

Absolutely — **crust** is a strong secondary polysemy target because your passage uses it as part of the bakery name:

> “a neighbourhood bakery called **Golden Crust**”

Here **crust** evokes the **firm, browned outer layer of baked bread**. But the word also commonly refers to **pie/pizza pastry, a hard outer layer on substances or surfaces, geological crust, skin/scab-like layers, and figurative toughness or outward hardness**.

Word family: **crust / crusty / encrust / encrusted**

Base word: crust

Related adjective: crusty

Related verb: encrust

Related adjective/participle: encrusted

Part of speech: noun (名詞) / verb (動詞 , 較少見)

Meaning in your passage: **crust = browned outer layer of bread — 麵包外皮 ; 脆皮**

In the name:

> **Golden Crust**

crust evokes:

> **the firm, browned outer surface of bread formed during baking.**

繁體中文 :

麵包烘焙後形成的較硬、通常金黃香脆的外層 ; 麵包皮 / 脆皮

Because **Golden Crust** is a business name, keep the proper name untranslated in the passage.

Its connotation is roughly:

> **golden crust = 金黃香脆的麵包外皮**

1. **crust = outer layer of bread — 麵包皮 ; 脆皮**

The core bakery meaning.

Practice 1

> “The bread has a crisp **crust**.”

「這個麵包有一層香脆的**外皮**。」

Practice 2

> “I prefer bread with a thick crust.”

「我比較喜歡**麵包皮較厚**的麵包。」

crust = 麵包烘焙後形成的較硬外層

This is directly relevant to your passage.

2. **crust** = pastry shell of a pie/tart — 餅皮；批皮；撻皮

A major food meaning.

Practice 3

> “The apple pie has a buttery **crust**.”

「這個蘋果批有一層牛油香濃的**批皮**。」

Practice 4

> “Bake the tart until the crust is golden.”

「把撻烤到**撻皮**呈金黃色。」

crust = 包住或承托餡料的烘焙麵皮外殼

Common:

* pie crust

* tart crust

3. **pizza crust** = 薄餅外邊 / 餅底

A very common food-specific use.

Practice 5

> “I like pizza with a thin **crust**.”

「我喜歡**薄餅底**的薄餅。」

Practice 6

> “The crust was crisp around the edges.”

「薄餅的**外邊 / 餅皮**很香脆。」

pizza crust = 薄餅烤熟後的餅底和較厚外邊部分

Depending on context:

* 餅底

* 外邊

* 餅皮

4. **crust = hard outer layer formed on something — 硬殼；硬層；結皮**

A major general physical meaning.

Practice 7

> “A thin **crust** of ice formed on the water.”

「水面形成了一層薄薄的**冰殼**。」

Practice 8

> “Salt formed a white crust on the surface.”

「鹽在表面形成了一層白色**硬殼 / 結晶層**。」

crust = 某物表面形成的一層較硬、乾燥或凝固的物質

5. **crust = dried layer on dirt/mud/soil — 硬結層；乾硬表層**

Practice 9

> “The soil developed a hard **crust** after the heat.”

「高溫過後，土壤表面形成了一層**硬結層**。」

Practice 10

> “A crust of dried mud covered the boots.”

「靴子上覆蓋著一層乾掉的**泥殼**。」

****crust = 泥土、污垢等乾燥後形成的硬表層****

This belongs conceptually with #4.

6. ****crust = dried/scab-like material on skin or wound — 痂；結痂硬層****

A medical/body use.

Practice 11

> “A small ****crust**** formed over the cut.”

「傷口上形成了一層小小的**痂**。」

Practice 12

> “Do not remove the crust before the skin heals.”

「皮膚癒合前不要剝掉那層**結痂**。」

****crust = 傷口、皮膚分泌物等乾掉後形成的硬層****

In ordinary everyday English, ****scab**** is usually more common for a wound.

7. ****Earth's crust = 地殼****

A major scientific meaning.

Practice 13

> “The Earth's ****crust**** is divided into tectonic plates.”

「地球的**地殼**分成多個構造板塊。」

Practice 14

> “The continental crust is generally thicker than oceanic crust.”

「大陸**地殼**一般比海洋地殼厚。」

crust — geology = 地球最外層的固體岩石層

This is one of the strongest non-food senses.

8. **crust = outermost solid layer of another planet — 行星外殼；地殼**

A planetary science extension.

Practice 15

> “Scientists are studying the Moon’s **crust**.”

「科學家正在研究月球的**外殼 / 地殼**。」

Practice 16

> “The planet may have a thin rocky crust.”

「這顆行星可能有一層較薄的岩石**外殼**。」

crust = 行星、衛星等最外面的固體層

Conceptually the same as Earth’s crust.

9. **crust = firm surface around a softer interior — 外殼；硬外層**

A broader material sense.

Practice 17

> “The cheese develops a natural **crust** as it ages.”

「芝士熟成時會形成天然的**外殼**。」

Practice 18

> “The material formed a hard crust while remaining soft inside.”

「材料外面形成硬**殼**，但內部仍然柔軟。」

crust = 某物外面較硬、裡面相對較軟的外層

10. **crust = verb, form a hard outer layer — 結成硬殼；結皮**

Less common but current.

Practice 19

> “Salt **crusted** around the edge of the container.”

「鹽在容器邊緣**結成硬殼**。」

Practice 20

> “Mud crusted over the surface.”

「泥漿在表面乾掉並**結成硬層**。」

crust — verb = 在表面形成較硬、乾燥或凝固的層

11. **crusty = having a hard/crisp crust — 外皮香脆的；有硬皮的**

A major related adjective.

Practice 21

> “The bakery sells fresh **crusty bread**.”

「這間麵包店出售新鮮的**外脆麵包**。」

Practice 22

> “The roll was warm and crusty.”

「這個麵包卷又暖又**外皮香脆**。」

crusty = 表面有一層硬脆外皮的

Very common with bread.

12. **crusty = covered with dried/hardened material — 結硬層的；乾硬的**

Practice 23

> “The paint had become dry and **crusty**.”

「油漆已經變得乾硬並**結皮**。」

Practice 24

> “There was crusty mud on his shoes.”

「他的鞋上沾著**乾硬結塊的泥**。」

crusty = 表面覆蓋著乾掉、硬化或結塊物質的

13. **crusty = bad-tempered / irritable — 脾氣暴躁的；難相處的**

A strong figurative adjective sense.

Practice 25

> “The old man seemed **crusty** at first.”

「那位老人起初看起來有點**脾氣暴躁 / 難相處**。」

Practice 26

> “He has a crusty manner but is actually very kind.”

「他態度有點**粗聲粗氣、難親近**，其實人很好。」

crusty — person = 態度粗硬、不太友善、容易不耐煩的

Register:

* informal

* often describing an older person

* can be mildly humorous rather than extremely negative

14. **encrust = cover with a hard/decorative layer — 使覆上一層；使形成硬殼**

A useful family extension.

Practice 27

> “Salt **encrusted** the rocks.”

「鹽在岩石表面**結成了一層硬殼**。」

Practice 28

> “The surface was encrusted with minerals.”

「表面被礦物質**覆蓋成硬層**。」

encrust = 使某物表面覆上一層硬化、沉積或附著的物質

15. **encrusted = covered with a layer, especially jewels/minerals — 鑲滿的；覆滿的**

A common luxury/design extension.

Practice 29

> “She wore a jewel-**encrusted** bracelet.”

「她戴著一條**鑲滿寶石的**手鏈。」

Practice 30

> “The box was encrusted with decorative stones.”

「盒子表面**鑲滿了裝飾石**。」

encrusted with X = 表面密集覆蓋 / 鑲嵌著某種物質

16. **upper crust (較舊 / 幽默) — 上流社會；社會名流**

A useful idiomatic extension worth flagging.

Practice 31

> “The event attracted members of the **upper crust**.”

「這個活動吸引了不少**上流社會人士**。」

Practice 32

> “The hotel was once popular with the upper crust.”

「這間酒店過去很受**上流社會**歡迎。」

the upper crust = 社會上最富有、地位最高的一群人

Register:

* informal

* somewhat old-fashioned/humorous

The metaphor is:

> top crust → upper social layer

17. **crust = hard emotional exterior (少量比喻用法) — 冷硬外表；外殼**

This exists figuratively, but it is much less lexicalized than phrases like **hard exterior**.

Practice 33

> “Behind his rough **crust**, he was surprisingly warm.”

「在他粗硬的**外表 / 外殼**之下，其實相當溫暖。」

Practice 34

> “It took time to get through her defensive crust.”

「需要時間才能突破她防備性的**外殼**。」

crust — figurative = 人為保護自己而呈現的冷硬、粗糙外在態度

This is secondary/literary, so I would not make it a major database sense.

Important distinction: **crust vs shell**

You already have **shell** mapped.

crust

= outer layer formed on or around something, often through baking, drying, cooling, etc.

shell

= more clearly separate hard protective covering.

> bread crust

> = 麵包皮

> egg shell

> = 蛋殼

> Earth's crust

> = 地殼

> turtle shell

> = 龜殼

Very important distinction.

Important distinction: **crust vs skin**

skin

= natural outer covering of humans, animals, fruit, etc.

crust

= hardened outer layer formed by a process.

> apple skin

> = 蘋果皮

> bread crust

> = 麵包外皮

Not interchangeable.

Important distinction: **crust vs peel**

peel

= removable outer skin of fruit/vegetables.

crust

= hardened baked/dried outer layer.

> orange peel

> = 橙皮

> pizza crust

> = 薄餅皮 / 餅底

Important distinction: **crust vs rind**

rind

= tough outer skin of some fruit/cheese.

crust

= outer hardened layer, especially bread/pastry or formed deposits.

> watermelon rind

> = 西瓜皮

> cheese rind

> = 芝士外皮

> bread crust

> = 麵包皮

Important distinction: **crust vs crumb**

This is especially important for bread.

crust

= outer browned, firmer layer.

crumb

= soft inner structure of bread.

So:

> crisp crust

> = 香脆外皮

> soft crumb

> = 柔軟內瓤

Excellent bakery vocabulary contrast.

Important distinction: **crust vs pastry**

crust

= the outer/base shell of a pie or tart.

pastry

= dough made with flour/fat, or baked goods made from it.

So:

> pie crust

> = 批皮

> pastry dough

> = 酥皮麵糰

The crust may be made from pastry.

Important distinction: **crust vs base in pizza**

crust

can refer broadly to the baked dough base, especially its edge.

****base****

focuses on the lower supporting layer.

> thin-crust pizza

> = 薄餅底薄的 pizza

> pizza base

> = pizza 餅底

Strong overlap, but ****crust**** evokes the baked bread-like texture.

Important distinction: ****crust vs scab****

****crust****

broad hardened layer.

****scab****

specifically the dried protective layer over a healing wound.

For wounds:

> scab

is usually the more natural everyday term.

So the medical ****crust**** sense is real, but more technical/descriptive.

Important distinction: ****crust vs coating****

****coating****

= any layer covering a surface, often intentionally applied.

****crust****

= usually harder/drier and often formed naturally through a process.

> chocolate coating

> = 巧克力塗層

> salt crust

> = 鹽結成的硬殼

Important distinction: **crust** — food vs geology

Food:

> bread crust

> = 麵包皮

Geology:

> Earth's crust

> = 地殼

Same underlying concept:

> **hard outer layer surrounding something**

This is the main semantic bridge.

Important distinction: **crusty** — bread vs person

Bread:

> crusty bread

> = 外皮香脆的麵包

Person:

> crusty old man

> = 脾氣有點暴躁 / 難親近的老人

Excellent MCQ contrast.

Important distinction: **golden crust** in your passage

The bakery is called:

> **Golden Crust**

The phrase naturally evokes:

> **freshly baked bread with an attractive crisp golden-brown outer layer**

So the brand name communicates:

- * freshness
- * baking
- * warmth
- * crisp texture
- * appetising colour

That is why **crust** is particularly semantically appropriate for a bakery name.

Family-extension sweep

After the full audit, the useful modern family includes:

- * **crust — bread** = 麵包外皮 / 脆皮
- * **crust — pie/tart** = 批皮 / 撻皮
- * **pizza crust** = 薄餅餅底 / 外邊
- * **crust — hardened layer** = 硬殼 / 結皮
- * **crust — dried soil/mud** = 硬結層
- * **crust — wound/skin** = 結痂硬層
- * **Earth's crust** = 地殼
- * **planetary crust** = 行星外殼
- * **crust — outer solid layer** = 硬外層
- * **crust — verb** = 結成硬殼 / 結皮
- * **crusty — bread** = 外皮香脆的
- * **crusty — hardened surface** = 乾硬 / 結皮的
- * **crusty — person** = 脾氣暴躁 / 難親近的
- * **encrust** = 使覆上一層硬殼
- * **encrusted** = 覆滿 / 鑲滿的
- * **upper crust** = 上流社會
- * **crust — figurative exterior** = 冷硬外表 / 外殼

Master comparison

Form / sense	MCQ-ready Traditional Chinese meaning
-----	-----
crust — bread	麵包烘焙後形成的較硬、通常香脆的外層
crust — pie/tart	包住或承托餡料的烘焙麵皮外殼
pizza crust	薄餅烤熟後的餅底 / 較厚外邊
crust — hardened layer	某物表面經乾燥、冷卻或沉積後形成的硬層
crust — wound	傷口或分泌物乾掉後形成的結痂硬層
Earth's crust	地球最外層的固體岩石層
planetary crust	行星 / 衛星最外層的固體層
crust — verb	在表面形成硬化、乾燥或凝固的層
crusty — bread	表面有香脆硬皮的
crusty — surface	表面乾硬、結塊或結皮的
crusty — person	態度粗硬、容易不耐煩、較難親近的
encrusted	表面密集覆蓋或鑲嵌著某物的
upper crust	社會中富有、地位最高的一群人

For your original passage

> “a neighbourhood bakery called **Golden Crust**”

The exact use is:

crust = 品牌名稱的一部分，讓人直接聯想到新鮮麵包烘焙後形成的金黃、香脆外皮。

Natural treatment:

> **「一間叫 Golden Crust 的社區麵包店」**

The name itself carries the image of:

> **「金黃香脆的麵包外皮」**

The highest-value contrasts are:

- > **bread crust** → 麵包外皮
- > **pie crust** → 批皮
- > **pizza crust** → 薄餅餅底 / 外邊
- > **salt crust** → 鹽結成的硬層
- > **Earth's crust** → 地殼
- > **crusty bread** → 外皮香脆的麵包
- > **crusty person** → 脾氣粗硬 / 難親近的人
- > **upper crust** → 上流社會
