Important distinction: **roof vs rooftop**

roof

= the structure covering a building.

rooftop

= the upper surface/top area of that roof, especially when used as a place.

> “The roof needs repair.”

= 屋頂需要維修。

> “They grow vegetables on the rooftop.”

= 他們在天台 / 屋頂上種菜。

This is the key contrast for your passage.

Important distinction: **roof vs ceiling**

A classic learner trap.

roof

= outside/top covering of the building.

ceiling

= inside upper surface of a room.

> rain damages the roof

> a lamp hangs from the ceiling

So:

> roof = 屋頂

> ceiling = 天花板

Important distinction: **roof vs terrace**

roof

= building covering structure.

terrace

= flat outdoor area designed for people to sit/walk/use.

A **roof terrace** is a terrace built on the roof.

Not every roof is a terrace.

Important distinction: **roof** vs **shelter**

roof

literal structural top covering.

shelter

anything/place providing protection.

> roof over your head

figuratively implies:

> shelter / home

But **roof** and **shelter** are not general synonyms.

Important distinction: **roof** vs **top**

top

very broad:
highest part of anything.

roof

specifically:
covering/top structure of a building, vehicle, cave, mouth, etc.

> top of the box

> not normally:

> *roof of the box*

Important distinction: **rooftop** vs **roof garden**

rooftop

= location.

roof garden

= purpose/design.

> “The plants are on the rooftop.”

simply tells us where.

> “She has a roof garden.”

means the roof has been deliberately developed as a garden.

Important distinction: **hit the roof vs through the roof**

hit the roof

= become extremely angry.

through the roof

= rise/be extremely high.

> “Dad hit the roof.”

= 爸爸大發雷霆。

> “Prices went through the roof.”

= 價格暴升。

Excellent MCQ contrast.

Important distinction: **through the roof vs sky-high**

Both can mean extremely high.

through the roof

informal and dynamic:

often emphasizes a sharp increase.

sky-high

describes an already extremely high level.

> prices went through the roof

> = 價格暴升

> sky-high prices

> = 高得驚人的價格

Important distinction: **under one roof vs live together**

live together

= share a home.

under one roof

can mean:

* live in the same building;

* operate in the same place.

So it has wider organizational use.

Family-extension sweep

After the full audit, the useful modern family includes:

* **roof — building covering** = 屋頂

* **rooftop** = 屋頂表面 / 天台

* **roof — cave/tunnel/vehicle** = 頂部 / 頂壁 / 車頂

* **roof of the mouth** = 上顎 / 口腔頂部

* **roof — verb** = 給.....蓋屋頂

* **roofed** = 有屋頂 / 有遮蓋

* **roofing** = 屋頂材料 / 屋頂工程

* **roofer** = 屋頂工 / 維修工

* **roof garden / rooftop garden** = 屋頂 / 天台花園

* **roof terrace** = 屋頂露台

* **under one roof** = 在同一屋簷下 / 同一地點

* **roof over one's head** = 基本住處

* **hit the roof** = 大發雷霆

* **through the roof** = 急升 / 高得驚人
 * **raise the roof** = 歡呼震天 / 大聲喧鬧
 * **roofline** = 屋頂輪廓線

This is close to the useful modern ceiling without forcing rare construction jargon.
