

Absolutely — **battery** is one of the strongest polysemy targets in this passage because the EV context uses the everyday electrical sense, while the word also has important extensions in **law**, **military**, **testing**, **music/percussion**, and **grouped equipment**.

Your passage uses it here:

> “future expenses remain uncertain, as is the case in **battery replacement**...”

and later:

> “battery warranties”

> “a degraded battery”

> “battery-health certificates”

Here **battery** means **a device that stores electrical energy chemically and supplies electricity to a machine or vehicle**.

Word family: **battery / batteries / battery-powered**

Base noun: battery

Plural: batteries

Common compound adjective: battery-powered

Part of speech: noun (名詞)

Major domains:

* electrical energy storage

* electric vehicles

* portable electronics

* military artillery

* law

* groups/series of tests or questions

* groups of similar equipment

* music/percussion in some specialist uses

* baseball as a specialist historical/sporting extension

* compounds such as **battery pack, battery life, battery capacity, battery health**

Meaning in your passage: **battery = electrical energy-storage device — 電池 ; 蓄電池**

Your passage says:

> “battery replacement”

> “battery warranties”

> “a degraded battery”

Here **battery** means:

> **the rechargeable electrical energy-storage system that powers an electric vehicle.**

繁體中文：

透過化學方式儲存電能，並在需要時向電動車提供電力的可充電電池系統；電池 / 蓄電池

Natural translation:

> “battery replacement”

> 「**更換電池**」

> “battery warranties”

> 「**電池保養 / 保固**」

> “a degraded battery”

> 「**性能已衰退的電池**」

So here:

> **battery = 電動車的主要儲能系統**

A. BATTERY — ELECTRICAL DEVICE

1. battery = device that stores and supplies electrical energy — 電池；蓄電池

The core modern sense.

Practice 1

> “The car’s **battery** needs to be replaced.”

「汽車的**電池**需要更換。」

Practice 2

> “The device runs on a rechargeable battery.”

「這部裝置使用**可充電電池**。」

****battery = 儲存電能並向裝置供電的設備****

B. RECHARGEABLE BATTERY

2. ****rechargeable battery = 可充電電池；充電電池****

Practice 3

> “Electric vehicles use large ****rechargeable batteries****.”

「電動車使用大型****可充電電池****。」

Practice 4

> “Rechargeable batteries can be used repeatedly.”

「****可充電電池****可以反覆使用。」

C. NON-RECHARGEABLE BATTERY

3. ****non-rechargeable battery = 一次性電池；不可充電電池****

Practice 5

> “The remote control uses non-rechargeable batteries.”

「遙控器使用****一次性電池****。」

Practice 6

> “Do not attempt to recharge a non-rechargeable battery.”

「不要嘗試替****不可充電電池****充電。」

D. CAR BATTERY

4. ****car battery = 汽車電池****

Practice 7

> “The car battery was flat.”

「汽車**電池沒電了**。」

Practice 8

> “Cold weather can affect a car battery.”

「寒冷天氣可能影響**汽車電池**。」

Important:

In petrol cars, **car battery** often means the 12V starter battery, not a large EV traction battery.

E. EV BATTERY

5. **EV battery = 電動車電池**

Practice 9

> “An EV battery is one of the most expensive parts of the vehicle.”

「**電動車電池**是車輛最昂貴的零件之一。」

Practice 10

> “EV battery performance can decline over time.”

「**電動車電池**的性能可能隨時間下降。」

F. TRACTION BATTERY

6. **traction battery = 動力電池；牽引電池**

A major technical EV term.

Practice 11

> “The **traction battery** powers the electric motor.”

「**動力電池**為電動馬達供電。」

Practice 12

> “Traction batteries are much larger than ordinary car batteries.”

「**動力電池**比一般汽車電池大得多。」

traction battery = 主要用來推動電動車行駛的大型高壓電池

G. BATTERY PACK

7. **battery pack** = 電池組；電池包

Practice 13

> “The battery pack sits under the floor.”

「**電池包**位於車底。」

Practice 14

> “The battery pack contains many individual cells.”

「**電池組**包含很多單體電芯。」

battery pack = 多個電芯 / 模組組合成的完整電池系統

H. BATTERY CELL

8. **battery cell** = 電芯；單體電池

Practice 15

> “A battery pack contains hundreds of cells.”

「一個電池包可能包含數百個**電芯**。」

Practice 16

> “A damaged cell can affect the whole pack.”

「一個受損的**電芯**可能影響整個電池包。」

Important distinction:

> cell = 單一電化學單元

> battery = one or more cells assembled as a usable energy source

Everyday English often uses **battery** loosely where technical language distinguishes the two.

I. BATTERY MODULE

9. **battery module** = 電池模組

Practice 17

> “Several cells are grouped into a battery module.”

「多個電芯會組成一個**電池模組**。」

Practice 18

> “The technician replaced one battery module.”

「技術員更換了一個**電池模組**。」

J. BATTERY CAPACITY

10. **battery capacity** = 電池容量

Practice 19

> “The vehicle has a battery capacity of 70 kWh.”

「這輛車的**電池容量**是 70 kWh。」

Practice 20

> “Battery capacity affects driving range.”

「電池容量會影響續航距離。」

battery capacity = 電池可以儲存多少電能

K. BATTERY LEVEL

11. **battery level = 電量 ; 電池剩餘量**

Practice 21

> “The battery level is down to 20%.”

「**電量**已跌至 20%。」

Practice 22

> “Check the battery level before leaving.”

「出發前先查看**電量**。」

L. BATTERY LIFE

12. **battery life = 電池續航時間 / 電池壽命**

A very important ambiguity.

Sense A — time between charges

> how long device can operate before recharge

Sense B — total useful lifespan

> how long battery lasts before replacement

Practice 23

> “This phone has excellent **battery life**.”

「這部手機的**電池續航時間**很長。」

Practice 24

> “Heat can shorten battery life.”

「高溫可能縮短**電池使用壽命**。」

So **battery life** has two context-dependent Chinese meanings:

- * 續航時間
- * 電池壽命

Excellent MCQ material.

M. BATTERY HEALTH

13. **battery health = 電池健康狀況；電池性能狀態**

Directly relevant to your passage.

Practice 25

> “The certificate shows the vehicle’s **battery health**.”

「證書顯示車輛的**電池健康狀況**。」

Practice 26

> “Battery health declines gradually with age and use.”

「電池的**健康狀況 / 性能**會隨使用年期逐漸下降。」

battery health = 電池相對於原始狀態所剩的整體性能與容量

N. BATTERY DEGRADATION

14. **battery degradation = 電池衰退；電池性能劣化**

Practice 27

> “Battery degradation can reduce driving range.”

「**電池衰退**可能降低續航距離。」

Practice 28

> “Fast charging may affect degradation under some conditions.”

「在某些情況下，快速充電可能影響**電池劣化速度**。」

O. DEGRADED BATTERY

15. **degraded battery = 性能衰退的電池**

Your exact later phrase.

Practice 29

> “A degraded battery may hold less energy.”

「性能已**衰退的電池**可能儲存較少電量。」

Practice 30

> “Used-car buyers may worry about degraded batteries.”

「二手車買家可能擔心**電池老化 / 性能衰退**。」

P. BATTERY WARRANTY

16. **battery warranty = 電池保養；電池保固**

Directly relevant to your passage.

Practice 31

> “The manufacturer offers an eight-year battery warranty.”

「製造商提供八年的**電池保養**。」

Practice 32

> “Battery warranties may include capacity conditions.”

「**電池保養條款**可能包括容量要求。」

Q. BATTERY REPLACEMENT

17. **battery replacement = 更換電池**

Directly from your passage.

Practice 33

> “Battery replacement can be expensive.”

「**更換電池**可能很昂貴。」

Practice 34

> “Buyers worry about future battery replacement costs.”

「買家擔心未來的**電池更換費用**。」

R. BATTERY RANGE

18. **battery range = 以電池可行駛的距離；電池續航里程**

Practice 35

> “Cold weather can reduce battery range.”

「寒冷天氣可能降低**電池續航里程**。」

Practice 36

> “Drivers compare battery range between models.”

「駕駛者會比較不同車型的**電池續航距離**。」

More often English simply says:

> EV range / driving range

but **battery range** is understandable.

S. BATTERY MANAGEMENT SYSTEM

19. **battery management system = 電池管理系統**

Often abbreviated:

> BMS

Practice 37

> “The battery management system monitors temperature.”

「**電池管理系統**監察溫度。」

Practice 38

> “A BMS helps protect the battery pack.”

「電池管理系統有助保護**電池包**。」

****BMS = 監控、保護、平衡及管理電池狀態的電子系統****

T. BATTERY TEMPERATURE

20. ****battery temperature = 電池溫度****

Practice 39

> “Battery temperature affects charging speed.”

「**電池溫度**會影響充電速度。」

Practice 40

> “The system keeps battery temperature within a safe range.”

「系統會把電池溫度維持在安全範圍內。」

U. BATTERY COOLING

21. ****battery cooling = 電池冷卻****

Practice 41

> “Battery cooling is important during fast charging.”

「快速充電時，**電池冷卻**很重要。」

Practice 42

> “The cooling system protects the battery from excess heat.”

「冷卻系統保護電池免受過高溫度影響。」

V. FLAT / DEAD BATTERY

22. **flat battery = 沒電的電池**

Especially BrE.

Practice 43

> “The car would not start because the battery was flat.”

「汽車因**電池沒電**而無法啟動。」

Practice 44

> “My phone has a flat battery.”

「我的手機**沒電了**。」

23. **dead battery = 完全沒電 / 失效的電池**

Common AmE/general.

Practice 45

> “The car has a dead battery.”

「汽車的**電池完全沒電了**。」

Practice 46

> “A dead battery may need charging or replacement.”

「完全沒電的電池可能需要充電或更換。」

Important:

dead battery can mean:

* discharged
* permanently failed
depending on context.

W. BATTERY-POWERED

24. **battery-powered = 以電池供電的**

Practice 47

> “The device is battery-powered.”

「這部裝置是**以電池供電的**。」

Practice 48

> “Battery-powered tools are easy to carry.”

「**電池供電工具**方便攜帶。」

X. RUN ON BATTERIES

25. **run on batteries = 使用電池運作**

Practice 49

> “The toy runs on batteries.”

「這個玩具**使用電池運作**。」

Practice 50

> “The sensor can run on batteries for months.”

「這個感應器可以靠電池運作數月。」

Y. REPLACE THE BATTERIES

26. **replace the batteries = 更換電池**

Practice 51

> “Replace the batteries when the display becomes dim.”

「顯示變暗時請**更換電池**。」

Practice 52

> “The remote needs new batteries.”

「遙控器需要**換新電池**。」

Z. BATTERY — GROUP / SERIES OF SIMILAR THINGS

27. **a battery of + tests/questions/etc. = 一連串；一整套；大量**

A major figurative sense.

Practice 53

> “The patient underwent a **battery of tests**.”

「病人接受了**一連串 / 一整套檢查**。」

Practice 54

> “The candidate faced a battery of questions.”

「候選人面對**一連串問題**。」

a battery of X = 大量同類項目集中組合起來

This is one of the most important non-electrical senses.

AA. BATTERY OF TESTS

28. **battery of tests = 一系列檢測；整套測試**

Practice 55

> “The battery underwent a battery of safety tests.”

「這個電池接受了**一整套安全測試**。」

Practice 56

> “Doctors ordered a battery of tests.”

「醫生安排了**一系列檢查**。」

Nice polysemy sentence:

> battery underwent a battery of tests

first:

* 電池

second:

* 一整套

AB. TEST BATTERY

29. **test battery = 測驗組；整套測試工具**

Psychology/education/assessment.

Practice 57

> “The researchers used a cognitive **test battery**.”

「研究人員使用了一套認知**測驗組**。」

Practice 58

> “The assessment battery measures several abilities.”

「這套**測驗組合**量度多項能力。」

test battery = 多個相關測驗組成的一套評估工具

AC. BATTERY OF QUESTIONS

30. **battery of questions = 連珠炮式的一連串問題**

Practice 59

> “Reporters asked a battery of questions.”

「記者提出了**一連串問題**。」

Practice 60

> “The witness faced a battery of detailed questions.”

「證人面對**一大串詳細問題**。」

Depending on tone:

> 連珠炮式問題

can be very natural.

AD. BATTERY OF CRITICISM? PRODUCTIVE

Expressions such as:

> battery of criticism

> battery of complaints

are possible, but less canonical than:

* tests

* questions

* guns

The core remains:

> grouped series.

No need to split further.

AE. MILITARY: ARTILLERY BATTERY

31. **battery = group of artillery guns and personnel — 炮兵連；炮隊；炮兵陣地**

A major distinct historical/military sense.

Practice 61

> “The artillery **battery** opened fire.”

「**炮兵連 / 炮隊**開火。」

Practice 62

> “The battery contained several large guns.”

「這個**炮兵單位**配有幾門大炮。」

battery — military = 一組大炮及其操作部隊所構成的軍事單位

AF. COASTAL BATTERY

32. **coastal battery = 海岸炮台 / 岸防炮台**

Practice 63

> “The fort contained a coastal battery.”

「堡壘內設有一座**岸防炮台**。」

Practice 64

> “The coastal battery protected the harbour.”

「**海岸炮台**保護港口。」

Here battery may refer more to:

> emplacement/group of guns

than organizational unit.

AG. ANTI-AIRCRAFT BATTERY

33. **anti-aircraft battery = 防空炮兵連 / 防空炮組**

Practice 65

> “An anti-aircraft battery defended the area.”

「一個**防空炮兵單位**負責防守該區。」

Practice 66

> “The battery tracked incoming aircraft.”

「這個防空炮組追蹤來襲飛機。」

AH. MISSILE BATTERY

34. **missile battery = 導彈連 / 導彈發射單位**

Practice 67

> “The military deployed a missile battery.”

「軍方部署了一個**導彈發射單位**。」

Practice 68

> “The battery included several launchers.”

「這個導彈單位包括多個發射器。」

AI. BATTERY — LEGAL TORT / OFFENCE

35. **battery = unlawful intentional physical contact/use of force — 毆打；非法身體接觸**

A major legal sense.

Practice 69

> “He was sued for **battery**.”

「他因**非法身體接觸 / 毆打**而被起訴。」

Practice 70

> “Battery generally involves unlawful physical contact.”

「**battery** 一般涉及未經合法理由的身體接觸或武力。」

Exact legal definition varies by jurisdiction.

This sense must be handled carefully:

> it does **not** simply mean “a severe beating” in all legal systems.

AJ. ASSAULT AND BATTERY

36. **assault and battery** = 襲擊與毆打 / 威脅與非法身體接觸

A famous legal pairing.

Practice 71

> “The claim alleged assault and battery.”

「申索指稱涉及**襲擊及非法身體接觸**。」

Practice 72

> “The distinction between assault and battery depends on the legal system.”

「**assault** 與 **battery** 的區別取決於相關法律制度。」

Important legal distinction in some common-law jurisdictions:

* **assault** may involve causing apprehension of imminent contact

* **battery** involves the contact itself

But terminology varies by jurisdiction.

AK. BATTERY VS ASSAULT

37. **battery vs assault**

battery

= physical contact/use of force in legal sense.

assault

= may mean threat/apprehension, or may include physical attack depending on jurisdiction.

So:

> do not assume everyday **assault** and legal **battery** are interchangeable.

AL. DOMESTIC BATTERY

38. **domestic battery = 家庭關係中的非法身體暴力**

Jurisdiction-specific legal term.

Practice 73

> “He faced a domestic battery charge.”

「他面臨一項與家庭關係中暴力接觸有關的**battery 控罪**。」

Practice 74

> “The exact offence name depends on local law.”

「具體罪名要視當地法律而定。」

Lower priority but common in some legal systems.

AM. BATTERY — GROUP OF ELECTRICAL CELLS

39. **battery originally/technically = group of connected cells — 電池組**

Technical concept.

Practice 75

> “Several cells connected together form a battery.”

「多個電芯連接起來可以組成一個**電池組**。」

Practice 76

> “A battery may contain one or many electrochemical cells.”

「一個電池可能包含一個或多個電化學電芯。」

Modern everyday English often calls even a single-cell unit:

> a battery

so learner language should follow normal usage.

AN. BATTERY — GROUP OF EQUIPMENT

40. **battery = grouped set of similar equipment — 一排 / 一組設備**

Formal/technical extension from the “grouped unit” sense.

Practice 77

> “The laboratory installed a battery of sensors.”

「實驗室安裝了**一整組感應器**。」

Practice 78

> “A battery of cameras monitored the site.”

「**一排 / 一組攝影機**監察現場。」

This overlaps with:

> battery of tests

Core concept:

> coordinated group.

AO. BATTERY — PERCUSSION / DRUMS

41. **battery = percussion section / group of drums — 打擊樂組；鼓組**

Specialist music use.

Practice 79

> “The marching band’s battery kept a steady rhythm.”

「步操樂隊的**行進打擊樂組**保持穩定節奏。」

Practice 80

> “The battery includes several drums.”

「這個**打擊樂組**包括多種鼓。」

Especially in:

* marching percussion

* drum corps

Lower priority for general learners, but genuine.

AP. MARCHING BATTERY

42. **marching battery = 行進打擊樂組**

Practice 81

> “The battery rehearsed separately from the front ensemble.”

「**行進打擊樂組**與前場打擊樂組分開排練。」

Practice 82

> “Battery players carry their instruments while marching.”

「行進打擊樂組的樂手會一邊步操一邊攜帶樂器。」

Specialist music vocabulary.

AQ. BASEBALL BATTERY

43. **battery = pitcher and catcher together — 投手與捕手組合**

A specialist baseball sense.

Practice 83

> “The pitcher and catcher form the team’s **battery**.”

「投手和捕手組成球隊的**投捕搭檔**。」

Practice 84

> “The battery worked well together.”

「這對**投捕搭檔**合作得很好。」

This is established but specialized.

AR. BATTER — NOT SAME FAMILY SEMANTICALLY

Important learner warning:

battery

= 電池 / 炮兵連 / 法律上的非法身體接觸 / 一整套

batter

= 反覆猛擊；麵糊

Despite spelling similarity, do not treat **batter** as an ordinary productive derivative of **battery** for learner family analysis.

AS. BATTERY VS CELL

44. **battery** vs **cell**

cell

= single electrochemical unit.

battery

= packaged energy-storage unit, technically often one or more cells.

Example:

> EV battery pack contains many cells.

For everyday speech:

> battery is the normal user-level word.

AT. BATTERY VS BATTERY PACK

battery

= broad device/system.

battery pack

= assembled package of multiple cells/modules, especially EV/electronics.

An EV's "battery" often refers conversationally to the whole battery pack.

AU. BATTERY VS CAPACITOR

45. **battery vs capacitor**

battery

= stores energy chemically.

capacitor

= stores energy electrically in an electric field.

Both can store energy, but work differently.

AV. BATTERY VS POWER SUPPLY

46. **battery vs power supply**

battery

= stores energy.

power supply

= provides/converts electrical power to equipment; may draw energy from mains.

A desktop computer power supply is not a battery.

AW. BATTERY VS CHARGER

You just curated **charge**.

battery

= stores electrical energy.

charger

= equipment that supplies electrical energy to recharge battery.

> battery receives/stores

> charger supplies

Very important EV distinction.

AX. BATTERY VS FUEL TANK

47. **battery vs fuel tank**

battery

= stores electrical energy chemically.

fuel tank

= stores liquid/gaseous fuel.

EV:

> battery

petrol car:

> fuel tank

This is central to your passage.

AY. BATTERY VS ENGINE / MOTOR

battery

= stores energy.

motor

= converts electrical energy into motion.

engine

= typically converts fuel energy into mechanical work.

An EV battery powers:

> electric motor.

The battery itself does not directly “drive the wheels” without drivetrain components.

AZ. BATTERY VS GENERATOR

battery

= stores energy.

generator

= produces electrical energy from another energy source.

A generator can charge a battery.

BA. BATTERY VS STATE OF CHARGE

battery

= physical storage device.

state of charge

= how full it currently is.

A degraded battery may show:

> 100% state of charge

while having:

> less total capacity than when new.

Very useful EV distinction.

BB. BATTERY CAPACITY VS STATE OF CHARGE

48. **capacity vs state of charge**

battery capacity

= maximum amount of energy battery can store.

state of charge

= current percentage of that available capacity.

Example:

A degraded battery might have:

* original capacity: 70 kWh

* current maximum capacity: 60 kWh

* state of charge: 100%

So:

> 100% charged does not mean original capacity remains intact.

Excellent passage-relevant distinction.

BC. BATTERY HEALTH VS STATE OF CHARGE

battery health

= long-term condition/degradation.

state of charge

= short-term current fullness.

> health = 電池老化程度

> charge = 現時有多少電

Do not confuse them.

BD. BATTERY LIFE VS BATTERY HEALTH

battery life

can mean:

1. runtime between charges
2. total lifespan

battery health

= condition relative to new.

Battery health affects battery life, but they are not identical.

BE. BATTERY LIFE VS RANGE

battery life

for devices:

= how long before recharge

range

for EVs:

= distance vehicle can travel before recharge

For cars, saying:

> “battery range”

is possible, but:

> ****driving range / EV range****

> is usually clearer.

BF. BATTERY WARRANTY VS VEHICLE WARRANTY

****battery warranty****

= coverage specifically for battery system.

****vehicle warranty****

= broader warranty covering car/components.

An EV may have:

> one general vehicle warranty

> and

> a separate longer battery warranty.

Very relevant to your passage.

BG. BATTERY REPLACEMENT VS BATTERY REPAIR

****replacement****

= install another battery/pack/module.

****repair****

= fix existing unit.

Some EV battery problems may be addressed by:

* module repair

* component repair

rather than:

- * full pack replacement.

Different cost implications.

BH. BATTERY DEGRADATION VS BATTERY FAILURE

degradation

= gradual loss of capacity/performance.

failure

= battery/component stops functioning adequately.

A degraded battery may still work.

A failed battery may need urgent repair/replacement.

BI. BATTERY DEGRADATION VS DISCHARGE

degradation

= long-term deterioration.

discharge

= normal release/use of stored electrical energy.

A battery discharging is not necessarily degrading abnormally.

BJ. BATTERY FAILURE VS FLAT BATTERY

flat/dead battery

may simply:

= have no charge left.

battery failure

= hardware/chemical/system failure.

A flat battery can often be recharged.

A failed battery may not recover normally.

BK. BATTERY-POWERED VS ELECTRIC

battery-powered

= specifically receives energy from battery.

electric

= powered by electricity generally.

An electric device may be:

- * battery-powered

- * mains-powered

So:

> battery-powered is narrower.

BL. BATTERY VS ENERGY STORAGE SYSTEM

49. **battery vs energy-storage system**

battery

= specific electrochemical storage technology.

energy-storage system

= broader category, potentially including:

- * batteries

- * flywheels

- * pumped storage

- * thermal storage

For EVs:

> battery is the normal term.

BM. BATTERY — “A BATTERY OF” VS “A SERIES OF”

50. **a battery of vs a series of**

a series of

= neutral sequence/group.

a battery of

= often suggests a substantial, organized, intensive set.

Compare:

> a series of tests

> = 一系列測試

> a battery of tests

> = 一整套、密集的測試

The second feels stronger.

BN. BATTERY OF TESTS VS TEST BATTERY

a battery of tests

= many tests collectively.

test battery

= standardized set/collection of tests used as an assessment instrument.

Very close but slightly different emphasis.

BO. BATTERY — LEGAL VS EVERYDAY “BEATING”

Do not translate legal **battery** mechanically as:

> 暴打

The legal concept may include relatively minor unlawful contact, depending on jurisdiction.

Safer MCQ-ready gloss:

> **未經同意 / 合法理由的故意身體接觸或施力；法律上的 battery**

Then local law determines exact offence/tort definition.

BP. BATTERY — MILITARY VS ELECTRICAL

These are genuinely distinct lexical branches:

> electric battery → 電池

> artillery battery → 炮兵連 / 炮組

The military use is historically older than the electrical one and influenced the electrical term through the idea of:

> a group of similar units working together.

This helps explain the “group/series” sense:

> a battery of tests.

BQ. BATTERY — SEMANTIC NETWORK

A useful historical conceptual map is:

> **a grouped set of similar units**

From this:

military

> battery of guns

electricity

> battery of electrical cells

testing

> battery of tests

equipment

> battery of sensors

Then other branches are independent developments:

legal

> battery = unlawful physical contact

music/baseball

> specialized grouped roles/units

This is a classic word where several modern senses look unrelated but have historical connections.

BR. BATTERY IN YOUR PASSAGE

Your passage says:

> “battery replacement”

> “battery warranties”

> “a degraded battery”

> “battery-health certificates”

The writer is emphasizing **consumer uncertainty about the long-term condition and cost of EV batteries**.

The semantic chain is:

> battery ages

> → capacity may degrade

> → resale value may be affected

> → replacement may be expensive

- > → buyers worry
- > → battery-health certification can reduce uncertainty

So **battery** here is not just “something that holds electricity”; it is also being treated as:

- > a major long-term asset/component affecting vehicle cost and trust.

BS. PRONUNCIATION

battery

BrE commonly /'bætəri/

AmE commonly /'bætəri/ or reduced forms close to /'bærəri/

Plural:

- > batteries

Stress remains on:

- > **BAT**

BT. FAMILY / COMPOUND SWEEP

Following the fullest-reference style, the useful modern inventory includes:

- * **battery — electrical** = 電池 / 蓄電池
- * **rechargeable battery** = 可充電電池
- * **non-rechargeable battery** = 一次性電池
- * **car battery** = 汽車電池
- * **EV battery** = 電動車電池
- * **traction battery** = 動力電池
- * **battery pack** = 電池包 / 電池組
- * **battery cell** = 電芯
- * **battery module** = 電池模組
- * **battery capacity** = 電池容量
- * **battery level** = 電量
- * **battery life** = 電池續航時間 / 使用壽命
- * **battery health** = 電池健康狀況
- * **battery degradation** = 電池衰退
- * **degraded battery** = 性能衰退的電池
- * **battery warranty** = 電池保養
- * **battery replacement** = 更換電池

* **battery management system** = 電池管理系統
 * **flat battery** = 沒電的電池
 * **dead battery** = 完全沒電 / 失效電池
 * **battery-powered** = 電池供電的
 * **battery — group/series** = 一整套 / 一系列
 * **battery of tests** = 一整套測試
 * **test battery** = 測驗組
 * **battery of questions** = 一連串問題
 * **battery — artillery** = 炮兵連 / 炮組
 * **coastal battery** = 岸防炮台
 * **anti-aircraft battery** = 防空炮兵單位
 * **missile battery** = 導彈發射單位
 * **battery — legal** = 非法身體接觸 / 法律上的毆打
 * **assault and battery** = 襲擊與非法身體接觸
 * **battery — grouped equipment** = 一組同類設備
 * **battery — percussion** = 行進打擊樂組
 * **battery — baseball** = 投捕搭檔

Master comparison

Form / sense	MCQ-ready Traditional Chinese meaning
-----	-----
battery — electrical	透過化學方式儲存電能並向裝置供電的設備
rechargeable battery	用完電後可以重新充電並繼續使用的電池
traction battery	專門為電動車驅動馬達供應高壓電力的大型動力電池
battery pack	多個電芯 / 模組組合而成的完整電池系統
battery cell	構成電池的單一電化學儲能單元
battery capacity	電池最大可儲存的電能量
battery level	電池目前剩餘的電量比例
battery life — runtime	一次充電後可持續運作的時間
battery life — lifespan	電池可正常使用到需要更換的大致壽命
battery health	電池相對新電池所剩的容量、性能及整體狀況
battery degradation	電池隨時間 / 使用逐漸失去容量和性能的過程
battery warranty	製造商對電池性能 / 故障提供的保養保障
battery replacement	把原有電池換成另一個電池 / 電池包
battery management system	監測、保護和控制電池狀態的電子管理系統
flat/dead battery	電量已耗盡、暫時無法正常供電的電池
battery-powered	主要依靠電池供應能源運作的
a battery of X	集中出現的一整套 / 大量同類項目
battery of tests	為評估某人 / 某狀況而進行的一整套測試
battery — military	由多門火炮及其人員組成的炮兵單位 / 炮組
battery — legal	法律上未經合法理由的故意身體接觸 / 施力
battery — equipment set	一組協同使用的同類設備
battery — percussion	步操樂隊 / 鼓隊中的行進打擊樂組

For your original passage

> “future expenses remain uncertain, as is the case in ****battery replacement****...”

and:

> “few fully understand ****battery warranties****...”

and:

> “a degraded ****battery****...”

and:

> “independent ****battery-health certificates****...”

The exact meaning is:

****battery** = 電動車內用來儲存大量電能並向電動馬達供電的可充電動力電池系統。文章特別關注它的老化、容量、保養、維修 / 更換成本和二手車價值。 ******

Natural translation:

> ******「未來開支仍然不確定，例如更換電池、二手轉售價值、保險和專門維修等費用。」 ******

The highest-value contrasts are:

- > ****battery**** → 電池
- > ****EV battery**** → 電動車電池
- > ****traction battery**** → 動力電池
- > ****battery pack**** → 電池包
- > ****battery cell**** → 電芯
- > ****battery capacity**** → 電池容量
- > ****battery level**** → 電量
- > ****battery life**** → 續航時間 / 電池壽命
- > ****battery health**** → 電池健康狀況
- > ****battery degradation**** → 電池性能衰退
- > ****battery warranty**** → 電池保養
- > ****battery replacement**** → 更換電池
- > ****a battery of tests**** → 一整套測試
- > ****artillery battery**** → 炮兵連 / 炮組
- > ****battery — law**** → 非法身體接觸 / 法律上的毆打
- > ****battery ≠ cell**** → 完整電池 / 電池系統 ≠ 單一電芯
- > ****battery ≠ charger**** → 儲存電能的裝置 ≠ 為電池供電的設備

- > ****battery health ≠ state of charge**** → 長期性能狀況 ≠ 現時電量
- > ****battery degradation ≠ discharge**** → 長期性能劣化 ≠ 正常放電
