

Word family: **energy / energies / energetic / energetically**

Base word: energy

Plural: energies

Related forms: energetic, energetically

Useful expressions / extensions: full of energy, have the energy to, save energy, renewable energy, energy source, energy consumption, nervous energy, creative energy

Part of speech: mainly noun (名詞) / adjective and adverb family (相關形容詞、副詞)

Your sentence:

> “He was full of **energy**, but at the same time he was warm, funny, and surprisingly thoughtful...”

Meaning in this passage

Here, **energy** means:

> **physical and mental liveliness; the ability and enthusiasm to keep moving, playing, talking, or doing things**

Leo is an active child who has lots of natural liveliness.

繁體中文： ** **精力；活力；身體和精神上充滿力量、能持續活動的狀態

**中文翻譯： **

> “He was full of energy...”

「他**精力充沛 / 充滿活力**.....」

Here:

full of energy = 精神很好、活力十足、很有精力

1. **energy = physical/mental vitality (精力 / 活力) — 精力；活力**

This is the exact sense in your passage.

Practice 1 — Original

> “He was full of **energy**.”

「他**精力充沛 / 充滿活力**。」

Practice 2

> “Children often have a lot of **energy**.”

「小朋友通常都有很多**精力**。」

Practice 3

> “I don’t have enough **energy** to go out tonight.”

「我今晚沒有足夠的**精力**外出。」

energy = 身體或精神上可用來活動、工作、思考或持續做事情的力量 / 精力

2. **have the energy to + verb** (有精力做.....) — 有體力 / 精神做.....

Practice 4

> “After work, I rarely have the **energy to cook**.”

「下班後，我很少還有**精力煮飯**。」

Practice 5

> “She still had enough **energy to play** with the children.”

「她仍然有足夠**精力**陪小朋友玩。」

have the energy to do something = 有足夠體力或精神完成某事

3. **full of energy** (精力充沛) — 充滿活力

Practice 6

> “Leo is always **full of energy**.”

「Leo 總是**精力充沛**。」

Practice 7

> “She woke up feeling **full of energy**.”

「她醒來時感到**充滿活力**。」

****full of energy = 精神和體力非常充沛，願意活動和做很多事情****

4. ****energy = enthusiasm / lively force (氣氛 / 感染力) — 活力；熱情；動感****

A broader social or expressive sense.

Practice 8

> “She brings a lot of ****energy**** to the team.”

「她為團隊帶來很多****活力和熱情****。」

Practice 9

> “The performance had amazing ****energy****.”

「那場表演充滿了很強的****活力和動感****。」

****energy = 某人或活動所散發的活力、熱情和感染力****

This is not exactly physical stamina.

5. ****energy = atmosphere / dynamic feeling (氣場 / 動感) — 氣氛；活力感****

Practice 10

> “The room had a positive ****energy****.”

「房間裡有一種正面的****氣氛 / 活力感****。」

Practice 11

> “The city has a very different ****energy**** at night.”

「這座城市晚上有一種很不同的****氣氛和活力****。」

****energy = 某個地方、人群或情境給人的整體活力和動態感覺****

This use is common but somewhat informal and abstract.

6. **energy = effort / attention directed at something (心力 / 精力) — 精力 ; 心力**

Practice 12

> “She puts a lot of **energy** into her work.”

「她在工作上投入很多**精力和心力**。」

Practice 13

> “Don’t waste your **energy** arguing.”

「不要把**精力**浪費在爭吵上。」

energy = 一個人可投入某項活動、目標或問題的努力和心力

7. **put energy into something (投入精力) — 花心力 ; 投入**

Practice 14

> “He puts a lot of **energy into** his creative projects.”

「他在創作項目上投入很多**心力**。」

Practice 15

> “She poured all her **energy into** helping her family.”

「她把全部**心力**都放在幫助家人上。」

put/pour energy into something = 把大量努力、時間和精神投入某事

8. **energy = physical/scientific energy (物理學) — 能量**

A major technical meaning.

Practice 16

> “Moving objects have kinetic **energy**.”

「移動中的物體具有動**能**。」

Practice 17

> “Plants obtain **energy** from sunlight.”

「植物從陽光中獲取**能量**。」

****energy = 物理學中做功或引起變化的能力****

This is completely different from everyday “精力,” even though the concepts are related metaphorically.

9. ****energy = electrical/usable power source (能源) — 能源 ; 能量****

Practice 18

> “The country is investing in clean **energy**.”

「該國正投資於潔淨**能源**。」

Practice 19

> “Homes use **energy** for heating and lighting.”

「家庭使用**能源**來供暖和照明。」

****energy = 可用來產生電力、熱力或驅動設備的能源資源****

10. ****renewable energy (可再生能源) — 再生能源****

Practice 20

> “Solar and wind power are forms of **renewable energy**.”

「太陽能 and 風能都是**可再生能源**。」

Practice 21

> “The city wants to increase its use of **renewable energy**.”

「這座城市希望增加**可再生能源**的使用。」

****renewable energy = 能自然補充、可持續使用的能源，例如太陽能、風能和水力****

11. ****energy source (能源來源) — 能源來源****

Practice 22

> “Coal is still an important ****energy source**** in some countries.”

「煤在一些國家仍然是重要的****能源來源****。」

Practice 23

> “They are looking for cleaner ****energy sources****.”

「他們正在尋找更潔淨的****能源來源****。」

****energy source = 能夠提供可用能量或燃料的來源****

12. ****energy consumption/use (能源消耗) — 能耗；能源使用****

Practice 24

> “The building has low ****energy consumption****.”

「這座建築的****能源消耗量很低****。」

Practice 25

> “We need to reduce ****energy use****.”

「我們需要減少****能源使用量****。」

****energy consumption = 某人、設備、建築或社會所使用的能源量****

13. ****save/conserve energy (節省能源) — 節能****

Practice 26

> “Turn off the lights to **save energy**.”

「關燈可以**節省能源**。」

Practice 27

> “Modern buildings are designed to **conserve energy**.”

「現代建築的設計旨在**節約能源**。」

save/conserv e energy = 減少不必要的能源消耗

14. **energy = calories/nutritional energy (食物能量) — 熱量 ; 能量**

A common health/nutrition use.

Practice 28

> “Food provides the body with **energy**.”

「食物為身體提供**能量**。」

Practice 29

> “Carbohydrates are an important source of **energy**.”

「碳水化合物是重要的**能量來源**。」

energy = 食物所提供、供身體活動和維持功能使用的能量

In nutrition, this may be measured in:

* calories

* kilojoules

15. **nervous energy (緊張帶來的活力 / 躁動) — 緊張精力 ; 坐立不安的能量**

A useful collocation.

Practice 30

> “He paced around the room with nervous **energy**.”

「他因緊張而充滿**坐立不安的躁動感**，在房間裡走來走去。」

Practice 31

> “She laughed constantly because of nervous **energy**.”

「她因為緊張而帶著一種**不安的活力**，不停地笑。」

****nervous energy = 因緊張、焦慮或興奮而產生的過度活動感或躁動****

16. ****creative energy (創作活力) — 創作能量；創意活力****

Especially relevant to Leo.

Practice 32

> “He has enormous creative **energy**.”

「他有非常強的**創作活力**。」

Practice 33

> “The project gave her creative **energy**.”

「這個項目激發了她的**創作動力**。」

****creative energy = 用於想像、創作、發明或產生新想法的精神活力****

17. ****positive/negative energy (正面 / 負面氣場) — 正面 / 負面能量；氣氛****

Common informal figurative language.

Practice 34

> “She brings positive **energy** into the room.”

「她為房間帶來一股**正面氣氛 / 正能量**。」

Practice 35

> “I don’t want that negative **energy** around me.”

「我不想身邊有那種**負面氣氛 / 負能量**。」

positive/negative energy = 某人或環境令人感受到的正面 / 負面情緒和氣氛

This is informal and should not be confused with scientific energy.

18. **energetic = full of energy (精力充沛的) — 有活力的 ; 精力充沛的**

The main adjective form.

Practice 36

> “Leo is a very **energetic** child.”

「Leo 是一個非常**精力充沛的小朋友**。」

Practice 37

> “She remained **energetic** throughout the day.”

「她一整天都保持得很**有活力**。」

energetic = 有很多體力和精神，喜歡積極活動的

19. **energetic = vigorous / active in manner (積極有力的) — 充滿活力的 ; 有幹勁的**

Practice 38

> “They launched an **energetic** campaign.”

「他們展開了一場**積極有力的活動**。」

Practice 39

> “The team made an **energetic** effort to improve.”

「團隊作出了非常**積極、有幹勁的努力**。」

energetic = 行動積極、充滿幹勁和活力的

20. **energetically = with great energy (充滿活力地) — 精力充沛地 ; 積極地**

Practice 40

> “The children played **energetically**.”

「孩子們**精力充沛地**玩耍。」

Practice 41

> “She argued **energetically** for the proposal.”

「她**積極而有力地**為那項建議辯護。」

****energetically = 以充滿活力、幹勁或力量的方式****

Important distinction: **energy vs power**

This is one of the most important contrasts.

energy

can mean:

- * personal vitality
- * physical energy
- * usable fuel/resources

power

often means:

- * control/authority
- * ability to cause an effect
- * rate of energy transfer in technical contexts

In everyday English:

> “I have no energy.”

= 我沒有精力。

But:

> “I have no power.”

usually means:

= 我沒有權力 / 控制力，或沒有電力供應。

Very different.

Important distinction: **energy vs strength**

energy

= ability/willingness to keep doing things.

strength

= physical or mental capacity to resist, lift, endure, etc.

A person can have:

> lots of energy but little physical strength

or:

> great strength but low energy.

Important distinction: **energy vs stamina**

energy

= current supply of vitality.

stamina

= ability to continue physical or mental effort for a long time.

> “He has lots of energy.”

= 他很有活力。

> “He has good stamina.”

= 他很有耐力。

Important distinction: **energy vs enthusiasm**

energy

can mean general liveliness or activity level.

enthusiasm

specifically means:

> strong interest, excitement, and eagerness.

A child may have lots of physical energy without being enthusiastic about a particular activity.

Important distinction: **energy vs mood**

energy

describes activity level or dynamic force.

mood

describes emotional state.

Someone can have:

> low energy but a good mood

or:

> lots of energy but a bad mood.

Important distinction: **energetic vs active**

active

= often moving, doing things, or participating.

energetic

= has a lot of vitality and intensity while doing them.

Someone can be active because of routine without seeming especially energetic.

Important distinction: **energetic vs lively**

energetic

focuses on:

> abundance of energy and activity.

lively

often emphasizes:

> cheerful animation, movement, or interesting atmosphere.

> energetic child

> lively conversation

> lively party

They overlap, but collocations differ.

Important distinction: **energy — human vs scientific**

Human:

> “I’m full of energy.”

= 我精力充沛。

Scientific:

> “Heat is a form of energy.”

= 熱是一種能量。

The scientific sense is much more precise.

Important distinction: **energy = electricity?**

Not exactly.

energy

is the broad concept/resource.

electricity

is one specific form of energy.

So:

> renewable energy

can include:

- * solar
- * wind
- * hydro
- * geothermal

not just electricity itself.

Important distinction: **energy vs fuel**

fuel

= material used to produce energy.

energy

= what that fuel ultimately provides.

For example:

- > petrol = fuel
- > chemical energy = energy

Important distinction: **save energy — personal vs technical**

Personal:

> “I’m saving my energy for later.”

= 我保留體力，留待之後。

Technical:

> “Turn off the lights to save energy.”

= 關燈節能。

Same wording, different sense of **energy**.

Important distinction: **put energy into vs use energy**

put energy into something

often means:

> invest effort, enthusiasm, and attention.

use energy

can mean:

> consume physical/scientific energy.

> “She put a lot of energy into the project.”

= 她投入很多心力。

> “The machine uses a lot of energy.”

= 機器消耗大量能源。

Important distinction: **full of energy vs hyperactive**

full of energy

usually neutral or positive.

****hyperactive****

suggests:

> unusually or excessively active, sometimes in a clinical or critical sense.

Your passage says Leo is:

> ****full of energy****

which is positive and affectionate.

It does not imply a behavioural disorder.

Important distinction: ****energetic vs tiring****

This is especially relevant to your passage.

****energetic child****

= the child has lots of energy.

****tiring child/activity****

= causes another person to become tired.

So Leo may be:

> ****energetic****

without necessarily being:

> ****tiring****.

In fact, your passage explicitly says his energy does ****not**** feel annoying or empty.

Family-extension note

The ****energy**** family has several strong modern semantic centres:

* **personal vitality** = 精力 / 活力
 * **social/expression energy** = 氣氛 / 感染力
 * **effort invested** = 心力
 * **scientific energy** = 能量
 * **energy resources** = 能源
 * **nutritional energy** = 食物能量 / 熱量

The family sweep then adds:

* **energetic**
 * **energetically**

and several highly useful compounds:

* **renewable energy**
 * **energy source**
 * **energy consumption**
 * **creative energy**
 * **nervous energy**
 * **positive/negative energy**

These should be separated where the underlying concept genuinely shifts, while ordinary collocations within the same “vitality” or “physical energy” core should remain grouped. That follows the manual’s broad-search but conservative-split principle.

Master comparison

Form / sense	MCQ-ready Traditional Chinese meaning
-----	-----
energy — personal vitality	身體或精神上可用來活動、工作、思考或持續做事情的精力
have the energy to	有足夠體力或精神去完成某事
full of energy	精神、體力非常充沛，活力十足
energy — enthusiasm/liveliness	某人 / 活動所散發的活力、熱情和感染力
energy — atmosphere	某人、地方或情境給人的整體動態感和氣氛
energy — effort	可投入某件事的精神、心力和努力
put energy into	把大量努力、心力或精神投入某事
energy — physics	在物理學中做功或引起變化的能力
energy — resource	可用來產生電力、熱力或驅動設備的能源
renewable energy	能自然補充並可持續使用的能源
energy source	能提供可用能量或燃料的來源
energy consumption	某人 / 設備 / 系統所使用的能源量
save/conserves energy	減少不必要的能源消耗

energy — nutrition	食物提供給身體活動和維持功能的能量	
nervous energy	因緊張、焦慮或興奮而產生的躁動和過度活動感	
creative energy	用於想像、創作和產生新想法的精神活力	
positive/negative energy	某人 / 環境令人感受到的正面或負面情緒氣氛	
energetic — person	精力充沛、喜歡積極活動的	
energetic — action/style	行動積極、充滿幹勁和活力的	
energetically	以充滿活力、幹勁或力量的方式	

For your original sentence

> “He was full of **energy**, but at the same time he was warm, funny, and surprisingly thoughtful...”

The exact meaning is:

****energy = 身體和精神上的活力與精力****

Therefore:

> ****full of energy****

= ****「精力充沛 / 活力十足」****

The sentence is important because it sets up a contrast:

> ****high energy****

does not mean:

> annoying

> uncontrolled

> exhausting

Leo has lots of energy, but he is also:

> warm

> funny

> thoughtful

So the passage presents ****energy**** positively: not as chaotic activity, but as ****liveliness and enthusiasm****.
