- * train → driver
- * boat → captain / pilot / helmsman
- * aircraft → pilot

So ****driver**** is not the general word for every transport operator.

Important boundary.

AW. DRIVER VS OPERATOR

You have ****operator**** as a future target.

****driver****

= person controlling a vehicle.

****operator****

= person/company operating machinery, service, or business system.

- * subsidies
- * infrastructure

Example:

> “Charging convenience is a major driver of EV adoption.”

「充電便利性是電動車普及的一個主要**驅動因素**。」

This makes **driver** especially strong for your database.

CC. DRIVER VS OPERATOR — SOURCE-SPECIFIC

Your passage later says:

> “a taxi driver, a delivery van operator...”

That contrast is useful.

taxi driver

= person physically driving taxi

delivery van operator

can mean:

= person/business operating the van/service

So **operator** can be broader than **driver**.

The operator may:

- * own
- * manage
- * schedule
- * run the service

without always personally driving.

CD. DRIVER VS OWNER

driver

= operates vehicle.

owner

= legally owns vehicle.

One person can be both, but not necessarily.

A company may own a car while an employee drives it.

CE. DRIVER VS PASSENGER

driver

= controls vehicle.

passenger

= travels in vehicle without controlling it.

Core transport contrast.

CF. DRIVER VS PEDESTRIAN

driver

= road user operating vehicle.

pedestrian

= road user travelling on foot.

Common transport/legal distinction.

CG. DRIVER VS ROAD USER

road user

= broad category including:

- * drivers
- * cyclists
- * pedestrians
- * riders

A driver is one type of road user.

CH. DRIVER — PRONUNCIATION

****driver**** /'draɪvə(r)/

****drive**** /draɪv/

****driving**** /'draɪvɪŋ/

****driven**** /'drɪvən/

Important vowel shift:

> drive /draɪv/

> driven /'drɪvən/

Useful family pronunciation note.

CI. CORE SEMANTIC MAP

The family is built around one broad idea:

> ****cause something to move forward / make something operate / push something toward an outcome****

From this come several major branches:

Physical vehicle

> driver moves/controls car

Mechanical

> motor driver drives a motor

Computing

> software driver enables hardware operation

Business/causal

> cost drives demand

Motivation

> ambition drives a person

Golf

> driver sends ball a long distance

So although the senses look very different, most still preserve the concept:

> ****something/someone that causes motion, operation, or forward change****
