

Word family: objective / object / objected / objecting / objection / objectionable / unobjectionable / objectively / objectivity / objectify / objectification / object-oriented

Base family: object / objective

Parts of speech: noun, verb, adjective, adverb

This is an especially rich family because **object** has several genuinely different modern branches, and even its pronunciation changes with part of speech:

- **object** (*noun*) — thing; target; grammatical object; purpose
- **object** (*verb*) — oppose; express disagreement
- **objective** (*noun*) — goal; target
- **objective** (*adj.*) — impartial; factual rather than influenced by personal feelings
- **objectively** (*adv.*) — impartially; based on facts
- **objectivity** (*n.*) — impartiality
- **objection** (*n.*) — opposition; reason for opposing
- **objectionable** (*adj.*) — offensive; unacceptable
- **unobjectionable** (*adj.*) — not giving reasonable cause for objection
- **objectify** (*v.*) — treat a person as an object rather than a full human being; represent abstractly as an object
- **objectification** (*n.*) — treatment/representation as an object
- **object-oriented** (*adj.*) — relating to object-oriented computing/programming

A particularly important learner point:

OBject (*noun*) → stress first syllable

obJECT (*verb*) → stress second syllable

Meaning in this passage

Teams should begin with a shared **objective**, a realistic timeline and agreed channels for updates.

Here, **objective** is a **noun** meaning:

a specific goal or result that a person or group intends to achieve — 目標；目的

The writer says a team should first agree on **what everyone is trying to accomplish**.

中文翻譯：

團隊應首先確立一個共同的目標、一個切合實際的時間表，以及大家同意使用的更新渠道。

So here:

shared objective = 團隊所有成員共同希望達成的明確結果

A. OBJECTIVE = GOAL / INTENDED RESULT

1. objective = goal or intended result — 目標；目的

This is the exact sense in your passage.

Practice 1

The proposal was fairly **unobjectionable**.

這項方案大致沒有甚麼值得反對的地方。

Practice 2

The wording is bland but unobjectionable.

措辭雖然平淡，但沒有甚麼問題／不令人反感。

MCQ-ready definition:

unobjectionable = 沒有明顯理由令人反對、冒犯或拒絕的

This word is valid but much less common than **acceptable**.

Q. OBJECTIFY

92. objectify someone = treat a person like an object — 物化某人

A major modern family extension.

Practice 1

Advertising should not **objectify people**.

廣告不應物化他人。

Practice 2

She criticised the way the media objectified women.

她批評媒體物化女性的方式。

MCQ-ready definition:

objectify someone = 把一個人主要當作供觀看、使用或評價的「物件」, 忽視其完整人格、感受或主體性

93. sexual objectification — 性物化

Practice 1

The study examines **sexual objectification** in advertising.

研究探討廣告中的性物化。

Practice 2

Sexual objectification reduces a person to their sexual appearance or usefulness.

性物化把一個人簡化為其性外表或供他人享用的價值。

94. objectification = treatment as an object — 物化

Practice 1

The article discusses the **objectification of workers**.

文章討論把員工工具化／物化的問題。

Practice 2

Objectification can involve ignoring a person's autonomy.

物化可能包括忽視一個人的自主性。

95. objectify an abstract idea — 把抽象概念具體化／客體化

A more academic sense.

Practice 1

The model **objectifies abstract relationships** by representing them as entities.

模型把抽象關係轉化為可處理的對象。

Practice 2

Philosophical writing sometimes uses “objectify” in a broader sense of treating something as an object of thought.

哲學寫作有時把 **objectify** 用於表示把某事作為思考客體來看待。

This is more specialist than the social “物化人” sense.

R. OBJECT IN COMPUTING

96. object = data/programming entity — 物件；對象

A major computing sense.

Practice 1

The program creates a new **object**.

程式建立一個新的物件。

Practice 2

Each object contains data and associated behaviour.

每個物件都包含資料及相關行為。

MCQ-ready definition:

object = 電腦程式中代表某個實體、資料和相關操作的結構

97. object-oriented programming / OOP — 物件導向程式設計

Practice 1

Java supports **object-oriented programming**.

Java 支援物件導向程式設計。

Practice 2

Object-oriented programming organises software around objects.

物件導向程式設計以物件為核心組織軟件。

98. object-oriented — 物件導向的

Practice 1

Python supports **object-oriented design**.

Python 支援物件導向設計。

Practice 2

The course introduces object-oriented concepts.

課程介紹物件導向概念。

99. object code — 目的碼; 物件碼

Practice 1

The compiler converts source code into **object code**.

編譯器把源碼轉換成目的碼／物件碼。

Practice 2

Object code is closer to machine-executable form than source code.

目的碼比源碼更接近機器可執行形式。

100. object file — 目的檔; 物件檔

Practice 1

The compiler generated several **object files**.

編譯器產生了數個目的檔。

Practice 2

The linker combines object files.

連結器會把多個目的檔案結合起來。

101. object model — 物件模型

Practice 1

The software uses a simple **object model**.

軟件使用一個簡單的物件模型。

Practice 2

The object model defines relationships between software objects.

物件模型界定軟件物件之間的關係。

S. OBJECT IN PHILOSOPHY / PSYCHOLOGY

102. object = thing perceived or thought about — 客體; 對象

Practice 1

Philosophy distinguishes between the **subject** and the **object**.

哲學區分主體和客體。

Practice 2

The object is that which is perceived or considered by the subject.

客體是被主體感知或思考的對象。

MCQ-ready definition:

object = 相對於感知、思考或行動的主體而言，被感知、思考或作用的對象

103. subject–object distinction — 主體與客 體之分

Practice 1

The philosopher questioned the traditional **subject–object distinction**.

哲學家質疑傳統的主客體區分。

Practice 2

Subject and object are central concepts in several philosophical traditions.

主體和客體是多種哲學傳統中的重要概念。

104. object permanence — 物體恆存概念

A major developmental-psychology term.

Practice 1

Babies gradually develop **object permanence**.

嬰兒逐漸發展出物體恆存概念。

Practice 2

Object permanence is the understanding that objects continue to exist even when they cannot be seen.

物體恆存是理解物件即使看不見仍然存在的能力。

105. object relations — 客體關係

A specialist psychology/psychoanalytic term.

Practice 1

Object relations theory examines internalised relationships with significant others.

客體關係理論研究人如何內化與重要他人的關係。

Practice 2

This is a specialist psychological use of “object.”

這是 **object** 在心理學中的專門用法。

T. OBJECT IN ASTRONOMY / SCIENCE

106. celestial / astronomical object — 天體

Practice 1

The telescope detected a distant **astronomical object**.

望遠鏡偵測到一個遙遠的天體。

Practice 2

Stars and planets are celestial objects.

恆星和行星都是天體。

107. moving object / test object — 移動物體／測試物件

Practice 1

The camera can track a **moving object**.

相機可以追蹤移動物體。

Practice 2

Researchers measured the temperature of the test object.

研究人員量度測試物體的溫度。

U. OBJECTIVE IN OPTICS

108. objective = objective lens — 物鏡

A major scientific noun sense.

Practice 1

Rotate the microscope to select a different **objective**.

轉動顯微鏡以選擇不同的物鏡。

Practice 2

The high-power objective provides greater magnification.

高倍物鏡提供更大的放大倍率。

MCQ-ready definition:

objective = 顯微鏡、望遠鏡或其他光學儀器中靠近被觀察物體的主要鏡頭／鏡組

109. objective lens — 物鏡

Practice 1

Clean the **objective lens** carefully.

小心清潔物鏡。

Practice 2

Different objective lenses provide different magnifications.

不同物鏡提供不同放大倍率。

110. low-power / high-power objective — 低倍／高倍物鏡

Practice 1

Start with the **low-power objective**.

先使用低倍物鏡。

Practice 2

Switch to the high-power objective for more detail.

如要觀察更多細節，切換至高倍物鏡。

V. OBJECTIVE IN MILITARY / OPERATIONAL LANGUAGE

111. objective = target/location to be captured or achieved — 軍事目標；作戰目標

Practice 1

The bridge was the unit's main **objective**.

那座橋是部隊的主要作戰目標。

Practice 2

The troops reached their objective before dawn.

部隊在黎明前抵達／完成了作戰目標。

MCQ-ready definition:

objective = 軍事行動中需要佔領、控制、到達或完成的特定目標

112. military objective — 軍事目標

Practice 1

The operation had a clearly defined **military objective**.

這次行動有一個清楚界定的軍事目標。

Practice 2

Operational objectives should support the wider strategy.

作戰目標應配合整體策略。

W. OBJECTIVE CASE IN GRAMMAR

113. objective case — 賓格

A traditional grammatical term.

Practice 1

“Him” is traditionally described as an **objective-case pronoun**.

him 傳統上被描述為賓格代名詞。

Practice 2

Modern grammar often uses more specific terms such as object form.

現代文法也常使用 **object form** (賓語形式) 等較具體稱呼。

X. OBJECTIVE TEST / STANDARD IN FORMAL REASONING

114. objective standard — 客觀標準

Practice 1

The conduct is judged against an **objective standard**.

該行為按照一項客觀標準判斷。

Practice 2

An objective standard does not depend solely on what one individual personally believed.

客觀標準並非只取決於某一個人的個人想法。

115. objectively reasonable — 客觀上合理的

Common in formal/legal reasoning.

Practice 1

The question is whether the response was **objectively reasonable**.

問題在於該回應是否客觀上合理。

Practice 2

A person's belief may be sincere without being objectively reasonable.

一個人的信念可以是真誠的，但未必客觀合理。

Important distinction 1: objective vs aim

From your previous word.

aim

often broad desired purpose.

objective

often more concrete, defined and action-oriented.

Aim: improve teamwork.

Objective: reduce duplicated work by introducing weekly task reviews.

But everyday English frequently uses them interchangeably.

Important distinction 2: objective vs goal

goal

very broad, common and natural.

objective

often more formal/business/academic and commonly implies a clearly defined desired result.

personal goal

個人目標

project objective

項目目標

Important distinction 3: objective vs target

objective

desired result.

target

often a measurable level or number.

objective: improve customer satisfaction

target: achieve a satisfaction score of 90%

Not every objective has a numerical target.

Important distinction 4: objective vs purpose

purpose

why something exists/is done.

objective

what specific result it intends to achieve.

They overlap, but:

purpose = why?

objective = what result?

Important distinction 5: objective vs priority

Exactly relevant to your teamwork passage.

objective

what result you want.

priority

what currently deserves greatest importance.

A compliance team's objective might be a successful compliant launch, while its immediate priority is caution.

Important distinction 6: objective vs strategy

objective

destination.

strategy

overall plan for reaching it.

objective = reduce errors

strategy = clearer roles + progress checks

Important distinction 7: objective vs outcome

objective

intended result **before** action.

outcome

actual result **after** action.

A project can fail to achieve its objective because the outcome differs from what was intended.

Important distinction 8: objective noun vs adjective

A crucial polysemy split.

Noun:

Our **objective** is growth.

我們的目標是增長。

Adjective:

We need an **objective** assessment.

我們需要客觀的評估。

Same spelling, completely different meanings.

Important distinction 9: objective vs objective fact

In:

project objective

objective is a **noun** = **goal**.

In:

objective fact

objective is an **adjective** = **independent of personal opinion**.

Do not translate both as 「目標」.

Important distinction 10: objective vs impartial

impartial

does not favour one side.

objective

bases judgment on facts rather than personal feelings.

A judge should ideally be both:

- impartial between the parties,
 - objective in evaluating evidence.
-

Important distinction 11: objective vs neutral

neutral

does not take sides.

objective

judges according to facts/evidence.

Someone may take a position after objective analysis and therefore no longer be neutral.

So:

objective ≠ always neutral.

Important distinction 12: objective vs unbiased

unbiased

free from unfair bias.

objective

broader emphasis on evidence and independence from personal feelings.

They overlap strongly but are not identical.

Important distinction 13: objective vs factual

factual

concerned with facts.

objective

evaluated without undue personal influence.

factual information

事實資料

objective assessment

客觀評估

Important distinction 14: objective vs fair

fair

just and equitable.

objective

fact-based and impartial.

An evaluation can use objective measures yet still be unfair if the measures themselves disadvantage certain cases.

Important distinction 15: objectivity does not mean “having no judgment”

Objectivity means trying to ground judgment in:

- evidence,
- consistent standards,
- independently checkable information.

It does not mean refusing to reach conclusions.

Important distinction 16: objectivity vs accuracy

objectivity

absence/minimisation of personal bias.

accuracy

correctness.

An unbiased assessment can still be inaccurate because the information is poor.

Important distinction 17: object vs thing

thing

very broad everyday word.

object

usually more formal/precise and often refers to a distinct physical item.

What's that thing?

那是甚麼東西？

Remove all sharp objects.

移走所有尖銳物件。

Important distinction 18: object vs item

item

one unit in a list, collection, sale, etc.

object

physical thing, often independent of such grouping.

A chair is an object; it becomes an item when considered as part of:

- inventory,
- shopping list,
- catalogue.

Important distinction 19: object vs subject in grammar

subject

typically the grammatical element associated with the clause's main participant/topic.

object

typically complements the verb and often receives/is affected by the action.

The manager praised **the employee**.

- manager = subject
 - employee = object
-

Important distinction 20: object vs subject in philosophy

subject

the perceiver/thinker.

object

what is perceived/thought about.

This is broader than the grammar distinction.

Important distinction 21: object = purpose vs objective

Compare:

the **object** of the exercise
the purpose

the **objective** of the exercise
the goal

Both are possible, but **object = purpose** sounds more formal/traditional.

Objective is much more common in modern workplace planning.

Important distinction 22: object noun vs object verb pronunciation

Very important.

Noun:

OBject = 物件／對象／賓語

Verb:

ob**JECT** = 反對

English uses stress to distinguish the two.

Similar patterns occur in words such as:

- record,
- present,
- permit,
- protest,

though not all behave identically.

Important distinction 23: object to vs disagree with

disagree with

have a different opinion.

object to

actively oppose or find something unacceptable.

I disagree with the proposal.
我不同意。

I object to the proposal.
我反對。

Object is stronger.

Important distinction 24: object to vs oppose

oppose

broadly resist/support the opposite side.

object to

express a specific objection.

oppose the policy
反對政策

object to one clause in the policy
對政策其中一條提出異議

Important distinction 25: object to vs protest

object

state opposition.

protest

often stronger and may involve:

- public action,
- demonstration,
- formal complaint.

You can quietly object in a meeting without protesting publicly.

Important distinction 26: object to + -ing

Because **to** is a preposition:

object to **changing** the deadline ✓

object to **working** late ✓

Not:

object to change the deadline ✗

A very useful grammar test.

Important distinction 27: objection vs objectionable

objection

the opposition/reason.

objectionable

something that gives people reason to object because it is offensive/unacceptable.

raise an objection

提出異議

objectionable behaviour

令人反感的行為

Important distinction 28: objectionable vs controversial

controversial

causes significant disagreement.

objectionable

personally/socially offensive or unacceptable.

A controversial idea is not necessarily objectionable.

Important distinction 29: objectionable vs offensive

They overlap.

offensive

causes insult, hurt, disgust.

objectionable

broader: deserving objection because it is:

- offensive,
 - improper,
 - unacceptable.
-

Important distinction 30: unobjectionable vs acceptable

acceptable

positively meets minimum requirements.

unobjectionable

more weakly:

there is no particular reason to object.

So:

unobjectionable

can sometimes sound like faint praise.

Important distinction 31: objection vs concern

concern

worry.

objection

actual reason for opposition.

I have concerns about the cost.
我擔心成本。

I object to the plan because of the cost.
我因成本問題反對方案。

Concern does not necessarily mean opposition.

Important distinction 32: objection vs complaint

objection

reason for opposing a proposal/action.

complaint

expression that something is unsatisfactory or wrong.

objection to a proposal
對方案的反對

complaint about poor service
對服務欠佳的投訴

Important distinction 33: court objection

In court:

“Objection!”

is not simply:

“I personally disagree.”

It is a procedural/legal claim that something about:

- a question,
- evidence,
- testimony,
- procedure

is improper under applicable rules.

Important distinction 34: sustained vs overruled

Courtroom pair:

objection sustained

judge accepts the objection.

objection overruled

judge rejects the objection.

Extremely useful fixed contrast.

Important distinction 35: objectify vs object

object

noun: a thing.

objectify

verb: treat or conceptualise something/someone as an object.

When used about people, **objectify** is normally negative.

Important distinction 36: objectification vs exploitation

From your earlier word:

objectification

treat a person as an object, ignoring their personhood/autonomy.

exploitation

unfairly use someone for benefit.

They can occur together, but they are different concepts.

Important distinction 37: object-oriented

This is a lexicalized computing term.

It does not simply mean:

“oriented toward physical objects.”

In programming:

object-oriented = software organized around objects containing data and behaviour

Important distinction 38: object code vs source code

source code

human-readable programming code.

object code

compiled lower-level code produced from source code before/further toward execution.

Do not confuse **object** here with the OOP sense of an object instance.

Important distinction 39: objective lens

This has nothing to do with:

- goals,
- impartiality.

It is an optical term:

objective = 物鏡

So the family contains at least three major **objective** noun/adjective branches:

1. **goal**
2. **impartial**
3. **optical lens**

plus the military goal extension.

Important distinction 40: objective goal vs military objective

They share the broad idea of:

something toward which action is directed

But a military **objective** is usually:

- a location,
 - target,
 - operational result.
-

Important distinction 41: object of affection vs objective

object of affection

does **not** mean:

affection's goal in a planning sense.

Here **object** means:

the person toward whom the feeling is directed.

Important distinction 42: object of a verb vs object of attention

These reflect the same broader directional idea:

something toward which an action/attention is directed.

But one is a **technical grammar term** and the other is ordinary semantic English.

Important distinction 43: object permanence

This does not mean:

an object that is permanent.

It is a fixed psychology term meaning:

understanding that an object continues to exist even when it is out of sight.

Important distinction 44: objective in your passage

Your original sentence is:

Teams should begin with a shared **objective**, a realistic timeline and agreed channels for updates.

Here, **objective** is purely:

noun = agreed goal

It does **not** mean:

- impartial,
- physical object,
- objection,
- grammatical object,
- lens.

The writer's logic is:

shared objective

→ everyone knows **what** the team is trying to achieve

realistic timeline

→ everyone knows **when**

agreed channels

→ everyone knows **how information will be communicated**

That structure reduces confusion.

Family-extension note

The **object / objective** family has a particularly broad modern semantic network:

1. goal

- objective
- project objective
- shared objective

2. impartiality

- objective assessment
- objectively
- objectivity

3. physical thing

- object
- foreign object

4. target/recipient of action or feeling

- object of attention
- object of criticism
- object of affection

5. purpose

- object of the exercise

6. grammar

- direct object
- indirect object
- object pronoun
- objective case

7. opposition

- object to
- objection
- raise an objection

8. legal procedure

- courtroom objection
- sustain/overrule an objection

9. moral/social unacceptability

- objectionable
- unobjectionable

10. objectification

- objectify a person
- objectification

11. computing

- object
- object-oriented
- object code
- object file

12. philosophy

- subject and object

13. psychology

- object permanence
- object relations

14. optics

- objective lens

15. military/operational goal

- military objective

For your passage, the exact branch is:

objective = a clearly defined result that the whole team agrees to work towards

Master comparison

Form / expression	Traditional Chinese	Core idea
objective (noun)	目標; 目的	intended result
shared objective	共同目標	team goal
main objective	主要目標	central goal

primary objective	首要目標	highest-priority goal
overall objective	整體目標	broad goal
specific objective	具體目標	defined goal
strategic objective	策略目標	strategy
learning objective	學習目標	education
research objective	研究目標	research
set an objective	設定目標	define goal
achieve/meet an objective	達成目標	success
pursue an objective	追求目標	work toward
objective (adj.)	客觀的	fact-based
objective assessment	客觀評估	impartial evaluation
objective judgment	客觀判斷	evidence-based judgment
objective analysis	客觀分析	impartial analysis
objective evidence	客觀證據	independently verifiable
objective criteria	客觀標準	consistent criteria
objectively	客觀地	without personal bias
objectively speaking	客觀而言	factual viewpoint
objectivity	客觀性	impartiality
maintain objectivity	保持客觀	avoid bias
object (thing)	物件; 物體	physical entity
foreign object	異物	unwanted physical thing
object of attention	注意對象	target of attention

object of criticism	批評對象	target of criticism
object of ridicule	嘲笑對象	target of ridicule
object of suspicion	懷疑對象	target of suspicion
object of desire	渴望對象	desired thing/person
object of affection	愛慕對象	emotional target
object (purpose)	目的	formal purpose
object of the exercise	活動真正目的	intended point
object (grammar)	賓語／受詞	grammatical complement
direct object	直接賓語	grammar
indirect object	間接賓語	grammar
object pronoun	賓格代名詞	grammar
object complement	賓語補語	grammar
object of a preposition	介詞賓語	grammar
object (verb)	反對；提出異議	oppose
object to X	反對 X	opposition
object to doing X	反對做 X	grammar pattern
objection	反對；異議	opposition noun
raise an objection	提出異議	express opposition
have no objection	沒有異議	accept
main objection	主要反對理由	reason
Objection!	反對！	courtroom
sustain an objection	接納異議	court

overrule an objection	駁回異議	court
conscientious objection	良心拒絕	moral/legal
conscientious objector	良心拒服者	person
objectionable	令人反感／不可接受的	invites objection
unobjectionable	無可反對的	not offensive
objectify	物化	treat as object
objectification	物化	process
object (computing)	物件	software entity
object-oriented	物件導向的	programming
object-oriented programming	物件導向程式設計	OOP
object code	目的碼／物件碼	compiled code
object file	目的檔	compiled file
object (philosophy)	客體	thing perceived
subject–object distinction	主客體區分	philosophy
object permanence	物體恆存	psychology
object relations	客體關係	psychology
objective (optics)	物鏡	lens
objective lens	物鏡	optics
military objective	軍事／作戰目標	operational target
objective case	賓格	traditional grammar

For your original sentence

Teams should begin with a shared **objective**, a realistic timeline and agreed channels for updates.

Here:

shared objective = 在團隊開始分工前, 所有成員都清楚同意並共同追求的一個具體成果

A natural Traditional Chinese rendering is:

團隊應首先確立一個共同目標、一個切合實際的時間表, 以及大家同意使用的更新渠道。

For this passage, the most important distinction is:

aim = 想達成的方向／目標, 通常較廣
objective = 較清晰、具體、正式界定的目標
priority = 甚麼最重要、最優先
strategy = 用甚麼整體方法達成目標
target = 常是更具體、可量度的數字或水平
outcome = 最後實際發生的結果

And within the wider family:

objective = 目標 or 客觀的
object = 物件／對象／賓語 or, as a verb, 反對
objection = 反對／異議／反對理由
objectively = 客觀地
objectivity = 客觀性
objectionable = 令人反感、值得反對的
objectify = 物化

So this is a particularly useful family because what looks like one spelling family actually contains several major conceptual branches: **thing** → **target** → **purpose/goal** → **opposition** → **impartiality** → **grammatical/computing “object.”**
