

I'll keep the same **full-family + constructions + specialist domains + distinctions + master comparison** standard from your new reference.

Word family: **premise / premises / premised / premising / premiss**

Base word: premise

Plural: premises

Verb forms: premises, premised, premising

Alternative spelling: **premiss** — principally used for the logical/propositional sense, especially in some formal or British writing

Part of speech: noun (名詞) / verb (動詞)

Major useful constructions and extensions:

- * premise of an argument
- * basic / central / underlying premise
- * false premise
- * hidden / unstated premise
- * major / minor premise
- * accept / reject / challenge / question a premise
- * on the premise that
- * based on the premise that
- * be premised on/upon
- * story / film premise
- * business / commercial / residential premises
- * on the premises / off the premises
- * licensed premises
- * leased / demised premises
- * premises liability
- * premises licence/license
- * on-premises / on-prem computing

Your sentence:

> "...tutorial centres should rent appropriate **premises**..."

Meaning in this passage

Here, **premises** means **a building, property, or set of buildings and associated land used by a business or organization**.

繁體中文： **處所；營業場所；物業；供某機構 / 業務使用的建築物及地方**

中文翻譯：

> "...tutorial centres should rent appropriate **premises**..."

「.....補習中心應租用合適的**處所 / 營業場所**.....」

Here:

****appropriate premises = 真正適合進行補習活動的商業 / 教育場所****

A crucial point:

> ****premises**** in this property sense is normally plural in form even when it refers to ****one business location****.

So:

> “The premises are suitable.” 

> 「該處所很合適。」

A. PREMISE = PROPOSITION USED AS THE BASIS OF REASONING

1. ****premise = statement/idea from which an argument proceeds (前提) — 前提 ; 論證基礎****

This is the major intellectual meaning.

Practice 1

> “The argument is based on a false ****premise****.”

「這項論證建基於一個錯誤的****前提****。」

Practice 2

> “If we accept the first ****premise****, the conclusion becomes more plausible.”

「如果我們接受第一個****前提****，結論就會變得較可信。」

Practice 3

> “The conclusion does not follow from the ****premises****.”

「這個結論並不能由這些****前提****推出。」

****premise = 在推理中先被提出 / 接受，並用來支持結論的命題****

2. **premise of an argument = proposition supporting its conclusion (論證前提) **

A formal argument may contain:

- * one premise;
- * several premises;
- * a conclusion.

Example:

- > **Premise 1:** All mammals are warm-blooded.
- > **Premise 2:** Whales are mammals.
- > **Conclusion:** Therefore, whales are warm-blooded.

The first two statements are the **premises**.

3. **basic premise = fundamental assumption/starting proposition (基本前提) **

Practice 4

- > “The basic **premise** of the plan is that demand will continue to grow.”

「這項計劃的**基本前提**是需求會繼續增長。」

This often means:

- > an idea on which everything else depends.

4. **central premise = main foundational proposition (核心前提) **

- > “The central premise of the theory is that language changes through use.”

「這個理論的**核心前提**是語言會透過使用而改變。」

5. **underlying premise = assumption beneath an argument/plan (深層前提) **

Practice 5

- > “We should question the underlying **premise**.”

「我們應該質疑其背後的**基本前提**。」

Often the premise has not been explicitly stated.

6. **starting premise = proposition accepted at the beginning (起始前提) **

> “Their starting premise was that the current system could not continue.”

「他們的**起始前提**是現有制度無法繼續。」

B. ASSUMPTION ON WHICH A PLAN / BELIEF DEPENDS

7. **premise = assumption accepted as the basis for action or analysis (假定) — 前提 ; 假設**

The word extends naturally beyond formal logic.

Practice 6

> “The budget rests on the **premise** that costs will remain stable.”

「預算建基於成本保持穩定這個**假設 / 前提**。」

Practice 7

> “Their strategy started from the **premise** that customers value convenience.”

「他們的策略由『顧客重視方便』這個**前提**出發。」

Here **premise** can be close to **assumption**, but it usually emphasizes:

> the assumption is functioning as a **foundation for subsequent reasoning or action**.

8. **working premise = assumption provisionally adopted to proceed (工作前提) **

> “As a working premise, let us assume demand remains constant.”

「作為一個**暫定的工作前提**，我們先假設需求保持不變。」

Similar to:

> working assumption.

9. **premise behind something = foundational idea behind it (背後前提) **

Practice 8

> “The premise behind the policy is that early intervention saves resources.”

「這項政策背後的**基本前提**是及早介入可以節省資源。」

C. TRUE / FALSE / QUESTIONABLE PREMISES

10. **false premise = false foundational proposition (錯誤前提) **

Practice 9

> “A logically valid argument can still begin with a false **premise**.”

「一個邏輯上有效的論證仍然可以由錯誤的**前提**開始。」

Important:

> **false premise ≠ invalid argument**

Logical validity concerns whether the conclusion follows from the premises, not whether the premises are actually true.

11. **faulty premise = defective/unreliable starting assumption (有問題的前提) **

> “The forecast was built on a faulty premise.”

「預測建基於一個**有問題的前提**。」

12. **questionable premise = premise whose truth/reasonableness is doubtful (可疑前提) **

> “The analysis relies on a questionable premise.”

「分析依賴一個**值得質疑的前提**。」

13. **unproven premise = not yet established as true (未證實前提) **

A premise can be:

- * plausible;
- * useful;
- * assumed;

without yet being proven.

D. EXPLICIT / IMPLICIT PREMISES

14. **explicit premise = directly stated premise (明示前提) **

> “The author states two explicit premises.”

「作者明確提出兩個**明示前提**。」

15. **implicit / unstated premise = premise not directly expressed (隱含前提) **

Practice 10

> “The argument depends on an unstated **premise**.”

「這項論證依賴一個沒有明說的**隱含前提**。」

Very important in:

- * critical thinking
- * rhetoric
- * philosophy
- * argument analysis

16. **hidden premise = unexpressed assumption necessary for the reasoning (隱藏前提) **

Close to:

- > implicit premise
- > unstated premise.

Example:

- > “He is too young, so he cannot be a good manager.”

Possible hidden premise:

- > young people cannot be good managers.

E. LOGIC: MAJOR / MINOR PREMISE

17. **major premise = major proposition in a traditional syllogism (大前提) **

Classic example:

- > **Major premise:** All humans are mortal.
- > **Minor premise:** Socrates is human.
- > **Conclusion:** Socrates is mortal.

18. **minor premise = minor proposition in a syllogism (小前提) **

As above:

- > Socrates is human.

= **小前提**

These terms belong particularly to traditional syllogistic logic.

19. **premise set = collection of premises (前提集合) **

Formal logic/mathematics may discuss:

- > a set of premises

from which a conclusion is derived.

20. **premise-conclusion structure (前提—結論結構) **

A basic model of an argument:

> premises → reasoning/inference → conclusion.

21. **premise indicator = word/phrase signalling a reason (前提指示詞) **

In critical-thinking instruction, words such as:

- * because
- * since
- * given that
- * seeing that

may function as **premise indicators**.

They signal:

> a supporting reason is being introduced.

F. PREMISE VS CONCLUSION

22. **premise ≠ conclusion**

premise

= statement used to support reasoning.

conclusion

= proposition the argument is trying to establish.

Example:

> “Because rent is high, businesses face heavy operating costs.”

Premise: rent is high.

Conclusion: businesses face heavy operating costs.

G. ACCEPT / REJECT / CHALLENGE A PREMISE

23. **accept a premise = agree to use it as a basis (接受前提) **

> “Even if we accept that premise, the conclusion does not necessarily follow.”

「即使我們**接受這個前提**，結論也未必成立。」

24. **reject a premise = refuse to accept it as true/justified (拒絕前提) **

Practice 11

> “She rejected the premise that restaurants should provide free study space.”

「她拒絕接受『餐廳應免費提供學習空間』這個**前提**。」

25. **challenge/question a premise = ask whether it is justified (質疑前提) **

> “The research challenges a long-standing premise.”

「這項研究**質疑**一個長期存在的前提。」

26. **grant a premise = provisionally accept it for argument (暫且接受前提) **

Formal/philosophical:

> “Granting that premise, what follows?”

「即使**暫且接受這個前提**，接下來能推出甚麼？」

27. **concede a premise = admit it for purposes of argument (承認前提) **

More formal/legal/debate usage.

H. ****ON THE PREMISE THAT****

28. ****on the premise that... = based on the assumption that... (以.....為前提) ****

Practice 12

> “The scheme operates ****on the premise that**** users will cooperate.”

「這個計劃****以使用者會合作為前提****。」

One of the most important constructions.

29. ****based on the premise that... ****

Practice 13

> “The model is based on the premise that prices respond to demand.”

「這個模型****建基於**價格會對需求作出反應這個**前提****。」

30. ****start/proceed from the premise that... ****

> “The report proceeds from the premise that all students require equal access.”

「報告****由以下前提出發****：所有學生都需要平等的使用機會。」

Formal.

31. ****rest on the premise that... ****

> “The entire argument rests on the premise that the data are reliable.”

「整套論證都****建基於**數據可靠這個前提**。」

32. ****operate on the premise that... ****

Common in business/system design:

> “The service operates on the premise that appointments are booked in advance.”

「這項服務以預先預約為**運作前提**。」

I. PREMISE = BASIC IDEA OF A STORY / FILM / SHOW

33. **premise = basic situation or concept on which a story is built (故事設定) — 基本構思；故事前提；核心設定**

A major modern media/literary sense.

Practice 14

> “The film has an interesting **premise**.”

「這部電影有一個很有趣的**基本設定 / 故事構思**。」

Practice 15

> “The show's **premise** is simple: strangers live together for a month.”

「這個節目的**基本設定**很簡單：一群陌生人一起生活一個月。」

****premise = 故事開始時用來建立人物、情境和主要衝突的核心構想****

34. **story premise = 故事核心設定**

Often answers:

> What's the story fundamentally about?

Not necessarily the entire plot.

35. **film / TV-series premise = 電影 / 劇集的基本概念**

Example:

> “The premise is strong, but the plot becomes repetitive.”

「基本**構思**很好，但劇情後來變得重複。」

This comparison is useful:

premise

basic setup/concept.

plot

actual sequence of events.

J. PREMISE VS PLOT / THEME / SETTING

36. **premise vs plot**

premise

starting concept.

plot

events that unfold.

Example:

> Premise: A lawyer can suddenly hear everyone's thoughts.

> Plot: everything that happens after this ability appears.

37. **premise vs theme**

premise

story's setup.

theme

larger idea explored by the story.

Example:

> Premise = two strangers exchange homes.

> Theme = identity, belonging, relationships.

38. **premise vs setting**

setting

where/when the story occurs.

premise

the central situation/concept.

A story can have:

> historical setting + science-fiction premise.

K. **PREMISES = BUILDING / PROPERTY**

Now we come to the **exact passage branch**.

39. **premises = building/property occupied by a business or organization (處所) — 處所；營業場所**

Practice 16 — Original

> “Tutorial centres should rent appropriate **premises**.”

「補習中心應租用合適的**處所**。」

Practice 17

> “The company moved to larger **premises**.”

「公司搬到較大的**營業場所 / 處所**。」

Practice 18

> “Smoking is prohibited on the **premises**.”

「本**處所**範圍內禁止吸煙。」

****premises = 某人、企業、機構所佔用 / 使用的建築物及相關地方****

40. ****premises may refer to one location despite plural form****

This is extremely important.

> “The premises ****are**** closed.” 

not normally:

> “The premise is closed.” 

if you mean the shop/building.

One business location may still be called:

> ****the premises****

because this property sense is conventionally plural in modern English.

41. ****business premises = 商業處所 / 營業場所****

Practice 19

> “The licence allows food to be sold from the business premises.”

「牌照容許在該****營業場所****出售食物。」

42. ****commercial premises = 商業處所****

Broad category that can include:

- * offices
- * shops
- * restaurants
- * warehouses

depending on legal/planning context.

43. **retail premises = 零售處所**

> shops and similar retail property.

44. **office premises = 辦公處所**

45. **industrial premises = 工業處所**

Examples:

- * factories
- * workshops
- * certain warehouses

depending on classification system.

46. **residential premises = 住宅處所**

Property used as a residence.

47. **school / educational premises = 校舍 / 教育處所**

Can include:

- * buildings
- * grounds
- * classrooms
- * associated facilities

depending on context.

48. **restaurant premises = 餐廳處所**

Directly relevant to your passage.

> “Customers must not smoke on the restaurant premises.”

「顧客不得在餐廳**處所範圍內**吸煙。」

L. **ON THE PREMISES / OFF THE PREMISES**

49. **on the premises = within the building/property (在場內 / 處所內) **

Practice 20

> “Food must be consumed on the **premises**.”

「食物必須在**場內 / 店內**食用。」

50. **off the premises = outside / away from the property (場外) **

> “The equipment may not be removed off the premises.”

More naturally:

> “The equipment may not be removed from the premises.”

「設備不得帶離**處所**。」

51. **leave/vacate the premises = 離開 / 騰空處所**

Practice 21

> “Visitors were asked to leave the **premises**.”

「訪客被要求**離開處所**。」

52. **enter the premises = 進入處所**

Common in:

* notices

* contracts

- * security
- * insurance
- * legal documents

53. ****access to premises = 進入處所的權限 / 通道****

M. LEASE / TENANCY

54. ****leased premises = leased property (租賃處所) ****

> “The tenant must maintain the leased premises.”

「租戶必須維護****租賃處所****。」

55. ****demised premises = property included in a lease (租賃標的處所) ****

A specialist legal/property term.

****Demised premises**** generally refers to the premises/property granted to a tenant under a lease.

The exact extent depends on the lease.

56. ****let premises = rented-out premises (出租處所) ****

BrE/property usage.

57. ****occupy premises = 使用 / 佔用處所****

Links to your earlier word ****occupy****:

> “The tenant occupies the premises.”

「租戶****佔用 / 使用****該處所。」

58. **possession of the premises = 對處所的佔有 / 管有**

Legal/property terminology.

Exact legal meaning varies by context.

N. LICENSED PREMISES

59. **licensed premises = premises legally licensed for a regulated activity (持牌處所) **

Often associated with:

- * alcohol sales
- * entertainment
- * food
- * gambling
- * other regulated activities,

depending on jurisdiction.

繁體中文： ** 持牌處所

60. **premises licence / premises license = licence attached to a location (處所牌照) **

Used in licensing regimes where a specific location requires authorization.

Exact legal function differs by jurisdiction.

O. PREMISES LIABILITY / OCCUPIERS' LIABILITY

61. **premises liability = liability associated with conditions on property (處所責任) **

Especially prominent in American legal terminology.

Broadly concerns legal responsibility for injuries occurring because of conditions on property.

Exact duties vary by jurisdiction and status of visitor.

62. **occupiers' liability**

In some common-law jurisdictions, **occupiers' liability** is the more familiar term for duties owed by those controlling premises.

This is related to, but should not automatically be equated with, every use of American **premises liability**.

63. **premises safety = 處所安全**

A general safety term rather than one highly technical doctrine.

64. **premises security = 處所保安**

Covers systems such as:

- * access control
- * alarms
- * surveillance
- * security staff

P. INSURANCE

65. **insured premises = 受保處所**

Property defined in an insurance contract as covered premises.

66. **premises insurance / business-premises cover**

Can describe insurance associated with:

- * buildings
- * liability
- * contents
- * business property

but the exact coverage depends on policy wording.

67. **damage to premises = 處所損毀**

Common insurance/lease wording.

Q. **ON-PREMISES COMPUTING**

A very important modern technical extension of the property sense.

68. **on-premises = located/run on an organization's own physical infrastructure (本地部署 / 內部部署)**

Practice 22

> “The company still uses **on-premises** servers.”

「公司仍然使用**本地部署 / 內部部署**的伺服器。」

Meaning:

> hardware/software is operated on infrastructure controlled at the organization's own facilities rather than primarily hosted as a cloud service by an external provider.

69. **on-premises software = 本地部署軟件**

Software installed and run on:

- * company computers
- * local servers
- * privately operated infrastructure

rather than consumed purely as a cloud/SaaS service.

70. **on-premises infrastructure = 內部部署基礎設施**

Can include:

- * servers
- * storage

- * networking
- * private data centres

71. **on-prem** = informal abbreviation

Tech professionals often say:

> **on-prem**

Example:

> “We're moving from on-prem to cloud.”

「我們正由**本地部署**轉向雲端。」

Common but informal.

72. **on-premise** vs **on-premises**

Important usage point:

The traditional property expression is:

> **on the premises**

Therefore the standard adjective is generally:

> **on-premises software**

not:

> **on-premise software**

On-premise is nevertheless encountered in technology/business usage, but **on-premises** is the safer edited form.

73. **cloud** vs **on-premises**

on-premises

organization directly operates infrastructure.

cloud

computing resources are provided through cloud infrastructure/services.

Hybrid arrangements may combine both.

74. **hybrid environment = on-premises + cloud**

A common IT architecture combining:

- * local infrastructure;
- * public/private cloud services.

R. OFF-PREMISES

75. **off-premises = taking place away from the property (場外的)**

Examples:

- * off-premises catering
- * off-premises storage
- * off-premises backup

Meaning varies by domain.

76. **off-premises alcohol sales/consumption**

Licensing contexts may distinguish:

- * on-premises consumption
- * off-premises consumption

Exact regulatory definitions depend on jurisdiction.

S. VERB **PREMISE**

77. **premise something on/upon something = base it on a particular assumption (以.....為前提) **

A formal verb.

Practice 23

> “The theory is **premised on** the assumption that people act rationally.”

「這個理論**建基於**人們會理性行動這個假設。」

This is by far the most useful modern verb construction.

78. **be premised on = be based/founded on (以.....為基礎) **

Practice 24

> “The policy is premised on voluntary cooperation.”

「這項政策**以自願合作為基礎 / 前提**。」

Very common in:

- * academic writing
- * law
- * policy
- * economics
- * formal argument

79. **be premised upon = same meaning, more formal**

> “The calculation is premised upon several assumptions.”

「計算**建基於**數項假設。」

on is generally more common than **upon**.

80. **premise an argument/theory on X**

Active:

> “The author premises the argument on two assumptions.”

「作者把論證**建立在兩個假設之上**。」

Correct but less common than passive:

> “The argument is premised on...”

81. **premise one's analysis on data/evidence**

Formal:

> “The analysis is premised on historical data.”

「分析**以歷史數據為基礎**。」

T. OLDER VERB SENSE

82. **premise = state something beforehand / introduce it as a preliminary (古舊 / 正式)**

Historically, **premise** could mean:

> state or set forth something previously or by way of introduction.

This is now rare/archaic outside specialized historical/legal texts.

Database status: genuine historical sense, not modern learner-core.

U. **PREMISS**

83. **premiss = alternative spelling of premise in logic (前提)**

Some philosophical/logical works use:

> **premiss**

specifically for:

> a proposition in an argument.

Example:

> “The conclusion follows from the two premisses.”

This spelling can help distinguish logical **premiss** from property **premises**, but **premise** is extremely common and standard for the logical noun as well.

84. **premiss** is not used for property

You would not normally write:

> **business premises** ❌

The property word is:

> **premises**

V. AI / NATURAL-LANGUAGE INFERENCE

85. **premise** = source statement in natural-language inference (自然語言推理前提)

In NLP/AI evaluation tasks, a system may be given:

* a **premise**

* a **hypothesis**

and asked whether the hypothesis is:

* entailed;

* contradicted;

* neutral/unknown

relative to the premise.

Example:

> Premise: “A woman is walking a dog.”

> Hypothesis: “An animal is outside.”

The terminology comes from logic but has become conventional in computational linguistics.

86. **premise-hypothesis pair = 前提—假設句對**

Used in:

- * natural-language inference
- * textual entailment
- * machine-learning datasets

Specialist modern extension.

W. PHILOSOPHY / EPISTEMOLOGY

87. **premise = proposition used in philosophical reasoning (哲學前提) **

Philosophical arguments routinely distinguish:

- * premise
- * inference
- * conclusion

88. **premise truth vs inference validity**

A crucial distinction.

An argument can have:

true premises + invalid reasoning

or:

false premises + valid reasoning.

So evaluating an argument involves asking separately:

1. Are the premises true/justified?
2. Does the conclusion follow?

89. **premise justification = reasons for accepting the premise**

Epistemology may ask:

> what justifies belief in a premise?

This is separate from whether the inference itself is valid.

X. MATHEMATICS / PROOFS

90. **premise = assumption/hypothesis from which proof proceeds (數學前提) **

Formal mathematical reasoning may speak of:

- * premises
- * assumptions
- * hypotheses

from which results follow.

In mathematics, **hypothesis/assumption** is often more common for theorem conditions, but **premise** remains valid in descriptions of logical inference.

91. **given premises = 已知前提**

> “Determine whether the conclusion follows from the given premises.”

「判斷結論是否能由給定的**前提**推出。」

Common in logic exercises.

Y. LAW / LEGAL REASONING

92. **premise = factual/legal proposition underlying an argument (法律論證前提) **

Example:

> “The court rejected the premise that the contractual obligation had ended.”

「法院拒絕接受『合約義務已終止』這個**前提**。」

This is the ordinary logical sense applied to legal reasoning.

93. ****factual premise = 事實前提****

> assumption/proposition about the facts.

94. ****legal premise = 法律前提****

> proposition concerning what the law requires/allows.

Z. FIXED HIGH-VALUE CONSTRUCTIONS

95. ****on the premise that****

= 以.....為前提。

96. ****based on the premise that****

= 建基於.....前提。

97. ****be premised on****

= 建基於 / 以.....為前提。

98. ****challenge the premise****

= 質疑基本前提。

99. ****accept the premise****

= 接受前提。

100. **reject the premise**

= 拒絕接受前提。

101. **the premise doesn't hold**

= 前提不成立。

Practice 25

> “If the premise does not hold, the argument collapses.”

「如果**前提不成立**，整個論證就站不住腳。」

102. **granting the premise**

= 即使暫且承認該前提。

Formal argumentation:

> “Granting the premise, the conclusion still does not follow.”

「即使**暫且接受這個前提**，結論仍然推不出來。」

103. **question the whole premise**

> “The study calls the whole premise into question.”

「這項研究令整個**基本前提受到質疑**。」

AA. IMPORTANT DISTINCTIONS

premise vs assumption

assumption

= something accepted as true, often without proof.

premise

= proposition/assumption specifically functioning as a **basis for reasoning, planning, or argument**.

So every premise may operate as an assumption, but not every casual assumption is functioning as a premise.

premise vs hypothesis

hypothesis

often means a proposed explanation or proposition to be tested.

premise

means something used as a starting point for reasoning.

A scientific hypothesis may become a premise in a particular argument, but the concepts differ.

premise vs proposition

proposition

= content of a statement capable of being true or false.

premise

= a proposition used in a particular argumentative role.

So:

> premise describes **function in an argument**.

premise vs conclusion

As above:

> premise supports
> conclusion is supported.

premise vs evidence

evidence

= information supporting a claim.

premise

= statement/proposition used in reasoning.

Evidence may justify a premise, or an evidential statement may itself function as a premise.

premise vs reason

reason

is broad and informal.

premise

is more structurally/logically precise.

> “Because space is limited...”

may be described as:

- * a reason;
- * a premise in an argument.

premise vs principle

principle

= general rule, value, doctrine, or fundamental truth.

premise

= starting proposition used in a particular reasoning process.

A principle can serve as a premise.

premise vs presupposition

presupposition

= something taken for granted/backgrounded in language or reasoning.

premise

= explicitly or implicitly used to support a conclusion.

They can overlap, but linguistics gives **presupposition** a more specialized meaning.

premise vs condition

condition

= circumstance that must be true/satisfied for something else to happen.

premise

= proposition used in reasoning.

> "Payment is a condition of entry."

not:

> a premise of entry.

premise vs basis

basis

= broad foundation.

premise

= specific foundational proposition/assumption.

> scientific basis

> logical premise

premise vs rationale

rationale

= explanation of why a decision/action makes sense.

premise

= starting proposition behind reasoning.

The rationale may contain several premises.

premise vs theory

theory

= explanatory framework/system of ideas.

premise

= foundational proposition on which reasoning/theory may rest.

A theory can contain multiple premises.

premise vs plot

premise

basic story concept.

plot

sequence of events.

****premise vs synopsis****

****synopsis****

= summary of the story.

****premise****

= central setup/concept.

A premise can often be expressed in one sentence; a synopsis usually describes what happens.

****premise vs logline****

In screenwriting:

****logline****

= concise promotional/story summary, usually describing protagonist, goal, obstacle, and hook.

****premise****

= underlying concept/setup.

They often overlap but are not identical.

****premises vs property****

****property****

is broader.

It may include:

- * land
- * buildings
- * ownership interests
- * possessions

****premises****

usually refers to:

> particular buildings/land occupied or used at a location.

****premises vs building****

****building****

= physical structure.

****premises****

may include:

- * building
- * grounds
- * related occupied space

and emphasizes use/occupation by an organization/person.

****premises vs venue****

Relevant to your earlier target:

****premises****

= property/building occupied or used by a business/institution.

****venue****

= place used for a particular event/activity.

A tutorial centre's ****premises**** can serve as a teaching ****venue****.

****premises vs facility****

****facility****

= place/equipment designed for a particular function.

premises

= property/location occupied by the organization.

A company's premises may contain several facilities.

premises vs site

site

= geographical location/parcel/place.

premises

= occupied buildings/property at that location.

premises vs location

location

= where something is.

premises

= actual property/buildings used there.

premises vs establishment

establishment

can mean:

* business/organization;

* place of business.

premises

focuses specifically on the physical property/place.

on-premises vs on-site

on-premises

especially IT/business:
at infrastructure/property controlled by the organization.

on-site

simply:
physically at the relevant site.

A third-party engineer can work **on-site**, while a server is described as **on-premises**.

AB. GRAMMAR

104. **premise that + clause?**

As a noun, English normally prefers:

> **the premise that + clause**

Example:

> “The premise that demand will rise may be wrong.”

「『需求會上升』這個**前提**可能是錯的。」

105. **on the premise that + clause**

Extremely common.

> “They acted on the premise that the information was accurate.”

106. **premise something on/upon + noun**

Verb:

> premise the analysis on historical data.

107. ****be premised on/upon****

Much more common than active bare verb.

> “The model is premised on several assumptions.”

108. ****premises + plural verb****

Property sense:

> “The premises ****are**** secure.”

not normally:

> “The premises is secure.”

Because the form is conventionally plural.

109. ****a premise vs premises****

Logic/story

> a premise

Property

> premises

Avoid:

> ***a premises***

> in careful general English.

If one physical unit is needed:

* a property

* a building

* a site

* a unit

* a set of premises

depending on context.

AC. COUNTABILITY

premise — proposition/story idea

Countable:

- > a premise

For your original sentence

> “...tutorial centres should rent ****appropriate premises****...”

The exact meaning is:

****premises = 由補習中心正式租用和使用、能夠容納學生並進行教學活動的實體處所 / 商業物業****

So:

> ****rent appropriate premises****

= ****租用適合補習用途的正式處所****

The property meaning is completely different from:

> ****premise = 前提****

Compare:

> “The argument rests on a false ****premise****.”

> 「論證建基於錯誤的****前提****。」

versus:

> “The company moved to new ****premises****.”

> 「公司搬到新的****處所****。」

That singular/plural contrast is one of the most important things to teach.

For the core database, I would keep ****4 major semantic branches****:

1. ****premise = proposition/assumption serving as the basis of reasoning****
2. ****premise = foundational assumption of a plan, theory, policy, etc.****
3. ****premise = basic setup/concept of a story, film, or programme****
4. ****premises = physical buildings/property used by a business or institution****

Then separately index the verb ****be premised on/upon****, logical ****major/minor/implicit premises****, property/legal compounds such as ****leased/licensed premises****, and the modern computing branch ****on-premises / on-prem****, because these are all highly established uses that cannot safely be reduced to a single translation such as 「前提」.
