Meaning in this passage

> At one point, he suddenly got frustrated and said, in front of the whole group, that I had not
uploaded my part on time and that I was holding everyone back.

Here, **uploaded** means:

**transferred a digital file from the speaker's device to the shared online folder or platform —
上傳**

Kevin thought the speaker had failed to put their part of the presentation into the shared digital

space before the deadline.

****中文翻譯：****

他說我沒有準時****上傳自己的部分****。

So here:

**upload = 把自己裝置上的數碼檔案傳送到網站、雲端、共享資料夾或遠端系統**

MCQ-ready definition:

uploader = 用來把檔案傳送到網站或系統的軟件工具或介面元件

20. **uploaded (已上傳的) — 已上傳的**

Practice 1

> Check the **uploaded files**.

檢查**已上傳的檔案**。

Practice 2

> The **uploaded document** was incomplete.

已上傳的文件並不完整。

MCQ-ready definition:

uploaded = 已經被傳送到遠端系統或平台的

Important distinction 1: **upload vs download**

This is the biggest distinction.

upload

your device → remote system

download

remote system → your device

For example:

> upload a presentation to the shared folder

> 把簡報**上傳到**共享資料夾

> download the presentation from the shared folder

> 從共享資料夾**下載**簡報

Direction is the key.

Important distinction 2: **upload vs send**

send

very broad: transmit something to someone.

upload

specifically transfer digital content to a server/platform/remote location.

> send Kevin the file

把檔案傳給 Kevin

> upload the file to the shared folder

把檔案上傳到共享資料夾

You can send a file without uploading it to a shared platform.

Important distinction 3: **upload vs attach**

attach

add a file to an email/message/form.

upload

transfer the file to the service/system.

When attaching an email file, the system technically uploads it, but learner meaning differs:

> attach the file to the email

> 把檔案附加到電郵

> upload the file to the portal

> 把檔案上傳到平台

Important distinction 4: **upload vs post**

upload

describes the file-transfer action.

post

usually means publish/share content so others can see it.

> upload a photo

把照片傳上平台

> post a photo

把照片發布出去

Many apps automatically combine both actions, but conceptually they differ.

Important distinction 5: **upload vs publish**

upload

places content onto a server/platform.

publish

makes content officially/publicly available.

Something can be uploaded but still remain:

- * private,
- * draft,
- * unpublished.

Important distinction 6: **upload vs save**

save

store data.

upload

transfer data to a remote destination.

> save the file on my laptop

把檔案儲存在手提電腦

> upload it to the cloud

把它上傳到雲端

Important distinction 7: **upload vs sync**

upload

one directional transfer, usually local → remote.

sync

keep versions in two or more locations consistent automatically.

A sync process may include both uploads and downloads.

Important distinction 8: **upload as verb vs upload as noun**

Verb

> Upload the file.

上傳檔案。

Noun: process

> The upload is slow.

上傳很慢。

Noun: content

> His latest upload is a video.

他最新的上傳內容是一段影片。

Important distinction 9: **uploaded vs uploading**

uploaded

transfer completed / past participle.

> uploaded file

已上傳檔案

uploading

transfer in progress.

> The file is uploading.

檔案正在上傳。

Important distinction 10: **upload speed vs internet speed**

Internet speed is broad.

It often includes:

- * download speed

- * upload speed

- * latency

So a fast download connection does not necessarily mean fast uploads.

Important distinction 11: **upload to vs upload from**

Destination

> upload **to** the server

上傳**到**伺服器

Source

> upload **from** your phone

從手機上傳

A very useful preposition distinction.

Important distinction 12: **upload on time vs submit on time**

In your passage, Kevin says the speaker had not **uploaded** their part on time.

upload on time

focuses on the technical action of putting the file into the shared folder.

submit on time

focuses on formally handing in the work.

A file can be uploaded somewhere without being formally submitted.

Family-extension note

Upload is semantically quite concentrated compared with highly polysemous words such as **order** or **control**.

Its main modern branches are:

1. **verb: transfer digital content upward/away to remote storage**

* upload a file

* upload a video

* upload to the cloud

2. **noun: the transfer process**

- * the upload failed
- * upload speed

3. **noun: the uploaded content**

- * latest upload
- * illegal uploads

4. **person/tool**

- * uploader

Most other differences are **collocations and technical contexts**, not genuinely separate meanings.

Master comparison

Form / expression	Traditional Chinese	Core idea
-----	-----	-----
upload (verb)	上傳	send digital data to remote system
upload a file	上傳檔案	transfer file
upload a photo	上傳照片	transfer image
upload a video	上傳影片	transfer video
upload a document	上傳文件	transfer document
upload to X	上傳到 X	destination
upload from X	從 X 上傳	source
upload to the cloud	上傳到雲端	cloud storage
upload successfully	成功上傳	completed transfer
upload failed	上傳失敗	transfer unsuccessful
upload (noun: process)	上傳	transfer process
upload (noun: content)	上傳內容	uploaded item
upload speed	上傳速度	transfer rate
upload limit	上傳限制	size/quantity limit
upload button	上傳按鈕	interface control
bulk upload	批量上傳	many files at once
automatic upload	自動上傳	automatic transfer
uploader (person)	上傳者	person
uploader (tool)	上傳工具	software/interface
uploaded	已上傳的	transfer completed
uploading	正在上傳	transfer in progress

For your original sentence

> He suddenly got frustrated and said, in front of the whole group, that I had not **uploaded my part on time** and that I was holding everyone back.

Here:

uploaded my part = 把自己負責完成的簡報內容 / 投影片檔案傳到共享資料夾

A natural Traditional Chinese rendering is:

> 他說我沒有準時**上傳自己負責的部分**，還說我拖慢了大家的進度。

The key distinction is:

> **upload** = 技術上把檔案傳到共享位置

> **submit** = 正式把功課 / 作品交上去

In this passage, because Kevin later checks the **shared folder** and discovers the file had been there all along, **upload** is very specifically the correct word.
