

Absolutely — **library** is a good secondary polysemy target because your passage uses it here:

> “...it appeared in an art book in the **library**.”

Here **library** means **a place or institution where books and other materials are kept for people to read, borrow, or use**. But the word also has important modern meanings in **personal collections, computing/programming, media collections, and organized reference resources**.

Word family: **library / librarian / librarianship**

Base word: library

Plural: libraries

Related person noun: librarian

Related field noun: librarianship

Part of speech: noun (名詞)

Meaning in your passage: **library = place/institution containing books and resources — 圖書館**

Your sentence:

> “...it appeared in an art book in the **library**.”

Here **library** means:

> **a place or institution where books, magazines, digital resources, and other materials are kept for reading, study, reference, or borrowing.**

繁體中文：

收藏書籍及其他資料，供人閱讀、查閱、學習或借閱的地方 / 機構；圖書館

Natural translation:

> “...an art book in the library.”

「圖書館裡的一本**藝術書**。」

So here:

> **library = 圖書館**

1. **library = public/school/university library — 圖書館**

The core institutional meaning.

Practice 1 — Original

> “The book was in the **library**.”

「那本書在**圖書館**裡。」

Practice 2

> “She studies in the university library every afternoon.”

「她每天下午都在大學**圖書館**溫習。」

Practice 3

> “You can borrow the book from the public library.”

「你可以從公共**圖書館**借這本書。」

library = 收藏並管理書籍及其他資料，供公眾、學生或研究者使用的機構 / 場所

2. **library** = room used for keeping/reading books — 藏書室；書房

A common place/room sense.

Practice 4

> “The house has a small **library** upstairs.”

「這間屋樓上有一間小型**藏書室 / 書房**。」

Practice 5

> “They turned the spare room into a library.”

「他們把空房改造成一間**藏書室**。」

library = 家中、學校或機構內專門放置書籍並供閱讀的房間

Important:

This need not be a public institution.

3. **library** = collection of books — 藏書；書籍收藏

A major metonymic sense.

Practice 6

> “He has built up an impressive **library** of art books.”

「他建立了一套很豐富的藝術**藏書**。」

Practice 7

> “Her personal library contains thousands of books.”

「她的私人**藏書**有數千本書。」

library = 某人 / 某機構所擁有的一整套書籍收藏

Here it refers to the **collection**, not necessarily the room.

4. **library** = organized collection of media/resources — 資料庫；素材庫；媒體庫

A major modern extension.

Practice 8

> “The app includes a large **library** of images.”

「這個應用程式包含一個大型**圖片庫 / 素材庫**。」

Practice 9

> “The website offers a library of recorded lectures.”

「這個網站提供一個錄製講座的**資源庫**。」

library = 被有系統整理、可供選取或使用的一組數碼內容 / 資源

Common:

* image library

* music library

- * video library
- * content library
- * resource library

5. **music library = 音樂庫；音樂收藏**

Practice 10

> “I organized my digital **music library**.”

「我整理了自己的數碼**音樂庫**。」

Practice 11

> “The service gives users access to a huge music library.”

「這項服務讓使用者存取龐大的**音樂庫**。」

music library = 系統性保存、管理或提供使用的音樂收藏

6. **photo/image library = 圖片庫；相片庫**

Practice 12

> “The museum has an online **image library**.”

「博物館有一個網上**圖片庫**。」

Practice 13

> “Search the photo library for pictures of Monet.”

「在**相片庫**中搜尋 Monet 的圖片。」

image/photo library = 有組織地保存並可搜尋使用的圖片 / 照片集合

7. **library = collection of reusable computer code — 程式庫；函式庫**

A major computing meaning.

Practice 14

> “The program uses a graphics **library**.”

「這個程式使用一個圖像**程式庫** / 函式庫。」

Practice 15

> “Developers installed a new software library.”

「開發者安裝了一個新的軟件**程式庫**。」

library — computing = 已預先寫好的程式碼、函式或工具集合，可被其他程式重複使用

This is one of the strongest modern polysemy contrasts.

8. **library** = reusable software package/resources — 軟件庫；資源庫

A broader computing use.

Practice 16

> “This library provides tools for image processing.”

「這個**程式庫**提供圖像處理工具。」

Practice 17

> “The project depends on several external libraries.”

「這個項目依賴幾個外部**程式庫**。」

library = 為特定技術任務提供可重用功能的一組程式資源

9. **library** = collection of samples/templates/design assets — 範本庫；素材庫

A common design/workplace extension.

Practice 18

> “The design team maintains a **library** of icons.”

「設計團隊維護一個圖示**素材庫**。」

Practice 19

> “Choose a template from the library.”

「從**範本庫**中選一個範本。」

****library = 有系統整理、可重複取用的素材、範本或設計元素集合****

10. ****library = reference/resource collection in an organization — 資源中心；資料庫****

A workplace/academic use.

Practice 20

> “The company maintains a research ****library****.”

「公司設有一個研究****資料庫 / 資料中心****。」

Practice 21

> “Employees can access the internal resource library.”

「員工可以使用內部****資源庫****。」

****library = 為某個組織整理保存、供查閱的一組專業資料****

11. ****digital library = 數碼圖書館；數位圖書館****

A major modern compound.

Practice 22

> “The university has a large ****digital library****.”

「這所大學有一個大型****數碼圖書館****。」

Practice 23

> “Students can access the digital library from home.”

「學生可以在家使用**數碼圖書館**。」

****digital library = 以電子形式收藏、管理並提供書籍、文章、檔案等資料的系統 / 服務****

12. ****reference library = 參考圖書館 / 參考資料庫****

Practice 24

> “These books belong to the ****reference library****.”

「這些書屬於****參考館藏 / 參考圖書館****。」

Practice 25

> “The department has a small reference library.”

「這個部門有一個小型****參考資料庫 / 藏書區****。」

****reference library = 主要供查閱而非一般借出的參考資料收藏 / 場所****

13. ****lending library = 借閱圖書館****

Practice 26

> “It operates as a free ****lending library****.”

「它是一間免費的****借閱圖書館****。」

Practice 27

> “Members can borrow books from the lending library.”

「會員可以從****借閱圖書館****借書。」

****lending library = 主要讓使用者把書籍借走的圖書館****

14. ****library card = 圖書證 ; 借書證****

A very common compound.

Practice 28

> “You need a **library card** to borrow books.”

「你需要一張**圖書證 / 借書證**才能借書。」

Practice 29

> “I renewed my library card online.”

「我在網上續期了我的**圖書證**。」

library card = 證明使用者有借閱 / 使用圖書館資格的卡

15. **librarian** = 圖書館員

A major related person noun.

Practice 30

> “The **librarian** helped me find the art section.”

「**圖書館員**幫我找到藝術類書籍區。」

Practice 31

> “Ask the librarian if the book is available.”

「問一下**圖書館員**那本書是否可以借閱。」

librarian = 負責管理、整理圖書館資料並協助使用者查找資訊的人

16. **librarianship** = 圖書館學；圖書館專業

A useful academic/professional family extension.

Practice 32

> “She studied **librarianship** at university.”

「她在大學修讀**圖書館學**。」

Practice 33

> “Modern librarianship includes digital information management.”

「現代**圖書館專業**包括數碼資訊管理。」

librarianship = 管理圖書館、資訊資源、館藏和使用服務專業的專業 / 學科

Important distinction: **library vs bookstore/bookshop**

library

= books/resources are mainly kept for reading, research, or borrowing.

bookstore / bookshop

= books are sold.

> library

> = 圖書館

> bookstore/bookshop

> = 書店

You normally **borrow** from a library but **buy** from a bookstore.

Important distinction: **library vs study**

library

= room or collection centered on books/resources.

study

= private room primarily used for reading, writing, or work.

A study may contain many books, but it is not automatically a library.

> home library

> = 家庭藏書室

> study

> = 書房 / 工作室

Important distinction: **library vs collection**

You curated **collection** earlier.

collection

= any group of items gathered together.

library

= an organized collection specifically intended for reference, reading, access, or reuse.

> art collection

> = 藝術收藏

> image library

> = 圖片資源庫

So a library is a type of organized collection, but not every collection is a library.

Important distinction: **library vs archive**

library

usually provides resources for use/reference.

archive

usually preserves original records/documents because of historical, administrative, or evidential value.

> library of books

> = 圖書館 / 藏書

> historical archive

> = 歷史檔案館 / 檔案資料

An institution can contain both.

Important distinction: **library vs database**

library

= organized collection of resources, often files, media, code, books, etc.

database

= structured data stored for querying and manipulation.

> image library

> = 圖片庫

> customer database

> = 客戶資料庫

They overlap in digital systems but are not equivalent.

Important distinction: **library vs repository**

library

emphasizes organized resources ready for access/use.

repository

emphasizes a place/system where things are stored and maintained.

In computing:

> code library

> = 可重用的程式碼集合

> code repository

> = 儲存和管理程式碼檔案 / 版本的儲存庫

Different function.

Important distinction: **library in everyday English vs computing**

Everyday:

> “I went to the library.”

= 我去了圖書館。

Computing:

> “Import the library.”

= 匯入程式庫。

Same spelling, completely different domain.

Excellent MCQ contrast.

Important distinction: **library vs framework in programming**

library

you call/use its code when needed.

framework

provides a broader structural architecture and often controls program flow.

Simplified learner version:

> library = 可調用的工具 / 函式集合

> framework = 建立整個應用程式的結構框架

They can overlap, but conceptually differ.

Important distinction: **library vs package/module**

In programming:

library

broad collection of reusable functionality.

module

usually one organized code unit.

package

a bundled/distributed collection of modules/resources.

Terminology varies by language/ecosystem, so for learners:

> library = 程式庫

> module = 模組

> package = 套件

Important distinction: **library vs media library**

A traditional library may contain physical books.

A **media library** may contain:

* photos

* videos

* audio

* digital assets

So modern **library** has generalized from “books” to:

> **organized reusable collection of resources**

This is the key conceptual extension.

Family-extension sweep

After the full audit, the useful modern family includes:

* **library — institution/place** = 圖書館

* **library — room** = 藏書室 / 書房

* **library — book collection** = 藏書

* **library — digital/media collection** = 素材庫 / 媒體庫 / 資源庫

* **music library** = 音樂庫

* **image/photo library** = 圖片庫 / 相片庫

* **library — computing** = 程式庫 / 函式庫

* **design/template library** = 素材庫 / 範本庫

* **digital library** = 數碼圖書館

* **reference library** = 參考圖書館 / 參考資料庫
 * **lending library** = 借閱圖書館
 * **library card** = 圖書證 / 借書證
 * **librarian** = 圖書館員
 * **librarianship** = 圖書館學 / 圖書館專業

Master comparison

Form / sense	MCQ-ready Traditional Chinese meaning
-----	-----
library — institution	收藏、管理並提供書籍及其他資料供閱讀、研究或借閱的場所 / 機構
library — room	專門放置書籍並供閱讀的房間
library — collection	某人或機構有系統擁有的一整套藏書
library — media/resources	被整理並可搜尋、選取或重複使用的一組數碼內容 / 資源
library — computing	預先寫好、可由其他程式重複調用的程式碼 / 函式集合
design/template library	可重複取用的圖示、範本、素材等集合
digital library	以電子形式收藏、管理並提供書籍、文章或檔案的系統
librarian	管理圖書館資料並協助使用者查找資訊的人
librarianship	管理圖書館與資訊資源的專業 / 學科

For your original sentence

> “I first came across it when I was in secondary school, because it appeared in an art book in the **library**.”

The exact meaning is:

library = 學校或公共圖書館這類收藏書籍、供學生閱讀和查閱資料的地方

Natural translation:

> **「我第一次接觸到這幅畫是在中學時期，因為它出現在圖書館的一本藝術書中。」**

The highest-value contrasts are:

- > **school library** → 學校圖書館
- > **home library** → 家庭藏書室 / 私人藏書
- > **personal library** → 私人藏書
- > **image library** → 圖片庫
- > **music library** → 音樂庫
- > **software library** → 程式庫 / 函式庫

> **digital library** → 數碼圖書館

> **librarian** → 圖書館員
