

Absolutely — since you explicitly asked for a **redo**, I'll rebuild **count** from scratch and include the missing items from the second audit.

I'm keeping the Golden Manual standard intact: **search broadly, split conservatively, distinguish lexical meanings from family extensions, and keep the Chinese MCQ-ready.**

Word family: **count / counted / counting / countable / uncountable / countless / recount / countdown / headcount**

Base word: count

Verb forms: count, counts, counted, counting

Related forms: countable, uncountable, countless

Useful lexical extensions: recount, countdown, headcount

Useful compounds: word count, blood count, calorie count, pollen count, count noun

Title use: Count

Part of speech: verb (動詞) / noun (名詞) / title (頭銜) / adjective-related forms (相關形容詞)

Your sentence:

> "I have visited her home **countless times** since I was a child."

Meaning in your passage: **countless + plural noun = extremely many — 無數的 ; 多得數不清的**

Here, **countless** means:

> **a very large number — so many that giving an exact number would be impractical or unnecessary.**

繁體中文 :

數量非常多 , 多到難以 / 沒有必要逐一計算 ; 無數的、數不清的

Natural translation:

> "I have visited her home countless times since I was a child."

「我從小到大已經去過她家**無數次 / 多得數不清**。」

So:

> **countless times = 次數非常多 , 多到沒有必要給出精確數字**

1. **count + people/things/numbers (人 / 物 / 數字) — 數 ; 點算 ; 計算數量**

The core verb meaning.

Practice 1

> “Can you **count** the plants on the balcony?”

「你可以**數一數**露台上有多少棵植物嗎？」

Practice 2

> “The child can already **count** to one hundred.”

「那個孩子已經會**數到一百**。」

count = 逐一計算人 / 物 / 數字 , 以確定總共有多少

2. **count + item in total (納入總數) — 計入 ; 算進去**

Practice 3

> “Did you **count** the smaller pots?”

「你有沒有把那些較小的花盆**算進去**？」

Practice 4

> “Children under five are not **counted** in the total.”

「五歲以下兒童不**計入總數**。」

count = 在計算總數時把某人 / 某物包括在內

This is distinct from simply “數數.”

3. **count = matter / be important — 重要 ; 算數 ; 有作用**

A major figurative meaning.

Practice 5

> “Every small effort **counts**.”

「每一點努力都**很重要** / 都有作用**。**」

Practice 6

> “What really **counts** is whether the students understand.”

「真正**重要的**是學生是否理解。」

count = 對結果具有實際重要性、價值或影響

4. **count** + person/thing + as + category (分類) — 把.....算作；視為

Practice 7

> “I **count** her **as** one of my closest friends.”

「我把她**視為** / 算作**我最親近的朋友之一。**」

Practice 8

> “Does gardening **count as** exercise?”

「園藝**算不算是運動**？」

count A as B = 把 A 歸入 B 這個類別，認為 A 符合 B 的身分 / 定義

5. **count** = regard / consider / deem (認為 / 視為) — 視為；認為

This is broader than just **count as** and deserves its own sense.

Practice 9

> “I **count** myself lucky to have had such a teacher.”

「我**認為**自己很幸運，曾經遇到這樣的老師。」

Practice 10

> “She is **counted among** the most influential writers of her generation.”

「她被**視為 / 列為**她那一代最有影響力的作家之一。」

****count = 認為某人 / 某事屬於某種狀態、類別或評價****

Useful constructions:

* count yourself lucky

* count someone among...

* be counted as...

* be counted among...

6. ****a count = numerical total (總數) — 計算結果 ; 總數****

Now ****count**** is a noun.

Practice 11

> “The final ****count**** was 126 plants.”

「最後的****計算總數****是 126 棵植物。」

Practice 12

> “We need an accurate ****count**** of the participants.”

「我們需要參加者的準確****人數統計 / 總數****。」

****a count = 經過計算所得出的數目 / 總數****

7. ****a count = act of counting (一次點算) — 點算 ; 計數****

Practice 13

> “We did a second ****count**** to check the total.”

「我們再做了一次****點算****來核對總數。」

Practice 14

> “The first count showed that three plants were missing.”

「第一次**點算**顯示少了三棵植物。」

****a count = 一次進行計數 / 點算的行為****

8. ****a count of + number (數到某個數字) — 數到..... ; 一段計數****

This was one of the omissions in the first version.

Practice 15

> “Hold your breath for a ****count of five****.”

「屏住呼吸，****數到五****。」

Practice 16

> “At a ****count of three****, everyone lifted the box together.”

「****數到三時****，大家一起把箱子抬起來。」

****a count of X = 以數到某個指定數字作為時間 / 節奏單位****

9. ****X count = measured number/level (測量數值) —數量 ;計數值****

A broad and important noun pattern.

Practice 17

> “The pollen ****count**** is high today.”

「今天的花粉****數值 / 濃度指標****很高。」

Practice 18

> “The calorie ****count**** of the meal was surprisingly low.”

「這頓飯的卡路里****總量****出奇地低。」

****X count = 某類事物經點算 / 測量所得的數量或數值****

Common:

- * blood count
- * white blood cell count
- * calorie count
- * pollen count
- * sperm count
- * cell count

10. **blood count** (醫療) — 血球計數；血液細胞數值

Practice 19

> “The doctor ordered a blood **count**.”

「醫生安排了**血球計數檢查**。」

Practice 20

> “Her white blood cell **count** was low.”

「她的白血球**數值**偏低。」

blood count = 某類血液細胞在樣本中的測量數量

11. **word count** (寫作) — 字數

Practice 21

> “The essay has a **word count** of 500.”

「這篇文章的**字數**是 500。」

Practice 22

> “Stay within the required word count.”

「請把文章控制在規定的**字數範圍**內。」

word count = 一篇文字所包含的字 / 詞數量

12. **count** = legal charge (法律) — 一項控罪；罪名

A genuinely distinct legal meaning.

Practice 23

> “He was charged with two **counts** of fraud.”

「他被控兩項詐騙**罪名 / 控罪**。」

Practice 24

> “The court dismissed one **count**.”

「法院撤銷了一項**控罪**。」

count — law = 起訴文件中的一項獨立犯罪指控

13. **count** = balls-and-strikes total (棒球) — 球數

A common sports meaning, especially in North American English.

Practice 25

> “The **count** is two balls and one strike.”

「現在的**球數**是兩壞球一好球。」

Practice 26

> “He worked the **count** to three and two.”

「他把**球數**逼到三壞兩好。」

count — baseball = 打者目前所面對的壞球和好球數目

14. **count** = technical measured number (紡織 / 物理) — 計數規格；計數值

This is valid but secondary/technical.

Practice 27

> “The fabric has a high thread **count**.”

「這種布料的**支數 / 線數密度**很高。」

Practice 28

> “The detector recorded a low particle **count**.”

「探測器記錄到較低的粒子**計數值**。」

count — technical = 用數字表示某種密度、粒子事件、線數或其他可測量數量的技術指標

Useful, but not core everyday vocabulary.

15. **Count** + name (歐洲貴族頭銜) — 伯爵

This was the most obvious missing lexical meaning.

Here **Count** is capitalized when used as a title.

Practice 29

> “**Count Dracula** is one of the most famous fictional vampires.”

「**德古拉伯爵**是最著名的虛構吸血鬼之一。」

Practice 30

> “The **Count** welcomed the guests to his estate.”

「那位**伯爵**歡迎客人來到他的莊園。」

Count = 歐洲部分貴族制度中的男性貴族頭銜，大致相當於英國貴族制度中的 **Earl**

Female equivalent:

> **Countess** = 女伯爵 / 伯爵夫人

This is a separate lexical identity from **count** = 數.

16. **countable** = able to be counted individually — 可數的

A major grammar family member.

Practice 31

> “‘Plant’ is a **countable** noun.”

「plant 是一個**可數名詞**。」

Practice 32

> “Chairs are countable because we can say one chair, two chairs, and so on.”

「chair 是**可數的**，因為我們可以說一張、兩張椅子等等。」

countable = 能夠作為獨立單位逐一計數的

17. **count noun** (語法) — 可數名詞

A useful linguistics/grammar compound that should have been in the first version.

Practice 33

> “‘Book’ is a **count noun**.”

「book 是一個**可數名詞**。」

Practice 34

> “Count nouns normally have singular and plural forms.”

「**可數名詞**通常有單數和複數形式。」

count noun = 可以用數字直接計數、通常有單複數變化的名詞

Contrast:

> mass noun / uncountable noun

18. **uncountable** = not normally counted as separate units (語法) — 不可數的

Practice 35

> “‘Information’ is usually **uncountable** in English.”

「information 在英語中通常是**不可數名詞**。」

Practice 36

> “‘Water’ is normally uncountable when referring to the substance generally.”

「當 water 泛指水這種物質時，通常是**不可數的**。」

****uncountable — grammar = 一般不把名詞所指內容視為可逐個計數的獨立單位****

19. ****uncountable = too numerous to count (一般語意) — 數不清的****

Practice 37

> “There were ****uncountable**** stars in the sky.”

「天空中有**多得數不清的**星星。」

Practice 38

> “The decision had uncountable small consequences.”

「這個決定帶來了**數不清的細微後果**。」

****uncountable — general = 數量多到實際上無法逐一計算的****

In everyday English, ****countless**** is usually more natural.

20. ****countless + plural noun (大量) — 無數的；數不清的****

This is your exact source family form.

Practice 39 — Original

> “I have visited her home ****countless times****.”

「我已經去過她家**無數次**。」

Practice 40

> “She has grown ****countless plants**** over the years.”

「多年來，她種過**數不清的植物**。」

Practice 41

> “The garden has given her countless happy memories.”

「這個花園為她帶來了**無數美好的回憶**。」

****countless = 數量極多，多到難以 / 沒有必要逐一計算****

Important:

> countless ≠ literally infinite

It usually means ****very many****.

21. ****recount = count again — 重新計數；重新點算****

Practice 42

> “Officials ****recounted the votes****.”

「官員****重新點票****。」

Practice 43

> “Please recount the plants because the totals do not match.”

「請把植物****重新數一次****，因為總數對不上。」

****recount = 再次計算，以確認原本數目是否準確****

22. ****recount = narrate events — 講述；詳述****

Same spelling, completely different meaning.

Practice 44

> “She ****recounted**** how she first became interested in gardening.”

「她****講述了****自己最初怎樣對園藝產生興趣。」

Practice 45

> “He recounted the events in detail.”

「他詳細**敘述**了事情的經過。」

****recount = 按次序講述已經發生的事情 / 經歷****

This is a genuinely separate lexical meaning.

23. ****countdown = backward numerical count — 倒數；倒數計時****

Practice 46

> “The ****countdown**** to the new year began.”

「新年的****倒數****開始了。」

Practice 47

> “The launch countdown stopped at ten seconds.”

「發射****倒數****在十秒時停止了。」

****countdown = 從較大數字逐步數到零的計數過程****

24. ****countdown = final period before an event — 倒數階段****

Practice 48

> “The project has entered its final ****countdown****.”

「這個項目已進入最後的****倒數階段****。」

Practice 49

> “The countdown to the exam has begun.”

「距離考試的****倒數期****已經開始。」

****countdown = 某件重要事件發生前，所剩時間逐步減少的最後階段****

25. **headcount** = total number of people — 人數；人頭數

Practice 50

> “We need an accurate **headcount** before leaving.”

「出發前，我們需要準確**點算人數**。」

Practice 51

> “The company reduced its headcount last year.”

「公司去年減少了**員工人數**。」

headcount = 某群體中的總人數；商業語境常指員工總數

Fixed-expression note

These should be included as useful extensions, but **not treated as separate lexical meanings** of bare **count**.

keep count — 持續記住 / 記錄數目

> “I lost track because I wasn’t keeping count.”

「我沒有持續記數，所以後來搞不清數目了。」

lose count — 數到忘記 / 多得記不清

> “I’ve lost count of how many times I’ve visited.”

「我已經**多得記不清去過多少次**。」

This is particularly relevant to your source **countless times**.

at the count of three — 數到三時

> “Lift together at the count of three.”

「**數到三時**一起抬。」

count the cost — 承受 / 認清代價

> “The company is still counting the cost of the mistake.”

「公司仍在**承受 / 估算那次錯誤造成的代價**。」

This is figurative.

out for the count — 被擊倒 / 失去行動能力

Originally from boxing.

> “The boxer was out for the count.”

「那名拳手被擊倒，**無法在讀秒前起身**。」

Figuratively:

> “After twelve hours of work, I was out for the count.”

「工作十二小時後，我已經**累得完全動不了 / 倒頭就睡**。」

count your chickens before they hatch — 過早認定成功

Usually in:

> **Don't count your chickens before they hatch.**

「事情還沒成功，不要太早樂觀 / 不要過早盤算成果。」

A common proverb, but I would keep it clearly under idioms.

Important distinction: **count vs calculate**

count

= determine how many individual items there are.

> “Count the tomatoes.”

「數一數番茄有多少個。」

calculate

= use arithmetic/mathematics to determine a value.

> “Calculate the total cost.”

「計算總成本。」

So:

count items

calculate values

Important distinction: **count vs include**

include

= contain as part of a group.

count

= include specifically in a total/category.

> “The price includes tax.”

「價格包括稅項。」

> “Do we count tax in the total?”

「我們有沒有把稅項計入總額？」

Important distinction: **count = matter vs matter**

These overlap:

> “Every vote counts.”

> “Every vote matters.”

Both:

「每一票都重要。」

But **count** often implies:

> **it makes a difference to the final result**

Important distinction: **count as** vs **treat as**

You have already curated **treat**.

count as

= qualify/be classified as

> “Does this count as exercise?”

「這算不算運動？」

treat as

= regard and deal with accordingly

> “Treat this as confidential.”

「把這當作機密處理。」

So:

count as = 是否符合某類別 / 定義

treat as = 按該身分 / 性質來處理

Important distinction: **countless** vs **many**

many

= large number.

countless

= extremely large, unspecified number.

> many visits

> = 很多次探訪

> countless visits

> = 無數次 / 多得數不清

Countless is stronger and more expressive.

Important distinction: **countless vs infinite**

countless

usually figurative:

> extremely many

**infinite

literally/mathematically:

> without limit

> “I’ve told you countless times.”

does not literally mean:

> infinitely many times.

Important distinction: **countable vs uncountable vs countless**

**countable

= can be counted as individual units.

**uncountable

= grammatically not normally treated as individually countable; or generally too numerous to count.

countless

= extremely many.

So:

> **countable noun** = 可數名詞

> **uncountable noun** = 不可數名詞

> **countless flowers** = 無數花朵

Important distinction: **recount = count again vs recount = narrate**

recount the votes

= 重新點票

recount the story

= 講述故事

Same spelling, very different meaning.

That is excellent MCQ material.

Important distinction: **count vs Count**

Capitalization matters.

count

= 數 / 計算 / 重要 / 控罪等

Count

= 伯爵

> count the votes

> = 數票

> Count Dracula

> = 德古拉伯爵

Same spelling apart from capitalization, completely different lexical identity.

Family-extension sweep

After the corrected full audit, the useful modern family includes:

****count — calculate**** = 數 / 點算
****count — include**** = 計入
****count — matter**** = 重要 / 有作用
****count — regard**** = 視為 / 認為
****count as**** = 算作 / 符合某類別
****a count — total**** = 總數
****a count — act**** = 一次點算
****a count of five**** = 數到五的一段計數
****X count**** = 某類事物的測量數量 / 數值
****count — law**** = 一項控罪
****count — baseball**** = 球數
****count — technical**** = 技術性計數值 / 密度規格
****Count — title**** = 伯爵
****countable**** = 可數的
****count noun**** = 可數名詞
****uncountable — grammar**** = 不可數的
****uncountable — general**** = 數不清的
****countless**** = 無數的
****recount — count again**** = 重新計數
****recount — narrate**** = 講述
****countdown — numerical**** = 倒數
****countdown — figurative**** = 倒數階段
****headcount**** = 人數
****keep count**** = 持續記數
****lose count**** = 多得記不清
****count the cost**** = 承受 / 認清代價
****out for the count**** = 被擊倒 / 完全失去行動能力

This revised version is much closer to the natural ceiling for useful modern ****count**** coverage without slipping into obscure dictionary archaeology.

Master comparison

Form / sense	MCQ-ready Traditional Chinese meaning
----- -----	
count — calculate	逐一計算人 / 物，以確定總數有多少

count — include	在計算總數時把某人 / 某物納入其中	
count — matter	對結果具有實際重要性、價值或影響	
count — regard/consider	把某人 / 某事視為某種身分、類別或狀態	
count as	判斷某人 / 某事是否符合某一類別或定義	
a count — total	經過計算所得出的總數	
a count — act	一次計數 / 點算行為	
a count of + number	以數到指定數字作為時間 / 節奏單位	
X count	某類事物經點算或測量所得的數量 / 數值	
count — law	起訴文件中的一項獨立控罪	
count — baseball	打者目前的壞球及好球球數	
count — technical	用數字表示線數、粒子事件或其他技術測量量的指標	
Count — title	歐洲貴族制度中的男性貴族頭銜；伯爵	
countable	能作為獨立單位逐一計數的	
count noun	可以用數字直接計數、通常具有單複數形式的名詞	
uncountable — grammar	一般不把名詞所指內容視為可逐個計數的獨立單位	
uncountable — general	數量大到實際上難以逐一計算的	
countless	數量極多，多到難以 / 沒有必要逐一計算的	
recount — count again	再次計算，以確認原來數目是否準確	
recount — narrate	按次序講述已經發生的事情 / 經歷	
countdown — numerical	從較大數字逐步數到零的倒數過程	
countdown — figurative	距離某件重要事件發生所剩時間逐步減少的最後階段	
headcount	某群體的總人數；商業語境亦常指員工總數	

For your original sentence

> “I have visited her home ****countless times**** since I was a child.”

The exact meaning is:

****countless = 次數極多，多到說話者沒有實際需要 / 難以給出精確數字****

So:

> ****countless times****

= ****「無數次 / 多得數不清」****

Natural full translation:

> ****「我從小到大已經去過她家無數次。」****

And the corrected high-value contrasts are:

> ****count**** → 數 / 計算

> ****count**** → 重要

> ****count**** → 視為

> **count** → 控罪
> **Count** → 伯爵
> **countable** → 可數
> **uncountable** → 不可數
> **countless** → 無數
> **recount** → 重新計數 **或** 講述
> **countdown** → 倒數
> **headcount** → 人數統計

This redo is now much closer to the standard we want for the database.
