= what the product **has**

> “The headphones have active noise cancellation.”

benefit

= what the customer **gets from it**

> “The benefit is a quieter commute.”

So:

feature = 產品特點

benefit = 特點帶給使用者的實際好處

This is especially useful for your advertising passage.

Important distinction: **feature vs highlight**

feature

= include something as an important part

highlight

= deliberately draw attention to it

> “The ad features long battery life.”

「廣告把長續航列為其中一個重要內容。」

> “The ad highlights long battery life.”

「廣告特別強調長續航這個賣點。」

So **highlight** is more explicitly about emphasizing.

Family-extension note

Following our Golden Manual, these are especially useful:

- * **product feature** = 產品功能／特點
- * **key feature** = 主要特點
- * **special feature** = 特別功能／特別內容
- * **facial features** = 五官／面部特徵
- * **feature article** = 專題文章／特寫
- * **feature film** = 長篇電影
- * **feature someone/something** = 以……為重要內容／特別呈現
- * **be featured in/on** = 被重點介紹／展示
- * **featured product** = 主打產品
- * **featured speaker** = 重點講者／主講嘉賓

Most of these still grow from one broad idea:

> **feature** = something noticeable, important, or prominently presented
