### Practice 55

> “I used the script as a guide rather than **following it exactly**.”

「我只是把講稿當作指引，而不是**完全逐字照著說**。」

**follow a script** = 按照預先規定的文字 / 步驟進行

---

**Important distinction: script vs notes**

This is particularly relevant to presentations.

**script**

usually contains:

- \* complete or near-complete wording;
- \* sentences you may actually say.

**notes**

usually contain:

- \* keywords;
- \* bullet points;
- \* reminders.

Compare:

> “I wrote a script.”

= 我寫了一份比較完整的講稿。

> “I made some notes.”

= 我寫了一些提示 / 筆記。

So a script is normally more complete than notes.

---

**Important distinction: script vs outline**

**script**

= detailed wording.

### \*\*outline\*\*

= structure / main points only.

> script:

> “Good morning everyone. Today I’d like to...”

versus outline:

- \* introduction

- \* project goal

- \* results

- \* conclusion

So:

\*\*script = 詳細講稿\*\*

\*\*outline = 大綱\*\*

---

## Important distinction: \*\*script vs speech\*\*

### \*\*script\*\*

= the written text.

### \*\*speech\*\*

can mean:

- \* the actual spoken performance;

- \* the prepared talk itself.

> “I wrote the script.”

= 我寫講稿。

> “I gave the speech.”

= 我發表演講。

The script is the written support; the speech is the spoken event/content.

---

## Important distinction: **script vs presentation**

### **presentation**

= the whole act/event of presenting information.

It may include:

- \* speech;
- \* slides;
- \* charts;
- \* demonstrations;
- \* Q&A.

### **script**

= only the prepared words/text you plan to say.

So:

**presentation ≠ script**

A script is one component of a presentation.

---

## Important distinction: **script vs screenplay**

### **script**

is broad:

- \* film;
- \* TV;
- \* theatre;
- \* speech;
- \* radio;
- \* computing.

### **screenplay**

specifically refers to:

> a film script.

So every screenplay is a script, but not every script is a screenplay.

---

## Important distinction: **script vs dialogue**

### **script**

includes the whole written performance text.

### **dialogue**

specifically means:

> spoken exchanges between characters.

A script can contain:

- \* dialogue;
- \* scene instructions;
- \* actions;
- \* stage directions.

So dialogue is only part of a script.

---

## Important distinction: **script vs handwriting**

In older/formal usage:

> “beautiful script”

can mean elegant handwriting.

But in ordinary modern English:

> handwriting

is clearer when talking about how someone writes by hand.

So:

**script = 手寫體** is established but not the first everyday choice.

---

## Important distinction: **script vs alphabet**

### **alphabet**

= ordered set of letters.

### **script**

= broader writing system.

For example, **Latin script** includes letters used by many languages.

So:

**alphabet = 字母表**

**script = 書寫系統**

They overlap but are not identical.

---

## Important distinction: **script vs language**

A script is not a language.

For example:

> English and Vietnamese can both use the Latin script.

Different languages can share one script.

And one language can historically be written in different scripts.

So:

**language = 語言**

**script = 書寫系統**

---

## Important distinction: **computer script vs full program**

### \*\*script\*\*

often suggests:

- \* shorter code;
- \* automation;
- \* interpreted execution;
- \* task-oriented use.

### \*\*program\*\*

is broader and can refer to any software.

A script is a type of program, but the boundary is not absolute.

---

## Important distinction: \*\*scripted vs prepared\*\*

### \*\*prepared\*\*

simply means:

> planned/rehearsed in advance.

### \*\*scripted\*\*

specifically suggests:

> wording/content was written or fixed in advance.

A presentation can be well prepared without being fully scripted.

---

## Important distinction: \*\*scripted vs rehearsed\*\*

### \*\*scripted\*\*

= the content is written beforehand.

### \*\*rehearsed\*\*

= the delivery has been practised beforehand.

You can have:

- \* a scripted but unrehearsed presentation;
- \* a rehearsed but unscripted presentation.

---

## Important distinction: **off script vs improvising**

### **go off script**

= depart from prepared material.

### **improvise**

= create/speak without advance preparation.

If you go off script, you may begin improvising.

But the first expression emphasizes deviation from an existing script.

---

## Important distinction: **write a script vs script something**

### Noun:

> “I wrote a script.”

= 我寫了一份講稿 / 劇本。

### Verb:

> “I scripted the opening.”

= 我預先把開場內容寫好。

The verb **script** sounds somewhat more formal or production-oriented than simply **write**.

---

## Family-extension sweep

The practical **script** family is concentrated around prepared wording, performance text, writing systems, and computing:

\* \*\*script — presentation/speech\*\* = 講稿 / 發言稿  
 \* \*\*presentation script\*\* = 簡報講稿

 \* \*\*script — verb\*\* = 編寫腳本 / 預先寫好  
 \* \*\*scripted\*\* = 預先寫好 / 安排好的  
 \* \*\*scripted response\*\* = 預設回答  
 \* \*\*unscripted\*\* = 沒有預先寫稿 / 即興的  
 \* \*\*scripting\*\* = 腳本編寫  
 \* \*\*scriptwriter\*\* = 編劇 / 腳本作者  
 \* \*\*screenplay\*\* = 電影劇本  
 \* \*\*social script\*\* = 社會既定行為模式  
 \* \*\*go off script\*\* = 不照稿 / 偏離原安排  
 \* \*\*stick to the script\*\* = 照稿 / 按預定內容進行

The main semantic branches are:

> \*\*prepared text to be spoken\*\*

> \*\*performance/dramatic text\*\*

> \*\*writing system\*\*

> \*\*computer instructions\*\*

> \*\*prearranged pattern\*\*

## For your original passage

> “First, I wrote a simple **\*\*script\*\*** and cut out anything too technical or complicated.”

The exact meaning is:

**\*\*script = 為簡報預先寫好的講稿 / 發言內容\*\***

Therefore:

> **\*\*write a simple script\*\***

= **\*\*「寫一份簡單的講稿」\*\***

In your story, the script helped you:

- \* organize what you wanted to say;
- \* simplify difficult content;
- \* practise aloud;
- \* reduce the chance of your mind going blank;

\* control the timing.

The most important learner contrasts are:

> **\*\*presentation script\*\***

> = 簡報講稿

> **\*\*notes\*\***

> = 提示筆記

> **\*\*outline\*\***

> = 大綱

> **\*\*film script\*\***

> = 電影劇本

> **\*\*scripted response\*\***

> = 預先準備好的固定回答

> **\*\*go off script\*\***

> = 不照稿 / 即興發揮

> **\*\*Latin script\*\***

> = 拉丁文字系統

> **\*\*computer script\*\***

> = 電腦腳本程式

So **\*\*script\*\*** is much richer than simply:

> **\*\*script = 劇本\*\***

and in your original sentence, it specifically means:

**\*\*\*“a prepared written version of what you planned to say during the presentation.”\*\*\***
