20. **curiosity value — 因新奇而有的吸引力**

Practice 1

> The device has some **curiosity value**, but it isn't very practical.

這部裝置有一些**新奇吸引力**，但並不太實用。

Practice 2

> Visitors came mainly for the **curiosity value**.

遊客主要因為覺得**新奇有趣**而來。

MCQ-ready definition:

curiosity value = 某物因罕見、新奇或怪異而產生的吸引力

21. **incurious — 不好奇的 ; 缺乏求知慾的**

Less common and more formal.

Practice 1

> An **incurious** student may accept answers without asking why.

一個**缺乏好奇心的學生**可能會接受答案而不追問原因。

Practice 2

> He was strangely **incurious** about what had happened.

他對發生的事情竟然**毫不好奇**。

MCQ-ready definition:

incurious = 對新資訊、原因或未知事物缺乏興趣，不太想進一步了解

Important distinction 1: **curious** vs **interested**

interested

broadly means wanting to give attention to something.

curious

adds the idea of **wanting to find out or understand something unknown**.

> I'm **interested** in science.

我對科學有興趣。

> I'm **curious** about how this machine works.

我很好奇這部機器怎樣運作。

So **curious** is more question-driven.

Important distinction 2: **curious** vs **inquisitive**

curious

common, neutral, usually positive.

inquisitive

means very eager to ask questions and discover things.

> an ****inquisitive child****

求知慾非常強、愛發問的孩子

****Inquisitive**** can sometimes sound slightly intrusive depending on context, though it is often positive.

Important distinction 3: ****curious vs nosy****

Very important.

****curious****

usually positive/neutral:
wanting knowledge.

****nosy****

negative:
too interested in other people's private business.

> I'm curious about astronomy. 

我對天文學很好奇。

> She's nosy about her neighbours' private lives.

她很愛打聽鄰居的私事。

So:

****curious ≠ nosy****

Important distinction 4: ****curious vs imaginative****

****curious****

wants to understand.

imaginative

creates ideas, scenes, possibilities in the mind.

For Leo:

* asks endless questions → **curious**

* creates imaginary cities → **imaginative**

They reinforce each other but are distinct traits.

Important distinction 5: **curious vs creative**

Another useful Leo contrast.

curious

asks:

> “How does this work?”

creative

asks/thinks:

> “What new thing could I make with this?”

So:

* **curiosity** drives discovery

* **creativity** drives invention/creation

Important distinction 6: **curious = eager to know vs curious = strange**

These are the two major adjective senses.

Person

> a **curious child**

一個**好奇的孩子**

Thing/event

> a **curious situation**

一個**奇怪的情況**

The context usually makes the difference clear.

Important distinction 7: **curious about vs curious to**

curious about + noun/-ing

topic of curiosity:

> curious **about space**

對太空好奇

curious to + verb

desire to discover something:

> curious **to know what happened**

很想知道發生了甚麼

Important distinction 8: **curiously = 好奇地 vs 奇怪的是**

Manner

> He looked **curiously** at the box.

他**好奇地**看着盒子。

Sentence adverb

> **Curiously**, the box was empty.

奇怪的是，盒子是空的。

Same word, distinct function and meaning.

Important distinction 9: **curiosity vs interest**

interest

can be long-term and broad.

curiosity

often comes from a gap in knowledge:

> “I don't know, and I want to find out.”

You may have a long-term **interest in history**, while a particular old letter **arouses your curiosity**.

Important distinction 10: **curiosity vs knowledge**

Curiosity is not knowledge itself.

curiosity

desire to know

knowledge

what you already know

So curiosity often leads to gaining knowledge.

Important distinction 11: **curious question can be ambiguous**

> a **curious question**

can mean:

1. **a question asked out of curiosity**
2. **a strange/unusual question**

Context is essential.

For learner materials, do not automatically translate every occurrence as 「好奇的問題」.

Important distinction 12: **curiosity** as countable vs uncountable

Uncountable

= the quality of being curious

> children's **curiosity**

孩子的好奇心

Countable

= a strange/interesting object

> an old **curiosity**

一件稀奇古怪的舊物

This is a genuine countability-linked lexical shift.

Family-extension note

Curious has two major modern adjective branches:

1. **wanting to know**

* curious child

* curious about science

* curious to know

* curious mind

2. **strange / unusual**

* curious case

* curious situation

* curious coincidence

The noun **curiosity** also splits importantly:

* **uncountable curiosity** = 好奇心

* **a curiosity** = 稀奇事物

This is a strong polysemy family because the branches are genuinely established rather than just different Chinese translations.

For your passage, however, the meaning is clearly the positive **求知慾 / 探索欲** sense.

Master comparison

Form / expression	Traditional Chinese	Core idea	
-----	-----	-----	
curious person/child	好奇的；求知慾強的	wants to know	
curious about X	對 X 好奇	interest in unknown	
curious to know/see	很想知道 / 看看	desire to discover	
curious mind	好奇心強的頭腦	questioning mindset	
curious question	好奇提出的 / 奇怪的問題	context-dependent	
curious case	奇怪的案件	unusual	
curious situation	奇怪的情況	unusual	
curious coincidence	奇特的巧合	strikingly unusual	
curious look	好奇 / 奇怪的神情	context-dependent	
curiously	好奇地	manner of curiosity	
Curiously, ...	奇怪的是.....	unexpectedly	
curiosity	好奇心	desire to know	
natural curiosity	天生好奇心	innate desire to learn	
intellectual curiosity	求知慾	interest in knowledge	
out of curiosity	出於好奇	motivated by curiosity	
satisfy curiosity	滿足好奇心	answer desire to know	
spark/arouse curiosity	激發好奇心	cause curiosity	
curiosity gets the better of X	忍不住好奇	curiosity overcomes restraint	
a curiosity	稀奇事物	unusual object	
curiosity value	新奇吸引力	appeal from novelty	
incurious	不好奇的	lacks curiosity	

For your original sentence

> Overall, I like him a lot because he is **curious**, kind, and full of life.

Here:

curious = 好奇的；求知慾強的；很想了解世界的

The passage has already demonstrated this trait through:

> He asks endless questions about how things work.

So the writer is not merely calling Leo “interested.” The stronger idea is:

he actively wants to understand things and keeps asking questions to find out more

A natural Traditional Chinese rendering is:

> 總的來說，我很喜歡他，因為他**充滿好奇心、求知慾很強**，又善良，而且充滿活力。

For this passage, **「求知慾強」** captures the positive nuance especially well.
