

Word family: **transparent / transparency / transparently / semi-transparent / non-transparent**

Base word: transparent

Part of speech: mainly **adjective**

Related forms:

* **transparent** (adj.) — 透明的；公開透明的；清楚可見的；容易看穿的；清晰易懂的

* **transparency** (n.) — 透明；透明度；公開透明；資訊公開程度

* **transparently** (adv.) — 公開透明地；明顯地；顯而易見地

* **semi-transparent / semitransparent** (adj.) — 半透明的

* **non-transparent** (adj.) — 不透明的；缺乏透明度的

* **opacity** (important opposite concept) — 不透明度；不透明性

* **opaque** (important opposite adjective) — 不透明的；難以理解的；不公開的

Major useful extensions:

transparent glass, transparent plastic, transparent material, transparent layer, transparent background, transparent image, transparent PNG, transparent to light, transparent to radiation, optically transparent, semi-transparent, completely/fully transparent, become transparent, transparency of glass, optical transparency, transparency setting, transparency level, transparent process, transparent system, transparent procedure, transparent decision-making, transparent communication, transparent reporting, transparent criteria, transparent rules, transparent pricing, price transparency, fee transparency, pay transparency, financial transparency, transparent accounting, transparent ownership, transparent contribution, transparent workload, transparent responsibilities, transparent information, transparent explanation, transparent language, transparent prose, transparent motive, transparent attempt, transparent lie, transparent excuse, transparently false, transparently obvious, be transparent about something, be transparent with someone, greater transparency, full transparency, lack of transparency, improve/increase transparency, demand transparency, transparency and accountability, radical transparency, transparent to the user, transparent operation, network transparency, location transparency, referential transparency, transparent proxy, transparent encryption, photographic transparency.

Meaning in this passage

> Group work is most effective when contribution is **transparent**, communication is disciplined and leadership is strong enough to unite different personalities around a common purpose.

Here, **transparent** means:

clearly visible, identifiable and open to inspection, so that everyone can see who contributed what — 清楚可見的；公開透明的；可追蹤的

The writer means that team contribution should **not be hidden or merely assumed**.

People should be able to tell:

- * who completed which task,
- * how much each person contributed,
- * whether deadlines were met,
- * what output each member produced,
- * whether credit matches actual contribution.

So here:

transparent contribution = 每個人的實際貢獻都清楚可見、可以核實，而不是模糊不清或只靠猜測

中文翻譯：

當每名成員的貢獻都**清楚可見、公開透明**，溝通有紀律，而且領導層有足夠能力把不同性格的人團結在共同目標之下時，團隊合作才最有效。

A. TRANSPARENT = SEE-THROUGH

1. **transparent = allowing light through so objects behind can be seen clearly — 透明的**

The basic literal sense.

Practice 1

> The container is made of **transparent plastic**.

容器由**透明塑膠**製成。

Practice 2

> The door has a transparent glass panel.

門上有一塊**透明玻璃板**。

Practice 3

> The material becomes transparent when wet.

這種材料濕了之後會變得**透明**。

MCQ-ready definition:

transparent = 能讓光線穿過，因此可以清楚看到後面物件的

2. **transparent glass — 透明玻璃**

Practice 1

> The office walls are made of **transparent glass**.

辦公室牆壁由**透明玻璃**製成。

Practice 2

> Transparent glass allows natural light into the room.

透明玻璃讓自然光進入房間。

3. **transparent plastic — 透明塑膠**

Practice 1

> Put the documents in a **transparent plastic folder**.

把文件放進**透明塑膠文件夾**。

Practice 2

> The cover is transparent.

封面是**透明的**。

4. **transparent material — 透明材料**

Practice 1

> Glass is a common **transparent material**.

玻璃是一種常見的**透明材料**。

Practice 2

> Researchers developed a strong transparent material.

研究人員開發出一種堅固的**透明材料**。

5. **completely / fully transparent — 完全透明的**

Practice 1

> The panel is almost **completely transparent**.

這塊板幾乎**完全透明**。

Practice 2

> The coating becomes fully transparent after drying.

塗層乾透後會變成**完全透明**。

B. TRANSPARENT VS TRANSLUCENT

6. **semi-transparent — 半透明的**

Practice 1

> The curtain is **semi-transparent**.

窗簾是**半透明的**。

Practice 2

> A semi-transparent layer was placed over the image.

圖像上覆蓋了一層**半透明圖層**。

MCQ-ready definition:

semi-transparent = 部分讓光線穿過，但不能完全清楚看見後面的東西

Important distinction 1: **transparent vs translucent vs opaque**

transparent

可以清楚看穿：

> clear glass

> **透明玻璃**

translucent

會透光，但後面的細節看不清：

> frosted glass

> **半透明 / 透光但不清晰**

opaque

光不能穿過：

> metal sheet

> **不透明**

So:

> transparent → 看得清後面

> translucent → 有光穿過，但看不清

> opaque → 看不穿

C. TRANSPARENCY = PHYSICAL TRANSPARENCY

7. **transparency = quality of being transparent — 透明性；透明度**

Practice 1

> The glass has excellent **transparency**.

這種玻璃具有很高的**透明度**。

Practice 2

> Surface damage reduced the transparency of the material.

表面損傷降低了材料的**透明度**。

MCQ-ready definition:

transparency = 材料讓光穿過、使後方物件可見的程度

8. **optical transparency** — 光學透明度

Practice 1

> The coating improves **optical transparency**.

塗層提高了**光學透明度**。

Practice 2

> Optical transparency varies with wavelength.

光學透明性會隨波長而變化。

D. TRANSPARENT TO LIGHT / RADIATION

9. **transparent to something** — 可讓某種輻射 / 波穿透的

A major scientific extension.

Practice 1

> The material is **transparent to visible light**.

這種材料對可見光是**透明 / 可穿透的**。

Practice 2

> Some materials are transparent to infrared radiation.

有些材料可以讓**紅外線穿透**。

MCQ-ready definition:

transparent to X = X 可以穿過該材料，而不被大量吸收或阻擋

10. **transparent to visible light** — 對可見光透明

Practice 1

> Window glass is largely **transparent to visible light**.

窗戶玻璃大致上能讓**可見光穿過**。

Practice 2

> A material may be transparent at some wavelengths but not others.

材料可能對某些波長**透明**，但對其他波長不透明。

11. **optically transparent — 光學透明的**

Practice 1

> The protective layer is **optically transparent**.

保護層是**光學透明的**。

Practice 2

> The material must remain optically transparent after heating.

材料加熱後仍須保持**光學透明性**。

E. DIGITAL GRAPHICS: TRANSPARENT BACKGROUND

12. **transparent background — 透明背景**

A major modern digital use.

Practice 1

> Save the logo with a **transparent background**.

把標誌儲存成**透明背景**。

Practice 2

> The icon looks better on different colours when the background is transparent.

背景**透明**時，圖示在不同底色上看起來會更自然。

MCQ-ready definition:

****transparent background = 圖像中沒有固定背景顏色，可以顯示下面的內容****

13. ****transparent image — 帶透明區域的圖像****

Practice 1

> The design uses several ****transparent images****.

設計使用了數張帶****透明效果的圖像****。

Practice 2

> Transparent images can be placed over other content.

帶****透明區域****的圖像可以疊在其他內容上。

14. ****transparent PNG — 透明背景 PNG****

Practice 1

> Export the logo as a ****transparent PNG****.

把標誌匯出為****透明背景 PNG****。

Practice 2

> A transparent PNG is useful for logos and icons.

帶透明背景的 PNG 很適合用於標誌和圖示。

15. ****transparency level — 透明程度****

Practice 1

> Adjust the ****transparency level**** of the layer.

調整圖層的****透明度****。

Practice 2

> Lower transparency makes the object more visible.

降低透明度設定會令物件顯得更實。

16. **opacity vs transparency — 不透明度 vs 透明度**

In graphics:

opacity

how solid/non-transparent something is.

transparency

how much underlying material is visible.

Roughly:

> 100% opacity = completely opaque

> 0% opacity = completely transparent

Software interfaces may express these values differently.

F. TRANSPARENT = OPEN / NOT SECRETIVE

17. **transparent = open and not hiding important information — 公開透明的**

A major figurative sense and very close to your passage.

Practice 1

> The organisation needs a more **transparent process**.

機構需要一個更**公開透明的程序**。

Practice 2

> Managers should be transparent about how decisions are made.

管理人員應該**公開說明決策方式**。

MCQ-ready definition:

****transparent = 重要資訊、程序和理由都公開清楚，沒有刻意隱瞞****

18. ****transparent process — 透明程序****

Practice 1

> Promotion decisions should follow a ****transparent process****.

晉升決定應按照****公開透明的程序****進行。

Practice 2

> A transparent process improves trust.

****透明的程序****可以提升信任。

19. ****transparent procedure — 公開透明的程序****

Practice 1

> Complaints should be handled through a ****transparent procedure****.

投訴應透過****公開透明的程序****處理。

Practice 2

> Transparent procedures make expectations clearer.

****透明程序****令大家更清楚知道要求。

20. ****transparent system — 透明的制度****

Practice 1

> The company introduced a more ****transparent evaluation system****.

公司引入更****透明的評核制度****。

Practice 2

> A transparent system makes it easier to understand how rewards are allocated.

****透明制度**讓員工更容易了解獎勵如何分配。**

G. TRANSPARENT DECISION-MAKING

21. ****transparent decision-making — 透明決策****

Practice 1

> Employees value ****transparent decision-making****.

員工重視****透明的決策過程****。

Practice 2

> Transparent decision-making requires clear reasons and criteria.

****透明決策****需要清晰的理由和準則。

****MCQ-ready definition:****

****transparent decision-making = 決策標準、理由和程序對相關人士清楚可見****

22. ****transparent criteria — 透明 / 清晰的準則****

Practice 1

> Promotions should be based on ****transparent criteria****.

晉升應以****公開清晰的準則****為基礎。

Practice 2

> Transparent criteria reduce suspicion of favouritism.

****透明準則****可以減少人們對偏袒的懷疑。

23. ****transparent rules — 清楚公開的規則****

Practice 1

> Teams need **transparent rules** for allocating credit.

團隊需要有關如何分配功勞的**清楚公開規則**。

Practice 2

> Transparent rules make the system easier to trust.

公開透明的規則令制度更值得信任。

H. TRANSPARENT COMMUNICATION

24. **transparent communication — 公開坦誠的溝通**

Practice 1

> **Transparent communication** reduces uncertainty.

公開坦誠的溝通可以減少不確定性。

Practice 2

> Leaders should encourage transparent communication about problems.

領導者應鼓勵大家對問題進行**公開透明的溝通**。

MCQ-ready definition:

transparent communication = 不刻意隱瞞重要資訊，清楚而坦誠地傳達情況

25. **be transparent with someone — 對某人坦誠公開**

Practice 1

> Managers should **be transparent with employees**.

管理人員應該對員工**坦誠公開**。

Practice 2

> Be transparent with the team about the risks.

應該向團隊****坦白說明風險****。

26. ****be transparent about something — 對某事公開坦白****

Practice 1

> The company should ****be transparent about the delay****.

公司應該對延誤原因****公開坦白****。

Practice 2

> She was transparent about what had gone wrong.

她****坦誠說明了出了甚麼問題****。

****MCQ-ready definition:****

****be transparent about X = 不隱瞞 X 的重要事實、原因或限制****

I. TRANSPARENT REPORTING / INFORMATION

27. ****transparent reporting — 透明報告 / 資訊披露****

Practice 1

> Transparent reporting helps build confidence.

****透明的資訊匯報****有助建立信心。

Practice 2

> Investors expect clear and transparent reporting.

投資者期望得到清晰、****透明的報告****。

28. ****transparent information — 清楚公開的資訊****

Practice 1

> Customers need transparent information about fees.

顧客需要有關收費的**清楚透明資訊**。

Practice 2

> Transparent information allows better decisions.

資訊透明可以幫助人們作出更好的決定。

29. **transparent disclosure — 透明披露**

Practice 1

> The organisation improved its disclosure practices to make them more transparent.

機構改善披露做法，使資訊更加**透明**。

Practice 2

> Transparent disclosure reduces uncertainty.

透明披露可以減少不確定性。

J. FINANCIAL / BUSINESS TRANSPARENCY

30. **financial transparency — 財務透明度**

Practice 1

> Strong **financial transparency** helps stakeholders understand an organisation's finances.

良好的**財務透明度**有助相關人士了解機構財務狀況。

Practice 2

> Clear reporting can improve financial transparency.

清晰匯報可以提高**財務透明度**。

31. **transparent accounting — 透明的會計 / 財務處理**

Practice 1

> The organisation adopted more **transparent accounting practices**.

機構採用了更**透明的會計處理方式**。

Practice 2

> Transparent accounting makes transactions easier to examine.

透明的會計制度令交易更容易被查核。

32. **transparent pricing — 價格透明**

A very common commercial expression.

Practice 1

> Customers prefer **transparent pricing**.

顧客較喜歡**價格透明**。

Practice 2

> The website uses transparent pricing with no hidden fees.

網站採用**透明定價**，沒有隱藏收費。

MCQ-ready definition:

transparent pricing = 價格和相關收費清楚顯示，不隱藏額外費用

33. **price transparency — 價格透明度**

Practice 1

> Online comparison tools can increase **price transparency**.

網上比較工具可以提高**價格透明度**。

Practice 2

> Greater price transparency makes comparison easier.

更高的**價格透明度**令比較更加容易。

34. **fee transparency — 收費透明度**

Practice 1

> The regulator requires greater **fee transparency**.

制度要求提高**收費透明度**。

Practice 2

> Fee transparency allows customers to understand the true cost.

收費透明讓顧客了解真正成本。

35. **pay transparency — 薪酬透明度**

Practice 1

> The company introduced greater **pay transparency**.

公司提高了**薪酬透明度**。

Practice 2

> Pay transparency can make compensation structures easier to understand.

薪酬透明可以令薪酬制度更容易理解。

K. TRANSPARENT OWNERSHIP / RESPONSIBILITY

36. **transparent ownership — 所有權透明**

Practice 1

> The organisation wants a more **transparent ownership structure**.

機構希望建立更**透明的所有權架構**。

Practice 2

> Transparent ownership makes it clearer who controls the company.

所有權透明可以令人更清楚誰控制公司。

37. **transparent responsibility — 責任歸屬清楚**

Practice 1

> Responsibility should be **transparent**.

責任歸屬應該清晰可見。

Practice 2

> Transparent responsibilities make accountability easier.

清楚透明的職責分配令問責更容易。

38. **transparent workload — 工作量公開可見**

Practice 1

> Shared tools make the team's workload more **transparent**.

共用工具令團隊的工作量更加**清楚可見**。

Practice 2

> A transparent workload system can reveal unequal participation.

工作量透明的制度可以揭示參與不均。

L. TRANSPARENT CONTRIBUTION — PASSAGE BRANCH

39. **transparent contribution — 貢獻清楚可見；貢獻透明**

The exact passage concept.

Practice 1

> Teamwork works better when individual contribution is **transparent**.

每個人的貢獻都**清楚可見**時，團隊合作會更有效。

Practice 2

> Progress tracking makes contribution more transparent.

進度追蹤令個人貢獻更加**可見、可核實**。

MCQ-ready definition:

transparent contribution = 誰做了甚麼、做了多少和產生了甚麼成果都可以清楚辨認

40. **make contribution transparent — 令貢獻透明化 / 清楚可見**

Practice 1

> Individual evaluations can **make contribution more transparent**.

個人評核可以令各人的貢獻**更加清楚可見**。

Practice 2

> Clear task ownership makes contribution transparent.

清楚的任務責任歸屬令貢獻**容易追蹤**。

41. **transparent accountability — 問責清晰可見**

Practice 1

> Transparent accountability helps prevent free-riding.

清晰透明的問責制度有助防止搭便車。

Practice 2

> Employees need to know who is responsible for each output.

員工需要清楚知道每項產出的責任誰屬，才能建立**透明問責**。

M. TRANSPARENCY = OPENNESS

42. **transparency = openness about actions, rules and information — 透明度；公開性**

A major abstract noun sense.

Practice 1

> The process needs greater **transparency**.

程序需要更高的**透明度**。

Practice 2

> Transparency can strengthen trust.

透明度可以加強信任。

MCQ-ready definition:

transparency = 重要資訊、決策和程序清楚公開，讓相關人士可以了解和檢視的程度

43. **greater / increased transparency — 更高透明度**

Practice 1

> Employees asked for **greater transparency** around promotions.

員工要求晉升制度有**更高透明度**。

Practice 2

> The new system increased transparency.

新制度提高了**透明度**。

44. **improve transparency — 提高透明度**

Practice 1

> Written criteria ****improve transparency****.

書面準則可以****提高透明度****。

Practice 2

> Digital tools can improve transparency around workload.

數碼工具可以提高工作量方面的****透明度****。

45. ****full transparency — 完全透明；全面公開****

Practice 1

> The manager promised ****full transparency****.

經理承諾會****全面公開相關資訊****。

Practice 2

> Full transparency is not always possible where legitimate confidentiality applies.

在有合理保密需要的情況下，未必所有資訊都能****完全公開****。

46. ****lack of transparency — 缺乏透明度****

Practice 1

> A ****lack of transparency**** created suspicion.

****缺乏透明度****引起了懷疑。

Practice 2

> Employees criticised the lack of transparency in the evaluation process.

員工批評評核程序****不夠透明****。

47. ****transparency and accountability — 透明度與問責****

A major pairing.

Practice 1

> Clear records support ****transparency and accountability****.

清晰紀錄有助提升****透明度和問責性****。

Practice 2

> Transparency makes it easier to see who is responsible.

****透明度****令責任歸屬更容易被看見，從而有助問責。

48. ****radical transparency — 高度 / 徹底透明****

An established management concept.

Practice 1

> Some organisations experiment with ****radical transparency****.

有些機構嘗試採取****高度透明的管理方式****。

Practice 2

> Radical transparency involves making much more internal information visible than is normally shared.

****徹底透明****通常指公開遠多於一般機構會分享的內部資訊。

N. TRANSPARENT = EASY TO UNDERSTAND

49. ****transparent = clear and easy to understand — 清晰易懂的****

A distinct figurative branch.

Practice 1

> The explanation is admirably ****transparent****.

這個解釋非常**清晰易懂**。

Practice 2

> The rules should be transparent to ordinary users.

規則應該讓一般使用者**容易理解**。

****MCQ-ready definition:****

****transparent = 結構或意思十分清楚，不難理解****

This sense is less common in everyday speech than ****clear****, but fully established.

50. ****transparent explanation — 清晰易懂的解釋****

Practice 1

> The teacher gave a ****transparent explanation**** of the process.

老師對流程作出了****清楚易懂的解釋****。

Practice 2

> Technical documents should aim for transparent explanations.

技術文件應盡量提供****清晰易明的說明****。

51. ****transparent language — 清晰易懂的語言****

Practice 1

> Contracts should use more ****transparent language**** where possible.

合約在可能情況下應使用更****清晰易懂的語言****。

Practice 2

> Transparent language reduces misunderstanding.

****清楚易明的語言****可以減少誤解。

52. **transparent prose / writing — 清楚明白的文筆**

Practice 1

> Her prose is simple and **transparent**.

她的文筆簡單而**清晰易懂**。

Practice 2

> Transparent writing helps readers follow complex ideas.

清晰易讀的寫作有助讀者理解複雜概念。

O. TRANSPARENT = OBVIOUS / EASY TO SEE THROUGH FIGURATIVELY

53. **transparent = obvious and easy to recognize — 顯而易見的；一眼看穿的**

A major, usually negative figurative branch.

Practice 1

> It was a **transparent attempt to avoid responsibility**.

那明顯是一次**一眼就能看穿的逃避責任企圖**。

Practice 2

> His excuse was completely transparent.

他的藉口**明顯得一眼就能看穿**。

MCQ-ready definition:

transparent = 某人的真正目的或虛假之處太明顯，因此很容易被識破

54. **transparent motive — 很容易看穿的動機**

Practice 1

> His **motive was transparent**.

他的動機**一目了然**。

Practice 2

> The transparent motive behind the proposal made people suspicious.

方案背後**明顯可見的真正動機**令人起疑。

55. **transparent attempt — 明顯的企圖**

Practice 1

> It was a **transparent attempt to shift the blame**.

那顯然是一次**轉移責任的企圖**。

Practice 2

> The apology sounded like a transparent attempt at damage control.

那次道歉聽起來像是一次**很明顯的危機補救手段**。

56. **transparent lie — 一眼就能看穿的謊言**

Practice 1

> It was a **transparent lie**.

那是一個**一眼就能看穿的謊言**。

Practice 2

> Transparent lies quickly damage credibility.

明顯的謊話很快會損害可信度。

57. **transparent excuse — 明顯的藉口；很容易識破的藉口**

Practice 1

> His explanation was a **transparent excuse**.

他的解釋只是個**一眼就能識破的藉口**。

Practice 2

> Everyone recognised the excuse as transparent.

大家都看得出那個藉口**根本站不住腳**。

P. TRANSPARENT PERSON / EMOTIONAL TRANSPARENCY

58. **transparent person** = open/easy to read — 坦率、不隱藏想法的人

Practice 1

> She is unusually **transparent about her feelings**.

她對自己的感受非常**坦率、不加掩飾**。

Practice 2

> His reactions are so transparent that everyone knows when he disagrees.

他的反應太**容易看懂**，所以大家都知道他何時不同意。

This can mean either:

* open/honest,

* or very easy to read.

59. **emotional transparency** — 情感表達透明 / 坦率

Practice 1

> Emotional transparency can make communication easier.

坦率表達感受可以令溝通更容易。

Practice 2

> Different workplaces expect different levels of emotional transparency.

不同工作環境對**情緒表達公開程度**的期望不同。

Q. TRANSPARENTLY

60. **transparently = openly and without concealment — 公開透明地**

Practice 1

> The process should be managed **transparently**.

程序應該**公開透明地**管理。

Practice 2

> Management explained the change transparently.

管理層以**公開坦誠的方式**解釋改變。

61. **transparently = obviously — 明顯地；顯然地**

A second major adverb branch.

Practice 1

> The claim is **transparently false**.

這個說法**明顯是錯的**。

Practice 2

> His explanation was transparently self-serving.

他的解釋**顯然是在為自己利益辯護**。

****MCQ-ready definition:****

****transparently = 明顯到很容易看穿或判斷****

62. **transparently obvious — 顯而易見**

Practice 1

> The motive was **transparently obvious**.

動機**顯而易見**。

Practice 2

> The contradiction became transparently obvious.

矛盾變得**一目了然**。

This can sound emphatic because **transparent** and **obvious** already overlap.

R. TRANSPARENT TO THE USER — COMPUTING

63. **transparent to the user** = operating without requiring the user to notice/manage it — 對使用者透明；使用者無須察覺

A major computing sense.

Practice 1

> The synchronization process is **transparent to the user**.

同步程序對使用者而言是**透明的 / 無須察覺的**。

Practice 2

> The change should be completely transparent to customers.

這項改變應該做到讓顧客**完全無需理會底層運作**。

MCQ-ready definition:

transparent to the user = 系統功能在背後自動運作，使用者不需要知道或手動處理其細節

Notice the apparent reversal:

> ordinary transparency → easy to see

> computing transparency → implementation is effectively **invisible**

The common core is:

the hidden mechanism does not obstruct the user's interaction.

64. **transparent operation — 透明運作；無感運作**

Practice 1

> Data backup happens as a **transparent operation**.

資料備份以使用者**無感的方式**進行。

Practice 2

> The technical complexity remains transparent to the user.

技術複雜性對使用者而言是**不可感知 / 無須處理的**。

S. NETWORK TRANSPARENCY

65. **network transparency — 網絡透明性**

Practice 1

> The system aims to provide **network transparency**.

系統旨在提供**網絡透明性**。

Practice 2

> Applications can access remote resources as though they were local.

應用程式可以像使用本地資源一樣使用遠端資源，這是**網絡透明性**的一種表現。

****MCQ-ready definition:****

****network transparency = 讓使用者 / 程式不必處理網絡底層差異，就能使用遠端資源****

66. **location transparency — 位置透明性**

A distributed-systems term.

Practice 1

> **Location transparency** hides the physical location of a resource.

位置透明性會隱藏資源實際存放的位置。

Practice 2

> Users need not know which server stores the data.

使用者不需要知道資料實際存在哪一部伺服器，這就是**位置透明**。

67. **transparent proxy** — 透明代理

A technical networking term.

Practice 1

> Traffic passes through a **transparent proxy**.

流量會經過**透明代理伺服器**。

Practice 2

> A transparent proxy can operate without requiring the client to configure a conventional proxy manually.

透明代理可以在客戶端無需手動設定一般代理的情況下介入流量。

68. **transparent encryption** — 透明加密

Practice 1

> The system uses **transparent encryption**.

系統使用**透明加密**。

Practice 2

> Files are encrypted and decrypted automatically without changing the normal user workflow.

檔案會自動加密和解密，而不改變使用者平常的工作流程，這屬於**透明加密**。

T. REFERENTIAL TRANSPARENCY

69. **referential transparency** — 參照透明性

A major functional-programming / logic concept.

Practice 1

> Pure functions help support **referential transparency**.

純函數有助實現**參照透明性**。

Practice 2

> In a referentially transparent expression, replacing the expression with its value does not change the program's observable behaviour.

在具有**參照透明性**的表達式中，把表達式換成其值不會改變程式可觀察到的行為。

MCQ-ready definition:

referential transparency = 一個表達式可以被其結果值取代，而不改變整體行為的性質

This is highly technical and unrelated to organisational openness.

U. DATA / SYSTEM TRANSPARENCY

70. **data transparency** — 數據透明度

Practice 1

> Better documentation improves **data transparency**.

更好的文件紀錄可以提高**數據透明度**。

Practice 2

> Users should know where important figures come from.

使用者應該知道重要數據從何而來，這有助提升**資料透明度**。

71. **algorithmic transparency** — 演算法透明度

A modern technical/governance term.

Practice 1

> The organisation is studying ways to improve **algorithmic transparency**.

機構正在研究如何提升**演算法透明度**。

Practice 2

> Algorithmic transparency can include clearer information about how a system reaches outputs.

演算法透明度可以包括更清楚交代系統如何產生結果。

72. **model transparency** — 模型透明度

Practice 1

> Simpler models may offer greater **model transparency**.

較簡單的模型可能具有較高的**模型透明度**。

Practice 2

> Transparency can help users understand which factors influence an output.

提高**模型透明度**可以幫助使用者理解哪些因素影響結果。

Important distinction 2: **transparent vs visible**

This is central to your passage.

visible

can be seen.

transparent

often goes further:

> the relevant information is **open, understandable, and inspectable**.

Example:

> Her name is visible on the report.

> 她的名字看得到。

> Her contribution is transparent.

> **她實際做了甚麼、做了多少、產出了甚麼都很清楚。**

So:

transparent contribution ≠ merely visible name.

Important distinction 3: **transparent vs clear**

clear

broad:

* understandable,

* visible,

* definite.

transparent

often emphasizes:

* openness,

* absence of concealment,

* ability to inspect how something works.

> clear instructions

> 清楚指示

> transparent evaluation process

> **公開透明的評核過程**

Important distinction 4: **transparent vs open**

open

accessible/not secretive.

transparent

information/process is sufficiently visible to understand and examine.

An organisation can publish information openly but still present it so confusingly that the process is not genuinely transparent.

Important distinction 5: **transparent vs honest**

honest

not lying/deceiving.

transparent

not hiding relevant information/process.

Someone can be honest while still being private.

Someone can also disclose large amounts of information without necessarily being truthful about all of it.

So they overlap, but are not synonyms.

Important distinction 6: **transparent vs frank**

From your earlier **frank** family:

frank

openly says what one truly thinks.

transparent

makes relevant information, motives or processes visible.

> frank conversation

> 坦率對話

> transparent decision process

> 透明決策過程

Important distinction 7: **transparent vs direct**

From your earlier **direct** family:

direct

does not avoid the point.

transparent

does not hide relevant information.

Someone can speak directly but still conceal important facts.

Important distinction 8: **transparent vs accountable**

Very important for your teamwork passage.

transparent

people can see what happened and who did what.

accountable

people are responsible for their actions/results and may need to explain them.

So:

> transparency makes accountability easier.

But:

transparency $\neq$ accountability.

Important distinction 9: **transparent vs traceable**

traceable

you can follow something back to its source/history.

transparent

broader; relevant information is readily open and visible.

For contribution:

> transparent + traceable

is often ideal:

> Who did it?

> When?

> What output?

Important distinction 10: **transparent vs measurable**

measurable

can be expressed/evaluated using a measure.

transparent

can be clearly inspected.

A contribution can be transparent without being perfectly measurable.

Example:

> mentoring another employee

may be clearly documented but difficult to convert into one number.

Important distinction 11: **transparent vs objective**

From your **objective** family:

transparent process

everyone can see how it works.

objective process

judgment is based on consistent facts/criteria rather than personal bias.

A process can be transparent but subjective.

It can also use objective criteria but explain them poorly.

Best case:

> transparent + objective + fair.

Important distinction 12: **transparent vs fair**

fair

equitable/just.

transparent

open and understandable.

A transparent rule may still be unfair.

Transparency lets people **see** the rule; fairness concerns whether the rule is **just**.

Important distinction 13: **transparent vs simple**

simple

not complex.

transparent

easy to inspect/understand.

A system may be complex yet transparent if its logic and information are clearly explained.

Important distinction 14: **transparent vs explicit**

explicit

directly and clearly stated.

transparent

broader openness of process/information.

> explicit rule

> 明文規則

> transparent system

> 透明制度

Explicit rules contribute to transparency.

Important distinction 15: **transparent vs obvious**

These overlap only in one branch.

Openness:

> transparent process

> 公開透明的程序

Obviousness:

> transparent lie

> 一眼看穿的謊言

In the second case, **transparent** does **not** mean admirable openness.

It means:

the deception is so poor that the truth shows through.

Important distinction 16: **transparent lie sounds negative**

Compare:

> transparent reporting

> positive: 資訊公開透明

> transparent lie

> negative: **謊言太明顯，一看就穿**

Same word, opposite evaluation.

The underlying metaphor is still:

> **you can see through it.**

Important distinction 17: **transparent motive**

This can sound critical:

> His motives were transparent.

Often means:

everyone could easily see what he really wanted.

It may imply the motive was:

- * selfish,
- * strategic,
- * poorly concealed.

Context decides.

Important distinction 18: **transparent language vs plain language**

plain language

deliberately uses familiar/simple wording.

transparent language

meaning is easy to see/understand.

Plain language is one way to make language transparent.

Important distinction 19: **transparency vs confidentiality**

These are not absolute opposites in every situation.

transparency

relevant information should be visible.

confidentiality

certain legitimate information should remain restricted.

A well-designed organisation often needs both:

> transparent rules + confidential personal information.

Important distinction 20: **transparency vs privacy**

transparency

usually concerns systems, processes, decisions and responsibilities.

privacy

protects personal information and personal boundaries.

Making a process transparent does not require exposing everyone's private information.

Important distinction 21: **transparent pricing vs cheap pricing**

transparent pricing

you clearly know what you will pay.

cheap pricing

the amount itself is low.

A service may be expensive but transparently priced.

Important distinction 22: **transparent pricing vs fixed pricing**

fixed price

price does not vary under specified conditions.

transparent price

price and charges are clearly disclosed.

A variable pricing model can still be transparent.

Important distinction 23: **pay transparency vs equal pay**

pay transparency

employees/candidates have clearer information about pay structures or ranges.

equal pay

concerns equality in remuneration under relevant comparison criteria.

They are related but not the same concept.

Important distinction 24: **transparent contribution vs equal contribution**

Critical for your passage.

transparent contribution

everyone can see what each member contributed.

equal contribution

everyone contributed the same amount.

A team can have:

> unequal but transparent contribution

if different people legitimately have different roles/workloads.

The passage's concern is:

visibility + accountability,

not necessarily identical input from every person.

Important distinction 25: **transparent contribution vs measurable output**

From your **output** entry:

measurable output

specific deliverable/result that can be assessed.

transparent contribution

broader view of what each member actually contributed.

Output can help make contribution transparent, but contribution can also include:

- * ideas,
- * coordination,
- * mentoring,
- * problem-solving.

Important distinction 26: **transparent contribution vs credit**

From your **credit** family:

contribution

what you actually did.

credit

recognition you receive.

transparency

makes it easier to compare the two.

Ideally:

> contribution visible → credit accurately assigned.

Important distinction 27: **transparent contribution vs assumed contribution**

This directly connects to your earlier **assume** entry.

> contribution becomes **visible** rather than assumed

and later:

> contribution is **transparent**

These express the same broader principle.

assumed contribution

people believe someone contributed without clear evidence.

transparent contribution

the contribution can actually be seen and verified.

Important distinction 28: **transparency vs surveillance**

A useful workplace distinction.

transparency

relevant work information is appropriately visible.

surveillance

people's behaviour is monitored.

They can overlap in badly designed systems, but they are not the same.

Transparent teamwork does not automatically mean monitoring every action employees take.

Important distinction 29: **transparent to the user seems opposite—but isn't**

Ordinary:

- > transparent glass
- > you can see **through** it.

Computing:

- > process is transparent to user
- > the process itself does not obstruct the user's experience, so its internal machinery is effectively **unseen**.

The technical meaning developed from the idea of:

something not getting in the way.

Important distinction 30: **transparent background vs white background**

white background

pixels are actually white.

transparent background

there is no opaque background colour in those areas.

Put them over blue:

- * white background stays white,
- * transparent background shows blue.

Important distinction 31: **transparency vs opacity in graphics**

They express opposite directions:

higher transparency

→ more of what is underneath shows through.

higher opacity

→ less of what is underneath shows through.

Important distinction 32: **transparent to visible light vs transparent to infrared**

Transparency is wavelength-dependent.

A material can:

> look opaque to human eyes

yet allow another type of electromagnetic radiation to pass through.

So technical **transparent to X** always requires:

transparent to what?

Important distinction 33: **transparency vs resolution**

From your previous **resolution** family:

resolution

how finely detail can be distinguished.

transparency

how much underlying light/content passes through or how openly information is disclosed.

Completely separate technical concepts.

Important distinction 34: **transparent vs translucent in digital graphics**

Digital software often uses **transparency** broadly for partial see-through effects.

Strict physical-material language distinguishes:

* transparent,

* translucent,

* opaque.

In graphics:

> 50% transparent

is perfectly normal.

Important distinction 35: **transparency noun countability**

Usually uncountable:

> greater transparency

> lack of transparency

> optical transparency

But there is also a countable older/photographic sense:

> **a transparency**

meaning:

a positive photographic image on transparent material.

V. PHOTOGRAPHIC TRANSPARENCY

73. **a transparency** = positive photographic image on transparent film — 透明正片；幻燈片

Less common today, but still established.

Practice 1

> The archive contains hundreds of photographic **transparencies**.

檔案館保存了數百張**透明正片 / 幻燈片**。

Practice 2

> Before digital projection, transparencies were widely used for presentations and photography.

數碼投影普及以前，**透明正片**廣泛用於攝影及展示。

MCQ-ready definition:

a transparency = 印在透明底片上的正像照片，可透光觀看或投影

Important distinction 36: **transparency** = openness vs a **transparency** = photographic object

Uncountable:

> We need more **transparency**.

> 我們需要更高**透明度**。

Countable:

> The museum preserved several **transparencies**.

> 博物館保存了數張**透明正片**。

Completely different grammar and meaning.

W. TRANSPARENT IN ART / DESIGN

74. **transparent layer** — 透明圖層

Practice 1

> Add a **transparent layer** over the photograph.

在照片上加入一層**透明圖層**。

Practice 2

> The transparent layer allows the original image to remain visible.

透明圖層讓原圖仍然可見。

75. **transparent colour / pigment** — 透明性色彩 / 顏料

Practice 1

> Watercolour often makes use of **transparent pigments**.

水彩畫經常使用具有**透明感的顏料**。

Practice 2

> Transparent colour allows light and underlying layers to influence the final appearance.

****透明性色彩****會讓底層和光線影響最終效果。

X. NON-TRANSPARENT

76. ****non-transparent = not open/clear — 不透明的；缺乏透明度的****

Practice 1

> The selection process was criticised as ****non-transparent****.

遴選程序被批評為****缺乏透明度****。

Practice 2

> Non-transparent pricing makes comparison difficult.

****不透明的定價方式****令比較變得困難。

In ordinary English, speakers often prefer:

> ****opaque****

> ****not transparent****

> ****lack transparency****

depending on context.

Y. OPAQUE AS THE IMPORTANT OPPOSITE

77. ****opaque = physically not transparent — 不透明的****

Practice 1

> Metal is generally ****opaque**** to visible light.

金屬對可見光通常是****不透明的****。

Practice 2

> The container is opaque.

這個容器是**不透明的**。

78. **opaque = difficult to understand — 晦澀難懂的**

Practice 1

> The instructions are unnecessarily **opaque**.

指示不必要地**晦澀難懂**。

Practice 2

> The explanation remained opaque to most readers.

大部分讀者仍覺得這個解釋**難以理解**。

79. **opaque process/system — 不透明的制度 / 程序**

Practice 1

> Employees were frustrated by the **opaque promotion process**.

員工對**缺乏透明度的晉升程序**感到沮喪。

Practice 2

> An opaque system makes accountability difficult.

不透明的制度令問責變得困難。

Important distinction 37: **transparent vs opaque metaphor**

The physical metaphor extends neatly:

transparent:

> you can see through it.

Figuratively:

> you can see how it works.

opaque:

> you cannot see through it.

Figuratively:

> you cannot understand how decisions were reached.

Important distinction 38: **transparency does not mean “everything must be public”**

In organisational English, **transparent** usually means:

relevant information is sufficiently clear to the people who legitimately need it.

It does not logically require:

- * publishing confidential personal data,
- * exposing private conversations,
- * revealing protected information.

So:

> transparency ≠ absence of all confidentiality.

Important distinction 39: **transparent does not automatically mean fair**

Example:

> “Employees who arrive after 9:01 lose the entire day's pay.”

Suppose that rule is clearly published.

Then it may be:

> **transparent**

because everyone knows the rule.

That does not tell us whether it is:

> **fair**.

Different concepts.

Important distinction 40: **transparent does not automatically mean accurate**

A company may openly publish incorrect information.

That would be:

> disclosed openly,

but:

> inaccurate.

So good reporting ideally needs:

transparent + accurate + complete enough for purpose.

Important distinction 41: **transparent does not mean simple**

A complex financial model can be transparent if:

- * assumptions are stated,
- * data sources are visible,
- * calculations can be traced.

Complexity and transparency can coexist.

Important distinction 42: **transparent does not mean informal**

A process may be:

> highly formal **and** highly transparent.

Transparency concerns visibility and openness, not level of formality.

Important distinction 43: **transparent in your passage**

The full sentence is:

> Group work is most effective when contribution is **transparent**, communication is disciplined and leadership is strong enough to unite different personalities around a common purpose.

The writer has already established earlier that:

> contribution should become **visible** rather than assumed.

Therefore **transparent** here contains several connected ideas:

1. **visibility**

people can see who contributed.

2. **traceability**

work can be linked to particular members.

3. **clarity**

roles and outputs are not vague.

4. **openness**

contribution is not hidden.

5. **accountability support**

because contributions are visible, responsibility and credit can be assigned more accurately.

So the strongest Chinese rendering is not simply:

> **透明的**

by itself.

For learners, a fuller gloss is:

清楚可見、公開透明、可以核實的

Family-extension note

The **transparent** family has several major modern branches:

1. **literal visibility**

- * transparent glass
- * transparent plastic

2. **degrees of physical transparency**

- * fully transparent
- * semi-transparent
- * opaque

3. **optics/science**

- * optically transparent
- * transparent to infrared

4. **digital graphics**

- * transparent background
- * transparency level

5. **organisational openness**

- * transparent process
- * transparent system

6. **decision-making**

- * transparent criteria
- * transparent rules

7. **communication**

- * be transparent about X
- * transparent communication

8. **business reporting**

- * financial transparency
- * transparent reporting

9. **pricing/pay**

- * transparent pricing
- * pay transparency

10. **workplace accountability**

- * transparent contribution
- * transparent responsibilities

11. **easy to understand**

- * transparent explanation
- * transparent prose

12. **obvious/easy to see through**

- * transparent excuse
- * transparent attempt
- * transparent lie

13. **adverb**

- * act transparently
- * transparently false

14. **computing invisibility**

- * transparent to the user

15. **distributed systems**

- * network transparency
- * location transparency

16. **programming**

- * referential transparency

17. **networking/security**

- * transparent proxy
- * transparent encryption

18. **data/model systems**

- * data transparency
- * model transparency

19. **photography**

* a transparency

20. **opposite family**

* opaque

* opacity

* non-transparent

For your passage, the exact branch is:

transparent = clearly visible and open to verification, so that each person's actual contribution can be identified rather than merely assumed

Master comparison

Form / expression	Traditional Chinese	Core idea	
-----	-----	-----	
transparent (literal)	透明的	see-through	
transparent glass	透明玻璃	material	
transparent plastic	透明塑膠	material	
transparent material	透明材料	material	
fully transparent	完全透明	degree	
semi-transparent	半透明	partial transparency	
transparency (physical)	透明度	optical property	
optical transparency	光學透明度	optics	
transparent to light	可讓光穿過	wave transmission	
transparent to infrared	可讓紅外線穿過	physics	
transparent background	透明背景	graphics	
transparent PNG	透明背景 PNG	graphics	
transparent layer	透明圖層	graphics	
transparency level	透明度設定	graphics	
transparent (open)	公開透明的	openness	
transparent process	透明程序	organisation	
transparent procedure	公開透明程序	organisation	
transparent system	透明制度	organisation	
transparent decision-making	透明決策	decisions	
transparent criteria	透明準則	evaluation	
transparent rules	公開清楚規則	rules	
transparent communication	公開坦誠的溝通	communication	
be transparent with X	對 X 坦誠公開	openness	
be transparent about X	對 X 坦白公開	disclosure	

transparent reporting	透明匯報	reporting	
financial transparency	財務透明度	finance	
transparent accounting	透明會計處理	finance	
transparent pricing	透明定價	commerce	
price transparency	價格透明度	commerce	
fee transparency	收費透明度	commerce	
pay transparency	薪酬透明度	workplace	
transparent ownership	所有權透明	governance/business	
transparent workload	工作量清楚可見	workplace	
transparent contribution	貢獻清楚可見	passage sense	
transparency (openness)	透明度；公開性	openness	
greater transparency	更高透明度	degree	
full transparency	全面透明	openness	
lack of transparency	缺乏透明度	secrecy/unclearness	
improve transparency	提高透明度	improvement	
transparency and accountability	透明度與問責	organisational control	
radical transparency	高度 / 徹底透明	management	
transparent (understandable)	清晰易懂的	clarity	
transparent explanation	清晰易懂的解釋	clarity	
transparent language	清楚易明的語言	clarity	
transparent prose	清晰易讀的文筆	writing	
transparent (obvious)	顯而易見 / 容易看穿的	obvious motive	
transparent motive	一眼看穿的動機	motive	
transparent attempt	明顯的企圖	intention	
transparent lie	一眼看穿的謊言	deception	
transparent excuse	容易識破的藉口	deception	
transparently (openly)	公開透明地	manner	
transparently false	明顯錯誤的	obviousness	
transparent to the user	對使用者透明 / 無感	computing	
transparent operation	無感運作	computing	
network transparency	網絡透明性	distributed systems	
location transparency	位置透明性	distributed systems	
transparent proxy	透明代理	networking	
transparent encryption	透明加密	computing/security	
referential transparency	參照透明性	functional programming	
data transparency	數據透明度	data	
model transparency	模型透明度	computing/AI	
algorithmic transparency	演算法透明度	computing	
a transparency	透明正片 / 幻燈片	photography	
opaque	不透明的；晦澀的	opposite	
opacity	不透明度	opposite property	
non-transparent	不透明 / 缺乏透明度的	opposite	

For your original sentence

> Group work is most effective when contribution is **transparent**, communication is disciplined and leadership is strong enough to unite different personalities around a common purpose.

Here:

transparent contribution = 團隊內每個人的工作、投入和產出都有清晰紀錄，其他人可以看見並核實，而不是只假設某人有貢獻或讓真正做事的人被忽略

A natural Traditional Chinese rendering is:

> 當每名成員的貢獻都**清楚可見**、公開透明並可以核實，溝通有紀律，而且領導層能把不同性格的人團結在共同目標之下時，團隊合作才最有效。

The cleanest learner contrast is:

- > **visible** = 看得到
- > **clear** = 清楚
- > **explicit** = 明確寫明 / 說明
- > **traceable** = 可以追查來源
- > **measurable** = 可以量度
- > **transparent** = **相關資料、過程和責任都清楚可見，不被隱藏**
- > **accountable** = 要為行動和成果負責
- > **fair** = 公平合理

And the most important link to the earlier teamwork vocabulary is:

- > **contribution** = 實際投入了甚麼
- > **output** = 實際產出了甚麼
- > **credit** = 得到了多少認可
- > **accountability** = 誰要為結果負責
- > **transparency** = **大家能否清楚看到以上這些事情**

That is why **transparent** is especially precise in the conclusion: it is the condition that helps prevent contribution from becoming **“assumed”**, effort from becoming **“uneven”**, and credit from becoming disconnected from what people actually did.
