

Word family: **output / outputs / outputting**

Base word: output

Part of speech: mainly **noun**, also **verb**

Related forms:

output (n.) — 產出；成果；產量；輸出；輸出功率

output (v.) — 輸出；產生；輸出資料

outputs (plural n.) — 各項產出；成果

outputting (gerund/participle) — 正在輸出

Past tense/participle: **output** is very common; **outputted** also occurs, especially in technical usage.

Useful expressions / extensions:

measurable output

work output

employee output

productive output

total output

economic output

industrial output

manufacturing output

agricultural output

creative output

research output

learning output

data output

output device

output signal

audio output

power output

cardiac output

urine output

input and output

output gap

output data

output to a file

Meaning in this passage

> Each member should have a defined role, a deadline and a measurable **output**.

Here, **output** means:

a concrete piece or amount of work that a person is expected to produce — 可量度的產出；具體成果

The writer argues that teamwork becomes fairer when each person's contribution can be seen and measured—for example, a report section, research findings, slides, or another clearly defined deliverable.

中文翻譯：

每名成員都應該有清晰的角色、截止日期，以及一項可以量度的**工作產出 / 具體成果**。

So here:

measurable output = 可以清楚看到、計算或評估的工作成果

1. **output (工作產出；成果) — 產出；工作成果**

This is the exact sense used in your passage.

Practice 1 — original sentence

> Each member should have a measurable **output**.

每名成員都應該有一項可以量度的**工作產出**。

Practice 2

> Managers should evaluate both effort and **output**.

管理人員應同時評估努力程度和**實際產出**。

Practice 3

> His **output** was much lower than the rest of the team's.

他的**工作產出**比其他組員低得多。

MCQ-ready definition:

output = 一個人、團隊或系統實際產生的工作成果或可量度結果

2. **measurable output — 可量度的產出**

This is the exact collocation in your passage.

Practice 1

> Every role should lead to a **measurable output**.

每個角色都應該產生一項**可量度的成果**。

Practice 2

> A written report is easier to assess as a **measurable output**.

書面報告較容易作為一項**可量度的產出**來評估。

****MCQ-ready definition:****

****measurable output = 可以透過數量、完成程度、質素或其他明確標準評估的成果****

3. **work output — 工作產出**

Practice 1

> Better organisation increased my **work output**.

更好的組織安排提升了我的**工作產出**。

Practice 2

> Stress can reduce **work output**.

壓力可能降低**工作產量 / 工作成果**。

****MCQ-ready definition:****

****work output = 某人在一段時間內實際完成或產生的工作量與成果****

4. **employee output — 員工產出**

Practice 1

> The company measures **employee output** carefully.

公司會仔細量度**員工產出**。

Practice 2

> Higher employee output does not always mean better quality.

較高的**員工產出**不一定代表較高質素。

MCQ-ready definition:

employee output = 員工所完成工作的數量或成果

5. **productive output — 有用 / 有效的產出**

Practice 1

> Too many meetings can reduce **productive output**.

太多會議可能減少**真正有用的工作產出**。

Practice 2

> The team spent more time talking than producing useful **output**.

團隊花太多時間討論，而真正有用的**成果**反而不多。

MCQ-ready definition:

productive output = 真正有助完成目標、具有實際價值的工作成果

6. **output (產量) — 產量 ; 生產量**

A major economic/manufacturing sense.

Practice 1

> Factory **output** increased by ten percent.

工廠**產量**增加了百分之十。

Practice 2

> The company reduced **output** because demand had fallen.

公司因需求下降而減少**產量**。

****MCQ-ready definition:****

****output = 工廠、產業或經濟體在一定時間內生產出的商品或服務數量****

7. ****industrial / manufacturing output — 工業 / 製造業產量****

Practice 1

> Manufacturing ****output**** rose last month.

上月製造業****產量****上升。

Practice 2

> The report showed a decline in industrial ****output****.

報告顯示工業****產出****有所下降。

****MCQ-ready definition:****

****industrial/manufacturing output = 工業或製造業實際生產出的總量****

8. ****agricultural output — 農業產量****

Practice 1

> Better irrigation increased agricultural ****output****.

更好的灌溉提高了農業****產量****。

Practice 2

> Poor weather reduced the country's food ****output****.

惡劣天氣降低了該國的糧食****產量****。

****MCQ-ready definition:****

****agricultural output = 農業活動生產出的農作物、食物等總量****

9. ****economic output — 經濟產出****

A major economics sense.

Practice 1

> The recession reduced economic **output**.

經濟衰退令整體**經濟產出**下降。

Practice 2

> Economic **output** grew faster than expected.

經濟產出的增長比預期快。

MCQ-ready definition:

economic output = 一個經濟體在某段時間內生產的商品和服務總量

10. **total output — 總產出；總產量**

Practice 1

> Total **output** increased despite fewer workers.

即使員工人數減少，**總產出**仍然上升。

Practice 2

> The factory doubled its total **output**.

工廠把**總產量**提高了一倍。

MCQ-ready definition:

total output = 某個人、機構、工廠或經濟體產出的全部數量

11. **output per worker / per hour — 每名員工 / 每小時產出**

Practice 1

> **Output per worker** increased after the new system was introduced.

新系統推出後，**每名員工的產出**有所增加。

Practice 2

> The company tracks **output per hour**.

公司會記錄**每小時產量**。

MCQ-ready definition:

output per X = 每一個指定單位所產生的成果數量

12. **creative output — 創作產出；創作成果**

Practice 1

> The artist's **creative output** increased during this period.

藝術家在這段時期的**創作產出**增加了。

Practice 2

> Stress affected his creative **output**.

壓力影響了他的**創作成果**。

MCQ-ready definition:

creative output = 某人創作出的作品總量或成果，例如文章、音樂、藝術作品等

13. **research output — 研究成果；研究產出**

Practice 1

> The university wants to increase its **research output**.

大學希望增加**研究產出**。

Practice 2

> Publications are one measure of academic **output**.

出版物是學術**研究成果**的一種量度方式。

MCQ-ready definition:

****research output = 研究活動所產生的論文、報告、數據或其他正式成果****

14. ****learning output — 學習產出****

An education/training use.

Practice 1

> The teacher assessed students' written ****output****.

老師評估學生的書面****學習產出****。

Practice 2

> Speaking activities encourage language ****output****.

口語活動鼓勵學生進行語言****輸出****。

****MCQ-ready definition:****

****learning/language output = 學習者實際產生的語言、作品或可觀察成果****

15. ****language output — 語言輸出****

A common applied-linguistics sense.

Practice 1

> Learners need opportunities to produce spoken ****output****.

學習者需要有機會產生口語****輸出****。

Practice 2

> Writing is a form of language ****output****.

寫作是一種語言****輸出****。

****MCQ-ready definition:****

****language output = 學習者實際說出或寫出的語言****

16. **output** (computing : 輸出) — 輸出 ; 輸出結果

A major technical sense.

Practice 1

> The program produces an **output**.

程式產生一個**輸出結果**。

Practice 2

> Check the **output** before running the next step.

進行下一步前先檢查**輸出結果**。

MCQ-ready definition:

output = 電腦、程式或系統處理輸入後產生的資料或結果

17. **input and output** — 輸入與輸出

Practice 1

> The system processes **input** and produces **output**.

系統處理**輸入**並產生**輸出**。

Practice 2

> The device has several input and **output** connections.

裝置有多個輸入和**輸出**連接位。

MCQ-ready definition:

input = 進入系統的資料 / 訊號 ; **output** = 系統處理後送出的資料 / 訊號

18. **data output** — 資料輸出

Practice 1

> The software generates a large amount of **data output**.

軟件產生大量**資料輸出**。

Practice 2

> The final **output data** are stored automatically.

最終的**輸出資料**會自動儲存。

MCQ-ready definition:

data output = 系統或程式完成處理後產生的資料

19. **output device — 輸出裝置**

A standard computing term.

Practice 1

> A monitor is an **output device**.

顯示器是一種**輸出裝置**。

Practice 2

> Speakers are audio **output devices**.

揚聲器是音訊**輸出裝置**。

MCQ-ready definition:

output device = 把電腦處理結果以畫面、聲音、列印等形式呈現給使用者的裝置

20. **output to a file / screen — 輸出到檔案 / 畫面**

Here **output** is a verb.

Practice 1

> The program **outputs the results to a file**.

程式把結果**輸出到檔案**。

Practice 2

> The system **outputs an error message**.

系統會**輸出一則錯誤訊息**。

MCQ-ready definition:

output X = 系統產生並送出 X

21. **output signal — 輸出訊號**

Practice 1

> The sensor sends an **output signal**.

感應器會發出一個**輸出訊號**。

Practice 2

> The strength of the **output signal** can be adjusted.

輸出訊號的強度可以調整。

MCQ-ready definition:

output signal = 電子或機械系統向外發出的訊號

22. **audio output — 音訊輸出**

Practice 1

> Connect the speakers to the **audio output**.

把揚聲器接到**音訊輸出端**。

Practice 2

> The device has both digital and analogue audio **outputs**.

裝置同時有數碼和模擬**音訊輸出端口**。

MCQ-ready definition:

audio output = 裝置把聲音訊號送出的功能或連接位置

23. **video output** — 視訊輸出

Practice 1

> The laptop supports external video **output**.

手提電腦支援外接**視訊輸出**。

Practice 2

> Check the video **output** settings.

檢查**視訊輸出設定**。

MCQ-ready definition:

video output = 裝置向顯示器等送出影像訊號的功能或訊號

24. **power output** — 輸出功率；功率輸出

A major engineering sense.

Practice 1

> The engine has a higher **power output**.

這個引擎有較高的**功率輸出**。

Practice 2

> The solar panels' **output** depends on sunlight.

太陽能板的**輸出功率**取決於陽光。

MCQ-ready definition:

power output = 機器或能源裝置實際產生並向外提供的功率

25. **energy output** — 能量輸出

Practice 1

> The machine's energy **output** was measured.

機器的**能量輸出**被量度。

Practice 2

> Higher temperatures increased the system's **output**.

較高溫度提高了系統的**輸出量**。

****MCQ-ready definition:****

****energy output = 系統實際產生或釋放的能量****

26. **cardiac output — 心輸出量**

A major medical technical sense.

Practice 1

> Exercise increases **cardiac output**.

運動會增加**心輸出量**。

Practice 2

> Doctors monitored the patient's **cardiac output**.

醫生監察病人的**心輸出量**。

****MCQ-ready definition:****

****cardiac output = 心臟每分鐘泵出的血液總量****

27. **urine output — 尿量**

A common medical sense.

Practice 1

> Nurses monitored the patient's **urine output**.

護士監察病人的**尿量**。

Practice 2

> Low **urine output** may require medical attention.

尿量過低可能需要醫療跟進。

MCQ-ready definition:

urine output = 身體在一段指定時間內排出的尿液量

28. **output gap** — 產出缺口

An established economics term.

Practice 1

> Economists estimated the country's **output gap**.

經濟學家估計該國的**產出缺口**。

Practice 2

> A negative **output gap** means actual production is below potential.

負的**產出缺口**表示實際產出低於潛在產出。

MCQ-ready definition:

output gap = 實際經濟產出與潛在可持續產出之間的差額

29. **output** (verb : 產生) — 產生 ; 輸出

Practice 1

> The machine **outputs** 500 units per hour.

機器每小時**產出** 500 件產品。

Practice 2

> The model **outputs** a probability score.

模型會**輸出一個機率分數**。

MCQ-ready definition:

****output = 作為系統、機器或程序的結果而產生某物****

Important distinction 1: ****output vs result****

Very relevant to your passage.

**output**

the concrete thing or quantity produced.

**result**

the broader outcome of an action.

Example:

A team may produce:

- * three slides,
- * one report,
- * a data table

as its ****outputs****.

The ****result**** might be:

- * a successful presentation,
- * a high grade,
- * better decision-making.

So:

**output = 產出物**

**result = 最終結果**

Important distinction 2: ****output vs contribution****

**contribution**

the useful share one person adds to the whole.

output

what that person actually produces.

Example:

> contribution = research expertise

> output = completed research summary

A contribution can be qualitative; output is often easier to observe or measure.

Important distinction 3: **output vs effort**

effort

input: how much energy/time you put in.

output

what comes out of that effort.

High effort does not always mean high output.

This is highly relevant to your teamwork passage.

Important distinction 4: **output vs performance**

performance

how well a person/system operates overall.

output

the quantity or concrete result produced.

An employee may have:

* high-quality performance,

* but limited output because their work is highly complex.

Important distinction 5: **output vs productivity**

output

absolute quantity/results produced.

productivity

output relative to resources such as time or labour.

Example:

> 100 reports = output

> 100 reports produced by 5 workers in one day = productivity context

So:

productivity is not simply output

Important distinction 6: **output vs production**

production

the process/activity of producing, or total production quantity.

output

the amount or result that comes out.

> production process

> 生產過程

> factory output

> 工廠產量

They overlap strongly in economics/manufacturing.

Important distinction 7: **output vs deliverable**

Very relevant to your passage.

deliverable

a specifically required item that must be delivered by a deadline.

output

anything produced by the work.

A report may be:

- * an output,
- * and also a deliverable.

But not every output is necessarily a formally required deliverable.

Important distinction 8: **measurable output vs measurable outcome**

output

what is produced directly.

outcome

the effect or consequence that follows.

Example:

- > Output: five training sessions delivered.
- > 產出：完成五場培訓。
- > Outcome: staff communication improved.
- > 成效：員工溝通改善。

This distinction is especially useful in management and evaluation.

Important distinction 9: **output vs input**

A core conceptual pair.

input

what goes into a process:

- * time,
- * money,
- * information,
- * effort.

output

what comes out:

- * product,
- * report,
- * data,
- * service.

Your teamwork paragraph almost creates this contrast:

- > **effort = input**
- > **output = produced work**

Important distinction 10: **output in computing**

Computing **output** is not necessarily a physical object.

It may be:

- * text,
- * an image,
- * a signal,
- * a file,
- * a calculation,
- * a message.

The core idea is simply:

the system produces it after processing input

Important distinction 11: **output as noun vs verb**

Noun:

- > The output is correct.

輸出結果正確。

Verb:

> The program outputs the result.

程式輸出結果。

The noun is much more common in general English; the verb is especially common technically.

Important distinction 12: **output** is often uncountable but can be countable

Uncountable:

> industrial output

> 工業產量

> employee output

> 員工產出

Countable:

> The project has three main outputs.

> 項目有三項主要產出。

Countable **outputs** is particularly common in:

* project management,

* development,

* research,

* policy,

* computing.

Important distinction 13: **output** vs **produce**

produce = verb:

> produce a report

output = noun:

> the report is an output

In technical contexts, **output** can also become a verb:

> output the data

But in ordinary workplace English, **produce** is usually more natural as the verb.

Important distinction 14: **medical output**

In phrases like:

> cardiac output

> urine output

output means:

the amount produced or discharged by an organ/body system

This is a technical quantitative extension of the same core concept.

Important distinction 15: **output in your passage**

The writer deliberately says:

> **measurable output**

rather than merely:

- * effort,
- * participation,
- * attendance.

Why?

Because output makes contribution **visible and assessable**.

A member might attend every meeting and claim to have worked hard, but a measurable output asks:

What did you actually produce?

Family-extension note

****Output**** has one very strong semantic core:

****what comes out of a person, process, machine, system, or economy****

That branches into:

1. ****workplace results****

- * measurable output
- * employee output

2. ****production quantity****

- * factory output
- * agricultural output

3. ****economics****

- * economic output
- * output gap

4. ****creative/academic work****

- * creative output
- * research output

5. ****computing****

- * data output
- * output device
- * output a file

6. ****electronics/engineering****

- * output signal
- * power output

7. ****medicine****

- * cardiac output
- * urine output

For your passage, the exact meaning is:

output = a concrete, observable piece or amount of work produced by each team member

Master comparison

Form / expression	Traditional Chinese	Core idea
-----	-----	-----
output (work)	工作產出；成果	produced work
measurable output	可量度產出	assessable result
work output	工作產出	employee work
employee output	員工產出	individual production
productive output	有用產出	useful result
output (manufacturing)	產量	quantity produced
industrial output	工業產出	industry
manufacturing output	製造業產量	manufacturing
agricultural output	農業產量	agriculture
economic output	經濟產出	economy
total output	總產出	total quantity
creative output	創作產出	creative work
research output	研究成果	academic work
language output	語言輸出	learning
output (computing)	輸出；輸出結果	processed result
input and output	輸入與輸出	process model
data output	資料輸出	computing
output device	輸出裝置	hardware
output signal	輸出訊號	electronics
audio output	音訊輸出	sound
video output	視訊輸出	display
power output	輸出功率	engineering
cardiac output	心輸出量	medicine
urine output	尿量	medicine
output gap	產出缺口	economics
output (verb)	輸出；產生	generate/send result

For your original sentence

> Each member should have a defined role, a deadline and a measurable **output**.

Here:

**measurable output = 每名組員都應該有一項清楚、具體、可以被看到和評估的工作成果，

而不是只說自己「有參與」或「有努力」**

Examples in this passage could be:

- * a completed research section,
- * a set of slides,
- * analysed data,
- * a written summary,
- * a clearly completed task.

A natural Traditional Chinese rendering is:

> 每名成員都應該有清晰的角色、截止日期，以及一項**可量度的工作產出 / 具體成果**。

The cleanest contrast is:

- > **effort** = 你投入多少心力
- > **contribution** = 你為團隊加入多少價值
- > **output** = **你實際產生了甚麼具體成果**
- > **performance** = 你整體做得有多好
- > **result/outcome** = 最終發生了甚麼

For this paragraph, **output** is especially important because it turns vague teamwork participation into something **visible, measurable, and accountable**.
