Meaning in this passage

Your passage uses **size** several times:

- > ...compare two **sizes** in front of a mirror.
- > They rely on photos, **size charts** and delivery accuracy.
- > ...a pair of jeans fits differently from the chart...
- > Customers should be allowed one exchange for **size** or colour...

> others may order several **sizes** with no intention of keeping more than one.

Here, **size** means:

the labelled clothing measurement/category indicating how large or small a garment is — 衣服尺碼；大小碼

So:

* **compare two sizes** = 比較兩個尺碼

* **size chart** = 尺碼表

* **exchange for size** = 因尺碼不合而換貨

* **order several sizes** = 同一款訂購數個不同尺碼

這頂帽只有**單一尺碼 / 均碼**。

Practice 2

> One size may not fit every customer comfortably.

均碼未必適合所有顧客。

27. **one-size-fits-all** — 一體適用的；一刀切的

Literal and figurative.

Literal Practice

> The product is described as **one-size-fits-all**.

產品被標示為**均碼 / 人人適用尺碼**。

Figurative Practice

> A **one-size-fits-all return policy** may be unfair.

一刀切的退貨政策可能不公平。

MCQ-ready definition:

one-size-fits-all = literal: 同一尺寸聲稱適合所有人；figurative: 用同一做法處理所有情況，不考慮差異

The figurative sense is highly relevant to your passage's criticism of a blanket ban.

28. **one-size-fits-all solution** — 一刀切方案

餐廳減少了每份食物的**份量**。

Practice 2

> Portion size influences how much food is served.

每份大小會影響實際提供的食物量。

67. **serving size** — 每份食用量；建議食用份量

Practice 1

> Check the **serving size** on the label.

查看標籤上的**每份食用量**。

Practice 2

> Serving size is not necessarily the amount every person should personally eat.

****每份食用量**不一定等於每個人都應實際吃的份量。**

68. ****pack size — 包裝規格；每包容量 / 數量****

Practice 1

> The product comes in several ****pack sizes****.

產品提供多種****包裝規格****。

Practice 2

> Larger pack sizes may have a lower unit cost.

較大的****包裝規格****可能有較低的單位成本。

Y. ORDER SIZE / TRANSACTION SIZE

69. ****order size — 訂單規模 / 數量****

Practice 1

> Average ****order size**** increased.

平均****訂單金額 / 規模****增加了。

Practice 2

> “Order size” may refer to number of items or monetary value, depending on the metric.

****order size**** 可按語境指訂購件數或訂單金額。

70. ****transaction size — 交易規模****

Practice 1

> Larger ****transaction sizes**** require additional approval.

較大****交易規模****需要額外審批。

Practice 2

> Transaction size may be measured by value.

****交易規模**可以用金額衡量。**

Z. POSITION SIZE — INVESTING/TRADING

71. ****position size — 持倉規模****

A modern finance/trading use.

Practice 1

> Investors should consider ****position size**** alongside risk.

投資者應同時考慮****持倉規模****和風險。

風險管理包括謹慎的****持倉規模控制****。

Practice 2

> Position sizing is different from predicting market direction.

****持倉規模管理****與預測市場方向是不同事情。

AA. SET SIZE — MATHEMATICS / COMPUTING

73. **size of a set = number of elements — 集合大小；元素數量**

Practice 1

> The **size of the set** is five.

這個集合的**元素數量**是五。

Practice 2

> In finite sets, size corresponds to the number of distinct elements.

有限集合的 **size** 指其**不同元素數目**。

MCQ-ready definition:

size of a set = 集合中元素的數量

The more formal mathematics term is:

> **cardinality**

AB. SIZED COMPOUNDS

74. **small-sized / medium-sized / large-sized — 小 / 中 / 大型的**

In many contexts, simple:

> small / medium / large

is more natural.

But **-sized** is useful when modifying another noun.

Practice 1

> It is a **medium-sized company**.

這是一間**中型公司**。

Practice 2

> We need a medium-sized box.

Practice 1

> The system requires a ****properly sized image****.

系統要求圖片的****尺寸適當****。

Practice 2

> Properly sized clothing should still account for body proportions.

即使衣服尺碼合適，也仍需考慮不同**身形比例**。

AC. POCKET-SIZED / TRAVEL-SIZED

78. **pocket-sized — 袖珍的；口袋大小的**

Practice 1

> She carries a **pocket-sized notebook**.

她隨身帶着一本**袖珍筆記簿**。

Practice 2

> Pocket-sized devices are easy to carry.

袖珍裝置很容易攜帶。

79. **travel-sized / travel-size — 旅行裝的**

Practice 1

> She bought a **travel-size bottle**.

她買了一瓶**旅行裝**。

Practice 2

> Travel-size products use smaller containers.

旅行裝產品採用較小容量包裝。

80. **family-sized / family-size — 家庭裝；大容量的**

Practice 1

> They bought a **family-size pack**.

他們買了一包**家庭裝**。

Practice 2

> Family-sized products are intended for multiple servings/users.

****家庭裝產品**通常提供較大份量。**

AD. BITE-SIZED

81. ****bite-sized = small enough to eat in one bite — 一口大小的****

Literal.

Practice 1

> Cut the food into ****bite-sized pieces****.

把食物切成****一口大小的小塊****。

Practice 2

> Bite-sized pieces are easier to serve.

****一口大小的食物**較方便食用。**

82. ****bite-sized = short and easy to understand/manage — 短小易消化的****

Figurative modern use.

Practice 1

> The course breaks information into ****bite-sized lessons****.

課程把資訊分成****短小易消化的課節****。

Practice 2

> Break the project into bite-sized tasks.

把項目拆成****容易處理的小任務****。

****MCQ-ready definition:****

****bite-sized = figurative: 被分成較小、容易理解或處理的單位****

AE. SIZEABLE / SIZABLE

83. ****sizeable / sizable = fairly large — 相當大的；可觀的****

A major derivative whose meaning is not simply “having a size.”

Practice 1

> Returns create a ****sizeable cost**** for the retailer.

退貨為零售商帶來****相當大的成本****。

Practice 2

> The company has a sizable online customer base.

公司有一個****相當龐大的網上客戶群****。

****MCQ-ready definition:****

****sizeable = 相當大、數量可觀或重要的****

Both spellings are standard:

* ****sizeable****

* ****sizable****

Important distinction 12: ****sized vs sizeable****

****sized****

having a specified size:

> medium-sized company

> 中型公司

****sizeable****

fairly large:

> sizeable company

> 相當大型的公司

Very different.

AF. DOWNSIZE

84. **downsize = reduce the size of an organisation/workforce — 縮減規模；裁減人手**

A major business derivative.

Practice 1

> The company **downsized its workforce**.

> Downsizing can reduce costs but also affect morale.

裁減人手可以降低成本，但也可能影響士氣。

86. **downsize your home — 搬到較小住所**

A distinct everyday extension.

Practice 1

> After retirement, they decided to **downsize**.

退休後，他們決定**搬到較小的住所**。

Practice 2

> Downsizing can reduce housing costs.

換住較小房屋可以降低住房成本。

Important distinction 13: **downsize company vs resize**

downsize

reduce organisational/workforce/home scale.

resize

change physical/digital dimensions.

> downsize the workforce 

> resize the image 

Normally not interchangeable.

AG. UPSIZE

87. **upsized** = change to a larger size — 加大；升級為較大尺寸

Practice 1

> Would you like to **upsized** your order?

你想把訂單**升級成較大份量**嗎？

Practice 2

> The retailer upsized the packaging.

零售商把包裝**改成較大尺寸**。

****MCQ-ready definition:****

****upsized = 把商品、份量、設備等改為更大的尺寸 / 容量****

88. ****upsized a meal/drink — 升級大份****

Practice 1

> Customers can ****upsized the meal****.

顧客可以把餐點**升級為大份量**。

Practice 2

> Upsizing usually costs extra.

****升級大份量**通常需要額外收費。**

AH. CUT SOMEONE DOWN TO SIZE

89. ****cut someone down to size — 挫某人銳氣；令自大者認清自己****

A major idiom.

Practice 1

> His colleagues quickly ****cut him down to size**** after his arrogant remarks.

他發表傲慢言論後，同事很快便**挫了他的銳氣**。

Practice 2

> The phrase does not refer to physical dimensions.

這個表達並不是指真的改變某人的**身體大小**。

****MCQ-ready definition:****

****cut someone down to size = 讓過度自信 / 自大的人受到挫折，重新認清自己的實際地位或能力**

AI. THAT'S ABOUT THE SIZE OF IT

90. **That's about the size of it. — 大概就是這樣；情況差不多就是這樣**

Informal idiom.

Practice 1

> “So the customer gets one exchange but no cash refund?”

> “Yes, **that's about the size of it**.”

「所以顧客可以換一次貨，但不能退現金？」

「對，**大概就是這樣**。」

Practice 2

> That's about the size of the problem.

問題的情況**大致就是如此**。

MCQ-ready definition:

that's about the size of it = informal: 事情的基本情況大概就是這樣

AJ. OF ALL SHAPES AND SIZES

91. **of all shapes and sizes — 各式各樣；大小形狀不一**

Literal and figurative.

Practice 1

> The store sells bags of **all shapes and sizes**.

商店出售**各種形狀和大小**的袋。

Practice 2

> Businesses come in all shapes and sizes.

企業**規模和形式各式各樣**。

****MCQ-ready definition:****

****of all shapes and sizes = 種類、形式、大小非常多樣****

AK. SIZE IN TEXTILE MANUFACTURING: SIZING

There is another completely separate technical ****sizing**** sense.

92. ****sizing = substance/treatment applied to yarn or fabric — 上漿；漿料處理****

A textile-manufacturing technical sense.

Practice 1

> Warp yarn may undergo ****sizing**** before weaving.

經紗在織造前可能進行****上漿處理****。

Practice 2

> Sizing can improve yarn performance during weaving.

****上漿****可以改善紗線在織造過程中的性能。

****MCQ-ready definition:****

****sizing = 紡織製造中把漿料施加到紗線 / 布料，以改變其加工性能的處理****

This is completely different from:

> clothing sizing = 尺碼制度.

93. ****size = sizing substance — 漿料****

Technical historical/manufacturing noun.

Practice 1

> The yarn was treated with ****size**** before weaving.

紗線在織造前用****漿料****處理。

Practice 2

> This sense is specialist and should not be confused with physical size.

這個用法屬於紡織專業術語，不應與「大小 / 尺碼」混淆。

AL. SIZE IN PAPER / ART MANUFACTURING: SIZING

Another technical branch.

94. **sizing** = treatment reducing absorbency of paper/fabric — 上膠 / 施膠處理

Practice 1

> Paper may be treated with **sizing** to control absorbency.

紙張可以經過**施膠處理**以控制吸水性。

Practice 2

> Artists may work differently on sized and unsized paper.

藝術家在經**施膠**與未施膠紙張上的作畫方式可能不同。

Recognition-level specialist sense.

AM. SIZE AND FIT — CRITICAL DISTINCTION

Important distinction 14: **size** vs **fit**

size

label/dimensions:

> size M, size 10.

fit

how that garment actually sits on a particular body.

Your passage says:

> jeans **fit** differently from the chart

because:

correct labelled size $\neq$ guaranteed good fit.

A customer may choose the technically correct size but still experience:

- * tight waist,
- * loose hips,
- * long sleeves,
- * short torso.

Important distinction 15: **size vs measurement**

measurement

specific numerical dimension:

> waist = 74 cm

size

category based on one or more measurements:

> size 10

So:

> measurements $\rightarrow$ used to determine size.

Important distinction 16: **size vs dimension**

dimension

specific measurable extent:

- * length,
- * width,
- * height.

size

overall magnitude or category.

Example:

> dimensions: 30 × 20 × 10 cm

> size: medium

Important distinction 17: **size vs proportion**

From your previous **proportion** entry:

size

absolute amount/dimension.

proportion

relationship between different parts.

Two customers can be the same overall size but have different:

- * torso-to-leg proportions,

- * shoulder-to-waist proportions.

This is one reason standard sizing is imperfect.

Important distinction 18: **size vs scale**

size

how large something actually is.

scale

often size relative to a reference or the overall level of an activity.

- > building size

- > actual physical dimensions

- > scale of operation

- > overall magnitude.

They often overlap in business contexts.

AN. SIZE VS VOLUME

size

broad physical magnitude.

volume

three-dimensional space occupied / quantity of liquid etc.

A box may be large in one dimension but have a relatively modest volume.

So:

> size $\neq$ volume.

Important distinction 19: **size vs capacity**

size

physical dimensions.

capacity

how much it can contain/handle.

A physically larger bag usually has greater capacity, but the concepts are not identical.

AO. SIZE VS QUANTITY

size

can describe the magnitude of a group/order/sample.

quantity

explicit amount/number.

> sample size = number of observations

> quantity ordered = number of units purchased

Related, not identical.

AP. SIZE VS AMOUNT

amount

quantity of something, especially uncountable or numerical quantity.

size

magnitude of that amount/group.

> amount of money

> size of the payment

Different grammatical framing.

AQ. SIZEABLE VS LARGE

large

neutral size adjective.

sizeable

emphasizes:

> noticeably/fairly large, often more than expected or important enough to matter.

> large return volume

> large objectively

> sizeable return cost

> substantial/not trivial.

AR. SIZE UP VS LOOK AT

look at someone

simply direct your eyes/attention.

size someone up

look in order to **judge/evaluate**.

So:

> she looked at the customer

> ≠

> she sized the customer up.

AS. SIZE CHART VS BODY MEASUREMENTS

A size chart often maps:

> body measurements → labelled size.

For example:

> bust 86–90 cm → size S

But charts may instead give:

* garment measurements,

* body measurements,

* or both.

That distinction matters greatly in online fashion.

So a good **size guide** should make clear:

what exactly is being measured.

AT. SIZE CHART VS FIT GUIDE

size chart

numeric size measurements.

fit guide

broader advice on:

- * slim fit,
- * regular fit,
- * oversized fit,
- * stretch,
- * body type.

A retailer can have an accurate size chart but still provide poor fit guidance.

AU. SIZE IN YOUR PASSAGE

The letter gives a chain of reasoning:

- > customers cannot compare two **sizes** physically
- > → they rely on a **size chart**
- > → the chart may not predict actual **fit** perfectly
- > → customer may receive clothing that feels wrongly sized
- > → strict no-exchange rule punishes a genuine sizing problem.

So **size** here is central to the argument that:

online fashion involves uncertainty the customer cannot fully eliminate before buying.

This is why Chris proposes:

- > one exchange **for size or colour**

provided that:

- * the item is unworn,
- * unwashed,
- * other safeguards are met.

Important distinction 20: **size issue vs change of mind**

The passage treats these differently in spirit.

genuine sizing issue

customer reasonably relied on online measurements but item doesn't fit as expected.

simple change of mind

customer merely decides they no longer want it.

The proposed policy may therefore give different remedies depending on:

> why the size-related return happened.

Important distinction 21: **ordering several sizes**

The passage says:

> some customers may order several sizes with no intention of keeping more than one.

This is often called:

bracketing

in e-commerce/retail discussions—ordering multiple variants, especially sizes, intending to return unwanted ones.

For your curriculum, I would keep **bracketing** as a related retail concept rather than a core **size** meaning.

Family-extension note

The **size** family has several major modern branches:

1. **physical dimensions**

- * size of a box

- * actual size

2. **clothing/footwear sizing**

- * clothing size

- * shoe size

- * size 10

3. **passage retail terminology**

- * size chart
- * size guide
- * size range
- * exchange for size

4. **fit conventions**

- * true to size
- * run small/large
- * size up/down

5. **single-size design**

- * one size
- * one-size-fits-all

6. **fashion categories**

- * plus-size
- * oversized

7. **size system**

- * sizing
- * inconsistent sizing
- * vanity sizing

8. **verb: classify by dimensions**

- * size products

9. **change dimensions**

- * resize

10. **phrasal assessment**

- * size someone/something up

11. **organisational scale**

- * company size
- * team size

12. **business/economics**

- * market size
- * order size

13. **statistics**

- * sample size
- * population size
- * effect size

14. **computing/design**

- * file size
- * image size
- * screen size
- * font size

15. **science/engineering**

- * particle size
- * grain size

16. **food/packaging**

- * portion size
- * serving size
- * pack size

17. **finance**

- * position size
- * position sizing

18. **mathematics**

- * size of a set

19. **sized compounds**

- * medium-sized
- * pocket-sized
- * bite-sized

20. **large amount**

- * sizeable/sizable

21. **business/home reduction**

* downsize

22. **increase size**

* upsize

23. **idioms**

* cut someone down to size

* that's about the size of it

* all shapes and sizes

24. **textile/paper technical use**

* sizing = 上漿 / 施膠

* size = 漿料

For your passage, the exact branch is:

size = the labelled clothing category used to indicate garment dimensions and help customers choose something likely to fit their body

For your original passage

> Unlike shoppers in a physical boutique, our customers cannot ... compare two ****sizes**** in front of a mirror. They rely on photos, ****size charts**** and delivery accuracy.

And later:

> Customers should be allowed one exchange for ****size**** or colour...

Here:

****size = 衣物被標示的尺碼類別，例如 XS、S、M、L 或 8、10、12，用來幫助顧客判斷衣服是否會合身****

A natural Traditional Chinese rendering is:

> 網上顧客不能在鏡子前比較兩個****尺碼****，只能依靠照片和****尺碼表****；如果衣物尺碼不合，建議政策容許顧客因****尺碼問題****換貨一次。

The cleanest learner contrast is:

- > ****size**** = ****尺碼 / 大小類別****
- > ****measurement**** = 具體量度數字，如腰圍 76 cm
- > ****dimension**** = 長、闊、高等某一尺寸
- > ****fit**** = 衣物實際穿在某人身上的合身程度
- > ****proportion**** = 身體或衣物不同部分之間的相對比例
- > ****size chart**** = 各尺碼與量度的對照表
- > ****size guide**** = 更廣泛的尺碼選擇指引
- > ****sizing**** = 整套尺碼制度

> ****true to size**** = 尺碼標準

> ****run small / large**** = 尺碼偏小 / 偏大

And the key online-fashion principle is:

> ****same labelled size $\neq$ same actual fit across every brand or body shape.****

That uncertainty is exactly why ****size**** becomes one of the strongest arguments in Chris's case for a limited exchange policy.
