For strict counting, I would merge this with Meaning 3 because the core idea remains ****outside a limit****.

In some contexts, ****beyond**** can mean ****other than**** or ****in addition to****.

This develops from the idea of moving outside a boundary, but learner-wise it is useful to show explicitly.

Useful expression: **beyond repair** — 無法修復

This has a nice connection to your bicycle passage.

Practice 21

「幸好那輛單車還**不是無法修理**。」

Important distinction: **beyond** vs **outside**

outside

usually refers to physical location or exclusion from a group/range.

****beyond****

often adds the idea of going ****farther than a boundary or limit****.

> outside the city

= 在城市外面

> beyond the city

= 越過城市、更遠的地方

In abstract uses, ****beyond**** is much more natural:

> beyond my control

not normally:

> outside my control

though the latter can exist in some contexts.

Important distinction: ****beyond vs over****

****over****

can mean more than a number or amount.

****beyond****

usually emphasizes passing a limit, scope, point, or capacity.

> over 100 people

= 超過一百人

> beyond expectations

= 超出預期

They are not generally interchangeable.

Important distinction: **beyond vs further than**

For physical distance:

> beyond the bridge

≈

> further than the bridge

But **beyond** works much more naturally for abstract limits:

> beyond repair

> beyond belief

> beyond control

So **beyond** has a stronger metaphorical range.

Important distinction: **beyond vs besides**

besides

means in addition to / apart from.

beyond

can sometimes mean something similar, but usually with the sense of “outside the scope of.”

> “Beyond work, he has few interests.”

= 除了工作之外，他興趣不多。

> “Besides work, he enjoys hiking.”

= 除工作以外，他也喜歡行山。

Besides is usually the more neutral additive word.

Family-extension note

****Beyond**** has a very small morphological family. It does not productively form common modern inflections or derivations.

The learning value comes mainly from its semantic range and fixed constructions:

- * beyond the river
- * beyond midnight
- * beyond control
- * beyond repair
- * beyond doubt
- * beyond recognition
- * go beyond
- * the beyond

The Golden Manual says that where the morphological family is genuinely small, we should say so rather than invent unnecessary relatives, while still covering useful constructions and figurative senses.

Master comparison

Form / sense	MCQ-ready Traditional Chinese meaning
-----	-----
beyond — physical place	在某個地點、界線或範圍更遠的一邊；在.....之外
beyond — time	超過或晚於某個時間點
beyond — limit/scope	超出某個能力、程度、控制、範圍或界線
beyond — apart from	除了某件事之外；在某事以外
the beyond	死後世界、彼岸或普通人類經驗之外的未知領域；較文學

For your original sentence

> “What he taught me is important because it goes far ****beyond**** repairing a bicycle.”

The exact meaning is:

****beyond = 不只限於某件事情，而是超出它本身的範圍或意義****

So:

> ****goes far beyond repairing a bicycle****

= ****意義遠遠不只是在修單車 / 遠遠超越修理單車本身****

The lesson begins with bicycle repair, but applies to:

> patience, pressure, mistakes, decision-making, and life.

For your database, I would count **4** genuinely useful core meanings for **beyond**:

1. **farther than a physical place or boundary**
2. **later than a time point**
3. **outside / greater than a limit, scope, ability, or degree**
4. **apart from / in addition to something**

I would keep **go beyond, beyond repair, beyond doubt, beyond recognition** under #3 as important constructions, and keep **the beyond** as a lower-priority literary extension rather than inflate the main count.
