> “There is a strong fit between the strategy and the market.”

「這項策略與市場之間有很高的**契合度**。」

Practice 144

> “The proposal is a poor fit with our goals.”

「這項提議與我們的目標**並不相配**。」

This connects business “fit” and general suitability.

BV. FIT VS SUIT

74. **fit vs suit**

A classic learner distinction.

fit

= right size/shape.

suit

= looks good / appropriate for person/style.

Compare:

> “The jacket fits you.”

> = 尺寸合身。

> “The jacket suits you.”

> = 款式 / 顏色襯你。

A jacket can:

> fit you but not suit you.

BW. FIT VS MATCH

75. **fit vs match**

fit

= size, compatibility, suitability.

match

= correspond/go well together in appearance or characteristics.

> shoes fit your feet

> shoes match your bag

Different.

BX. FIT VS SUITABLE

fit for

= suitable enough for a specific use/condition.

suitable for

= appropriate generally.

> fit for purpose

> often more functional/formal.

> suitable for children

> broader appropriateness.

BY. FIT VS APPROPRIATE

fit

= suitable/capable, often functional.

appropriate

= suitable according to situation, rules, social context.

> equipment fit for use

> clothing appropriate for ceremony

BZ. FIT VS COMPATIBLE

fit

= broad match/suitability.

compatible

= capable of functioning/coexisting together without conflict.

> charger fits socket physically

> charger is compatible with vehicle electrically/system-wise

Important technical distinction.

CA. FIT VS INSTALL

76. **fit vs install**

fit

= attach/place a component in its proper position, especially BrE.

install

= broader technical setup/installation.

> fit a new battery

> install charging equipment

Often overlap.

****Install**** sounds more formal/technical and may include setup/configuration.

CB. FIT VS MOUNT

****fit****

= install/attach broadly.

****mount****

= fix something onto a support/surface.

> fit a sensor

> mount sensor on wall

Mount emphasizes physical attachment location.

CC. FIT VS ATTACH

****attach****

= connect/join one thing to another.

****fit****

= install it correctly into intended place.

A part may be attached but still fitted incorrectly.

CD. FIT VS ACCOMMODATE

77. ****fit into vs accommodate****

****fit into****

= be arranged within available space/time.

accommodate

= have enough space/capacity for.

> “Can we fit the meeting into today?”

> = 我們能否把會議排進今天？

> “The room can accommodate 100 people.”

> = 房間可容納 100 人。

CE. FIT VS SQUEEZE IN

fit something in

= arrange it within available time.

squeeze something in

= do so with difficulty because time is very limited.

So:

> squeeze in is stronger/more pressured.

CF. FIT VS MAKE TIME FOR

fit X into schedule

= arrange X within existing commitments.

make time for X

= deliberately reserve time for X.

Very close.

CG. FIT VS MATCH DATA

fit the data

= statistical/model correspondence.

match the data

= broadly agree with data.

In statistics:

> fit has a more technical meaning.

CH. FIT VS PREDICT — MODELING

fit a model

= estimate model parameters using observed data.

predict

= use model to estimate new/unknown outcomes.

A model can fit training data well but predict poorly.

Important statistical distinction.

CI. FIT VS OVERFIT

78. **overfit = 過度擬合**

A major family extension in machine learning/statistics.

Practice 145

> “The model **overfits** the training data.”

「模型對訓練數據出現**過度擬合**。」

Practice 146

> “An overfitted model may perform poorly on new data.”

「過度擬合的模型在新數據上可能表現很差。」

CJ. OVERFITTING

79. **overfitting = 過度擬合**

Practice 147

> “Regularization can reduce overfitting.”

「正則化可以減少**過度擬合**。」

Practice 148

> “Overfitting occurs when a model learns noise rather than general patterns.”

「當模型學到雜訊而非一般規律時，就可能出現**過度擬合**。」

CK. UNDERFIT

80. **underfit = 欠擬合**

Practice 149

> “The model underfits the data.”

「這個模型對數據**欠擬合**。」

Practice 150

> “An underfitted model is too simple to capture the pattern.”

「欠擬合模型過於簡單，無法捕捉數據規律。」

CL. UNDERFITTING

81. **underfitting = 欠擬合**

Practice 151

> “Underfitting can result from an overly simple model.”

「過於簡單的模型可能導致**欠擬合**。」

Practice 152

> “Both overfitting and underfitting reduce model quality.”

「過度擬合和欠擬合都會降低模型品質。」

CM. FIT — “SURVIVAL OF THE FITTEST”

82. **the fittest = 最適者；最能適應者**

A famous biological use.

Practice 153

> “The phrase ‘survival of the fittest’ refers to differential reproductive success.”

「『適者生存』涉及不同個體在繁殖成功率上的差異。」

Practice 154

> “In evolutionary biology, ‘fit’ does not simply mean physically strong.”

「在演化生物學中，**fit** 並不只是指身體強壯。」

Important distinction.

CN. FITNESS — EVOLUTIONARY BIOLOGY

83. **fitness = reproductive success / adaptation — 適合度；適應度**

Practice 155

> “Evolutionary fitness concerns reproductive success.”

「演化上的**適合度 / 適應度**涉及繁殖成功。」

Practice 156

> “A trait may increase fitness in one environment but not another.”

「某項特徵可能在一種環境中提高適合度，在另一環境中卻未必。」

This is genuinely distinct from:

> physical fitness.

CO. FIT — “FIT AND PROPER”

84. **fit and proper = 適當且符合資格要求的**

Formal/legal/regulatory.

Practice 157

> “Directors must satisfy fit-and-proper requirements.”

「董事必須符合**適當人選 / 合資格人士**要求。」

Practice 158

> “The regulator assessed whether the applicant was fit and proper.”

「監管機構評估申請人是否**適合並符合資格要求**。」

This is an important institutional phrase.

CP. FIT NOTE

85. **fit note = 工作能力證明 / 醫療適工證明**

BrE employment/medical term.

A fit note is a medical statement about:

> whether someone may be fit for work / not fit for work.

Practice 159

> “The employee submitted a fit note.”

「員工提交了**工作能力醫療證明**。」

Practice 160

> “The note stated that she was not fit for work.”

「證明指出她**不適合工作**。」

Regional and lower priority.

CQ. FIT — ARCHAIC PAST FORM ISSUE

Past tense varies:

General modern English

> **fit** is very common in AmE:

> “The dress fit perfectly.”

BrE

> **fitted** is often preferred:

> “The dress fitted perfectly.”

But for installation:

> “They fitted a new battery.”

is especially natural BrE.

So both forms exist, with dialect/construction differences.

CR. FITTED VS FIT — SOURCE REGISTER

For your passage’s Hong Kong/BrE-influenced English:

> **fitted with**

> is especially natural:

> “The building was fitted with charging equipment.”

For simple size:

> “The jacket fits.”

CS. FITTED SHEET

86. **fitted sheet = 床笠；有橡筋包角床單**

Lexicalized compound.

Practice 161

> “The bed uses a fitted sheet.”

「這張床使用**床笠 / 包角床單**。」

Practice 162

> “A fitted sheet stays around the mattress.”

「床笠可以固定包住床褥。」

Useful but lower priority.

CT. FITTED KITCHEN

87. **fitted kitchen = 配有固定嵌入式設備的廚房**

Especially BrE.

Practice 163

> “The flat has a modern fitted kitchen.”

「單位設有現代化**嵌入式廚房設備**。」

Practice 164

> “The cupboards and appliances are built into the kitchen.”

「櫥櫃和電器都固定嵌入廚房。」

CU. FITTED FURNITURE

88. **fitted furniture = 度身訂造 / 固定嵌入式傢俬**

Practice 165

> “The bedroom has fitted wardrobes.”

「睡房設有**入牆衣櫃 / 固定嵌入式衣櫃**。」

Practice 166

> “Fitted furniture is made to match the available space.”

「嵌入式傢俬會按現有空間**度身設計**。」

CV. FIT — SOURCE-SPECIFIC TIME SENSE

Your source:

> “whether drivers can **fit charging into crowded lives**”

This is conceptually:

> **schedule accommodation**

not:

- * clothing size
- * physical installation
- * health
- * suitability

The author is saying charging has to compete with:

- * work
- * school runs
- * deliveries
- * taxi shifts
- * household responsibilities

So **fit** carries the idea:

> **make charging coexist with all the other demands already occupying the driver’s day.**

CW. "CROWDED LIVES"

The phrase:

> ****crowded lives****

is metaphorical.

It means:

> lives already full of commitments and limited available time.

Therefore:

> fit charging into crowded lives

literally maps:

> activity → object

> schedule → limited container

This is the same conceptual metaphor as:

> "fit the suitcase into the boot."

Physical:

> object into limited space

Abstract:

> activity into limited time

That connection explains the polysemy beautifully.

CX. CORE SEMANTIC MAP

The deepest common concept is:

> ****match available space, requirements, or limits****

From this:

physical size

> shoes fit feet

spatial capacity

> suitcase fits boot

time

> fit meeting into schedule

installation

> fit new battery

suitability

> fit for purpose

compatibility

> good fit for team

evidence

> facts fit theory

statistics

> model fits data

health

> physically fit

Then the noun **fit** = sudden episode is largely a separate historical branch:

> coughing fit

> fit of anger

> seizure fit

So **fit** has both:

1. a very coherent match/suitability network

2. a distinct “sudden episode” noun network.

CY. PRONUNCIATION

****fit**** /fɪt/

****fitted**** /'fɪtɪd/

****fitting**** /'fɪtɪŋ/

****fitness**** /'fɪtnəs/

****fit**** noun/adjective/verb all normally same pronunciation.

No stress shift in the basic family.

CZ. FAMILY-EXTENSION SWEEP

Useful modern inventory includes:

- * ****fit — right size**** = 合身 / 合腳
- * ****fit into a space**** = 放得進 / 容得下
- * ****fit through**** = 穿得過
- * ****fit something — install**** = 安裝
- * ****be fitted with**** = 配備有 / 安裝有
- * ****fit something into a schedule**** = 把某事排進日程
- * ****fit something in**** = 抽空安排
- * ****fit for + purpose/use**** = 適合某用途
- * ****fit for purpose**** = 符合用途要求
- * ****fit — healthy**** = 健康 / 體能良好
- * ****keep fit**** = 保持健康
- * ****get fit**** = 提升體能
- * ****fit to drive/work**** = 身體 / 精神狀況適合駕駛 / 工作
- * ****fitness — physical**** = 體能
- * ****fitness for purpose**** = 適用性
- * ****fit the facts/evidence**** = 符合事實 / 證據
- * ****fit the description**** = 符合描述
- * ****fit the bill**** = 符合要求
- * ****fit with**** = 與.....相配 / 一致
- * ****fitting — trial/measurement**** = 試身
- * ****fitting — component**** = 配件 / 接頭
- * ****fitting — appropriate**** = 恰當的
- * ****fit — sudden episode**** = 一陣突然發作
- * ****coughing fit**** = 一陣劇烈咳嗽
- * ****fit of laughter**** = 一陣大笑
- * ****fit of anger**** = 一時盛怒

* **epileptic fit** = 癲癇發作
 * **fit — statistics** = 擬合程度
 * **fit a model** = 擬合模型
 * **best fit** = 最佳擬合
 * **goodness of fit** = 擬合優度
 * **overfit / overfitting** = 過度擬合
 * **underfit / underfitting** = 欠擬合
 * **fit — engineering** = 機械配合
 * **tight fit** = 緊配合 / 很貼合
 * **interference fit** = 過盈配合
 * **clearance fit** = 間隙配合
 * **a good fit for** = 很適合 / 契合
 * **culture fit** = 文化契合度
 * **product-market fit** = 產品市場契合度
 * **fitness — evolution** = 演化適合度
 * **fit and proper** = 適當並符合資格要求
 * **fitted sheet** = 床笠
 * **fitted kitchen/furniture** = 固定嵌入式廚房 / 傢俬

Master comparison

Form / sense	MCQ-ready Traditional Chinese meaning
-----	-----
fit — size	某物的大小 / 形狀適合某人或另一物件
fit into a space	某物可以在有限空間內被容納
fit into a schedule	在有限時間內安排加入某項活動
fit — install	把設備 / 零件安裝到正確位置
be fitted with	某物已安裝 / 配備指定設備
fit for purpose	能有效滿足預定用途或功能要求
fit — healthy	身體健康且具足夠體能
fit to drive/work	身體 / 精神狀況足以安全履行某活動
fit the facts/evidence	與已有事實 / 證據吻合
a good fit for	與某職位、團隊、用途或需要高度契合
fit — clothing noun	衣物穿在身上的合身 / 版型程度
fitting — component	用來連接、固定或安裝設備的小型零件
fitting — appropriate	與場合 / 情境非常相稱而恰當的
fit — sudden episode	突然發生、通常難以控制的一陣生理或情緒發作
fit — statistics	模型與實際數據之間的吻合 / 擬合程度
fit a model	用觀察數據估計模型參數，使模型與數據擬合
fit — engineering	兩個機械零件在尺寸 / 公差上的配合關係
product-market fit	產品真正滿足市場需求的契合程度
fitness — evolution	個體在特定環境中留下後代的相對成功程度

For your original sentence

> “whether drivers can **fit charging into crowded lives**.”

The exact sense is:

fit = 在已經被工作、家庭、接送、送貨等活動佔滿的日常時間裡，再安排出足夠時間進行充電。

Natural translation:

> **「問題不只是電動車能否行得夠遠，而是駕駛者能否在繁忙的日常生活中騰出時間安排充電。」**

The highest-value contrasts are:

- > **shoes fit** → 鞋子合腳
- > **box fits in cupboard** → 箱子放得進櫃子
- > **fit charging into schedule** → 把充電排進日程
- > **fit a new battery** → 安裝新電池
- > **be fitted with sensors** → 配備感應器
- > **fit for purpose** → 適合用途
- > **physically fit** → 體能良好
- > **fit the facts** → 符合事實
- > **a good fit for the team** → 與團隊契合
- > **fit of laughter** → 一陣大笑
- > **epileptic fit** → 癲癇發作
- > **model fit** → 模型擬合程度
- > **fit a model** → 擬合模型
- > **product-market fit** → 產品市場契合度
- > **fit ≠ suit** → 尺寸 / 功能適合 ≠ 款式 / 風格襯人
- > **fit ≠ match** → 適配 / 容納 ≠ 外觀或特徵相配
- > **fit ≠ install** → 可作「安裝」，但 install 更廣、更技術化
- > **fit into schedule ≠ squeeze in** → 安排進日程 ≠ 很勉強地硬擠進時間表
