

Absolutely — **care** is a particularly strong target because your passage uses it as an abstract noun:

> “Gardening is not just about plants; it is also about **care**, generosity, and connection.”

Here **care** means **thoughtful attention, concern, and looking after something well**. But the word also extends to **caution, responsibility, worry, professional support, medical care**, and the verb **care** can mean **feel concern, consider something important, or want something**.

Word family: **care / careful / carefully / careless / carelessly / caring / carer / caregiver**

Base word: care

Verb forms: care, cares, cared, caring

Related forms: careful, carefully, careless, carelessly, caring

Related people: carer, caregiver

Useful compounds: healthcare, childcare, elder care, self-care, aftercare, intensive care, primary care

Part of speech: noun (名詞) / verb (動詞)

Your sentence:

> “Gardening is not just about plants; it is also about **care**, generosity, and connection.”

Meaning in your passage: **care = thoughtful attention and concern — 關懷；用心照料；愛護**

Here **care** means:

> **the attention, concern, patience, and kindness involved in looking after plants and other people.**

繁體中文：

對人或事物投入關心、注意和照料；關懷、愛護、用心照顧

Natural translation:

> “Gardening is not just about plants; it is also about care, generosity, and connection.”

「園藝不只是關於植物，也關乎**關懷、慷慨和人與人之間的連結**。」

So here:

> **care = 關心並用心照顧人 / 事物的態度與行為**

1. **care = attention given to looking after someone/something (照料) — 照顧；護理；照料**

This is the main concrete noun sense.

Practice 1

> “Young plants need proper **care**.”

「幼苗需要適當的**照料**。」

Practice 2

> “The dog is receiving excellent care.”

「那隻狗正在得到很好的**照顧**。」

care = 為了維持某人 / 某物的健康、安全或良好狀態而提供的注意和照料

2. **care = concern/kindness (關懷) — 關心；關懷；愛護**

This is very close to your exact source sense.

Practice 3 — Original

> “Gardening is also about **care**, generosity, and connection.”

「園藝也關乎**關懷**、慷慨和連結。」

Practice 4

> “She treats every plant with great care.”

「她非常**用心愛護**每一棵植物。」

「他對家人的**關心 / 關愛**很明顯。」

care = 對某人 / 某物的福祉、狀況或需要抱有真誠關心

3. **care = careful attention (小心 / 用心) — 小心 ; 謹慎 ; 細心**

A major noun sense.

Practice 6

> “Handle the plant with **care**.”

「要**小心地**處理這棵植物。」

Practice 7

> “The document was prepared with great care.”

「這份文件非常**細心地**準備。」

care = 為避免錯誤、損害或問題而投入的細心注意

Common:

* with care

* take care

* handle with care

4. **care = responsibility for someone/something (責任 / 照管) — 照管 ; 負責照顧**

Practice 8

> “The children were left in their grandmother’s **care**.”

「孩子們由祖母**照顧 / 照管**。」

Practice 9

> “The plants are now in my care.”

「這些植物現在由我**負責照料**。」

in someone’s care = 由某人負責保護、照顧或管理

This is slightly different from care as an abstract feeling: here it emphasizes
responsibility/charge.

5. **care = professional support/service (照護服務) — 照護；護理服務**

A major modern institutional sense.

Practice 10

> “Older people may need long-term **care**.”

「長者可能需要長期**照護**。」

Practice 11

> “The centre provides care for people with disabilities.”

「該中心為殘疾人士提供**照護服務**。」

care = 為有健康、生活或支援需要的人提供的專業或持續照護服務

6. **medical care / healthcare (醫療) — 醫療照護；醫療服務**

Practice 12

> “She received immediate medical **care**.”

Practice 13

> “Access to healthcare varies between regions.”

「不同地區取得**醫療服務**的情況各有不同。」

medical care / healthcare = 為預防、診斷、治療或管理健康問題而提供的醫療服務

Important:

* care = broader

* healthcare = organized health services/system

7. **childcare (兒童) — 托兒；兒童照顧服務**

A useful lexical family extension.

Practice 14

> “The company provides **childcare** for employees.”

「公司為員工提供**托兒服務**。」

Practice 15

> “Childcare can be expensive.”

「**托兒服務**可能很昂貴。」

childcare = 照顧兒童的服務 / 安排，尤其當父母工作或不能親自照顧時

「她從事**長者照護**工作。」

elder care = 為年長人士提供生活、健康或日常支援的照護

9. **self-care (身心健康) — 自我照顧；自我保健**

A major modern compound.

Practice 18

> “Rest is an important part of **self-care**.”

「休息是**自我照顧 / 自我保健**的重要部分。」

Practice 19

> “Gardening can be a form of self-care.”

「園藝可以是一種**自我照顧**方式。」

self-care = 為維持自己的身體、心理或情緒健康而採取的照顧行動

10. **care = worry / anxiety (煩惱) — 憂慮 ; 煩惱**

A genuinely distinct, somewhat more literary noun meaning.

Practice 20

> “He seemed free from **care**.”

「他看起來**無憂無慮**。」

Practice 21

> “She tried to forget the cares of everyday life.”

「她試著忘掉日常生活中的各種**煩惱**。」

care = 令人擔心、憂慮或承受心理壓力的事情

Common:

> cares of the world

> = 世事煩憂

This sense is less common in everyday singular **care**, but well established.

11. **care = verb, feel concern about something — 在意 ; 關心**

Now **care** is a verb.

Practice 22

> “She really **cares** about her plants.”

「她真的很**關心 / 在意**她的植物。」

Practice 23

> “He cares deeply about the environment.”

「他非常**關心**環境問題。」

care = 對某人 / 某事的狀況、結果或福祉感到關心並認為它重要

12. **care = consider something important (在乎) — 在乎 ; 介意**

Practice 24

> “I don’t **care** what other people think.”

「我不**在乎**別人怎麼想。」

Practice 25

> “She cares a lot about doing the job properly.”

「她很**在意**把工作做好。」

care = 認為某事重要，因此對結果或看法有所在意

This is a major everyday verb sense.

13. **care = want / be interested in something (願意 / 想要 ; 較正式) — 想要 ; 有興趣**

Usually in polite/formal constructions.

Practice 26

> “Would you **care** for some tea?”

「你**想喝**點茶嗎？」

Practice 27

> “Would you care to join us?”

「你**願意 / 有興趣**跟我們一起嗎？」

****care = 想要或願意做某事，常見於較禮貌 / 正式問法****

Because this often appears in ****care for / care to****, I would flag it rather than over-expand phrasal constructions.

14. ****care = object / mind (介意) — 介意；不喜歡****

Often in negative or interrogative patterns.

Practice 28

> “Do you ****care**** if I open the window?”

16. **careful = thorough / precise (細緻) — 仔細的 ; 周密的**

Practice 32

> “The researcher made a **careful analysis**.”

「研究員作出了**仔細 / 周密的分析**。」

Practice 33

> “The plants need careful monitoring.”

「這些植物需要**仔細觀察**。」

careful = 在處理細節時認真、精確、周密的

Same underlying concept as caution, so this should not be over-split.

17. **carefully = with care — 小心地 ; 仔細地**

Practice 34

> “Water the seedlings **carefully**.”

「要**小心地**替幼苗澆水。」

Practice 35

> “Read the instructions carefully.”

Practice 55

> “The clinic provides aftercare for all patients.”

「診所為所有病人提供****後續照護****。」

****aftercare = 治療、手術、康復計劃等之後提供的持續照顧與支援****

Important distinction: ****care vs concern****

****care****

can involve both:

- * emotional concern;
- * practical looking after.

****concern****

mainly:
interest/worry about someone or something.

> “She shows great care for the plants.”

can imply actual attentive treatment.

> “She expressed concern about the plants.”

emphasizes worry/interest.

Important distinction: ****care vs attention****

****attention****

= mental focus.

****care****

= attentive concern and/or cautious treatment.

> “Pay attention to the instructions.”

= 留意指示。

> “Handle the glass with care.”

= 小心處理玻璃。

So:

****attention = 注意力****

****care = 細心 / 小心 / 照顧****

Important distinction: ****care vs kindness****

****kindness****

= friendly, generous, considerate behaviour.

****care****

= sustained concern, attention, or looking after.

Someone can show one act of ****kindness****, while ****care**** may involve ongoing attention.

Important distinction: ****care vs love****

****love****

strong affection.

****care****

concern for someone's well-being.

You can:

> care about someone

without necessarily:

> love them romantically or deeply.

So they overlap, but are not equivalent.

Important distinction: ****care vs worry****

****care****

= concern / valuing.

worry

= feel anxious.

> “I care about my family.”

positive concern.

> “I worry about my family.”

anxiety.

Important because **care** can historically also mean worry, but in modern everyday verb use these are different.

Important distinction: **care vs careful**

care

noun/verb:

> “She shows care.”

careful

adjective:

> “She is careful.”

So:

> care = 關心 / 照料 / 小心

> careful = 小心的 / 仔細的

Important distinction: **careful vs caring**

This is very important.

careful

= cautious / attentive

> “She is a careful gardener.”

「她是一個**做事細心的園藝愛好者**。」

caring

= kind / concerned about others

> “She is a caring person.”

「她是一個**關懷他人的人**。」

So:

> **careful ≠ caring**

Important distinction: **careless vs carefree**

A classic learner trap.

careless

= not careful

> careless mistake

> = 粗心錯誤

carefree

= free from worry

> carefree childhood

> = 無憂無慮的童年

So:

> **careless = 粗心**

> **carefree = 無憂無慮**

These are very different despite both containing **care**.

Important distinction: **care vs healthcare**

care

broad:

can mean any kind of looking after.

healthcare

specifically:

organized medical and health services.

> childcare ≠ healthcare

> plant care ≠ healthcare

Important distinction: **care vs treatment**

care

broader ongoing support/attention.

treatment

specific medical intervention intended to address a condition.

A patient may receive:

* treatment for an infection;

* ongoing nursing care.

So:

> treatment = 治療

> care = 照護 / 護理

Important distinction: **in someone's care vs under someone's control**

in someone's care

= that person is responsible for looking after them.

under someone's control

= that person has authority/power over them.

The first emphasizes protection and responsibility, not domination.

Family-extension sweep

After the full audit, the useful modern family includes:

- * **care — looking after** = 照顧 / 照料
- * **care — concern/kindness** = 關心 / 關懷
- * **care — careful attention** = 細心 / 小心
- * **care — responsibility** = 照管 / 負責
- * **care — professional support** = 照護服務
- * **medical care / healthcare** = 醫療照護
- * **childcare** = 托兒
- * **elder care** = 長者照護
- * **self-care** = 自我照顧
- * **care — worry** = 憂慮 / 煩惱，較文學
- * **care — verb: concern** = 關心 / 在意
- * **care — verb: consider important** = 在乎
- * **care — want/willing** = 想要 / 願意，較正式
- * **careful** = 小心 / 仔細
- * **carefully** = 小心地 / 仔細地
- * **careless** = 粗心 / 不在意
- * **carelessly** = 粗心地
- * **caring** = 有愛心 / 關懷他人的
- * **carer** = 照顧者，BrE
- * **caregiver** = 照顧者，尤 AmE
- * **intensive care** = 深切 / 加護治療
- * **primary care** = 基層 / 初級醫療
- * **aftercare** = 後續照護

I would stop here rather than expand every transparent institutional compound containing **care**.
