FY. PASSAGE RECAP

“Learning is not just about **storing information**; it is about explaining, listening, negotiating and responding under pressure.”

Here:

storing information

= keeping information in memory so that it remains available later

Best Traditional Chinese:

- 儲存資訊
- 記住資訊
- contextually: 把資訊記在腦中

Natural contextual translation:

學習不只是把資訊記在腦中；它還包括解釋、聆聽、協商，以及在壓力下作出回應。

Passage MCQ-ready meaning

store

= to keep information, material, energy, or another resource so that it remains available for future use

儲存；保存；存放

In the passage specifically:

store information

→ 把資訊保存在記憶中

The biggest learner splits are:

store food

→ 儲存／保存食物

store energy

→ 儲存能量

store data

→ 儲存資料

but as a noun:

a grocery store

→ 雜貨店／食品店

and another noun sense:

a store of knowledge

→ 知識儲備

while plural:

emergency stores

→ 緊急補給品

Important expressions include:

store up food

→ 儲備食物

store up trouble

→ 為日後埋下麻煩

what the future has in store

→ 未來會發生甚麼

set great store by something

→ 非常重視某事

And one particularly important learner distinction is:

storage

→ 儲存／儲存空間

versus:

store

→ can be 儲存, 商店, or 儲備, depending on grammar.

The unifying semantic idea is:

STORE = keep something available for later.

That “something” may be:

- a physical object,
- food,
- supplies,
- energy,
- information,
- computer data,
- memories,
- knowledge,
- or figuratively even future trouble.

The passage deliberately presents learning as more than this storage model: **simply retaining information is not enough; students must also be able to use, explain, negotiate, and respond with that knowledge.**
