

TISSUE

1. Passage anchor

> “Before I could move, a young man crouched beside her, spoke gently, and **handed her a tissue**.”

Passage meaning

****tissue**** = a small, soft piece of disposable paper used especially for wiping the nose, eyes, or face

****紙巾 ; 面紙****

Here, Kelvin gives the crying girl a tissue so she can wipe her tears.

Practice

1. She took a ****tissue**** and wiped her eyes.
她拿了一張****紙巾****擦眼睛。
2. Do you have a ****tissue****? My nose is running.
你有****紙巾****嗎？我在流鼻水。

Core meanings of TISSUE

2. tissue — disposable soft paper

= small piece or sheet of soft paper used for wiping the nose, face, eyes, etc.

****紙巾 ; 面紙****

Examples

1. He pulled a ****tissue**** from the box.
他從盒裡抽出一張****紙巾****。
2. She dabbed her tears with a ****tissue****.
她用****紙巾****輕輕擦去眼淚。

This is the exact passage sense.

3. facial tissue

= soft disposable paper made especially for wiping the face or nose

****面紙；紙巾****

Examples

1. There is a box of ****facial tissues**** on the desk.

桌上有一盒****面紙****。

2. Soft ****facial tissues**** are useful when you have a cold.

感冒時，柔軟的****面紙****很實用。

In everyday English, people usually just say ****tissue****.

Tissue paper

4. tissue paper

= very thin, light paper used for wrapping, decoration, crafts, packing, etc.

****薄紙；棉紙；包裝薄紙****

Examples

1. The gift was wrapped in colored ****tissue paper****.

禮物用彩色****薄紙****包著。

2. She placed ****tissue paper**** inside the box.

她在盒子裡放了****包裝薄紙****。

Important distinction:

****a tissue****

→ 擦鼻 / 擦眼的紙巾

****tissue paper****

→ 包裝、裝飾等使用的薄紙

They overlap materially but are not interchangeable in every context.

Bathroom / toilet tissue

5. toilet tissue

= soft paper used after using the toilet; toilet paper

****衛生紙；廁紙****

Examples

1. We need another roll of ****toilet tissue****.

我們需要另一卷****廁紙****。

2. The restroom ran out of ****toilet tissue****.

洗手間的****衛生紙****用完了。

****Toilet paper**** is generally the more common everyday term.

Biology / anatomy

6. tissue — group of similar cells in the body

= collection of similar cells that work together to perform a particular function

****組織****

Examples

1. Muscle ****tissue**** helps the body move.

肌肉****組織****幫助身體活動。

2. The sample contained healthy ****tissue****.

樣本中含有健康的****組織****。

This is the major scientific/medical sense.

7. body tissue

= cellular material forming parts of a human or animal body

****身體組織****

Examples

1. The injury damaged surrounding ****tissue****.

受傷令周圍的****組織****受損。

2. Healthy ****body tissue**** can repair itself to some extent.

健康的****身體組織****在一定程度上可以自行修復。

Plant tissue

8. tissue — plant cells with a common function

= group of plant cells organized to perform a particular function

****植物組織****

Examples

1. Water moves through specialized plant ****tissue****.

水分會通過特殊的植物****組織****運輸。

2. The microscope revealed damaged leaf ****tissue****.

顯微鏡顯示葉片****組織****受損。

The biological concept is the same as animal tissue.

Common medical compounds

9. soft tissue

= body tissue other than bone or certain hard structures, especially muscle, fat, tendons, etc.

****軟組織****

Examples

1. The fall caused a ****soft-tissue injury****.

跌倒造成了****軟組織受傷****。

2. The scan showed damage to the ****soft tissue****.

掃描顯示****軟組織****受損。

10. connective tissue

= tissue that supports, binds, or connects other tissues and structures

****結締組織****

Examples

1. Tendons contain strong **connective tissue**.

肌腱含有強韌的**結締組織**。

2. The condition affects **connective tissue**.

這種情況會影響**結締組織**。

11. muscle tissue

= tissue made of muscle cells capable of contraction

肌肉組織

Examples

1. Exercise can strengthen **muscle tissue**.

運動可以強化**肌肉組織**。

2. The injury affected nearby **muscle tissue**.

傷勢影響了附近的**肌肉組織**。

12. nerve tissue / nervous tissue

= tissue forming nerves and much of the nervous system

神經組織

Examples

1. **Nervous tissue** carries electrical signals.

神經組織負責傳遞電訊號。

2. The researchers examined the **nerve tissue**.

研究人員檢查了**神經組織**。

13. scar tissue

= fibrous tissue formed during healing after injury

疤痕組織；**癍痕組織**

Examples

1. **Scar tissue** formed around the injury.

傷處周圍形成了**疤痕組織**。

2. Surgery may leave some **scar tissue**.

手術可能會留下部分**疤痕組織**。

14. fatty tissue

= tissue containing fat cells

脂肪組織

Examples

1. The body stores energy in **fatty tissue**.

身體會在**脂肪組織**中儲存能量。

2. The scan showed a layer of **fatty tissue**.

掃描顯示有一層**脂肪組織**。

Tissue sample / biopsy

15. tissue sample

= small amount of biological tissue removed for examination or testing

組織樣本

Examples

1. Doctors took a **tissue sample** for testing.

醫生取了一份**組織樣本**作檢驗。

2. The **tissue sample** was sent to the laboratory.

組織樣本被送往實驗室。

16. tissue culture

= growth of cells or tissues in controlled laboratory conditions

組織培養

Examples

1. The researchers used **tissue culture** techniques.

研究人員使用**組織培養**技術。

2. The cells were grown through **tissue culture**.

這些細胞透過**組織培養**方式生長。

Established scientific compound.

Formal figurative sense

17. a tissue of lies

Formal/literary:

= a collection or connected series of lies

一連串謊言；滿篇謊話

Examples

1. He dismissed the story as **a tissue of lies**.

他斥責那個說法只是**一連串謊言**。

2. The account turned out to be **a tissue of lies**.

那番說辭最後證實是**滿篇謊話**。

This comes from an older sense of **tissue** as something woven or interconnected.

It is established, but much lower-frequency than the paper and biological senses.

Historical / textile connection

18. tissue — very fine woven fabric

Historical/literary:

= very fine, delicate woven cloth

薄而精細的織物

This older textile sense helps explain the semantic development of:

* biological **tissue**

* **a tissue of lies**

* **tissue paper**

It is not a high-priority modern everyday sense and normally does not need separate MCQ testing unless the text itself uses it.

Countability

19. tissue — paper sense

Usually **countable** when referring to individual facial tissues:

> a tissue

> 一張紙巾

> three tissues

> 三張紙巾

Example

1. Could you pass me **a tissue**?

可以遞給我**一張紙巾**嗎？

20. tissue — biological sense

Often **uncountable** when referring to body material generally:

> healthy tissue

> 健康組織

> damaged tissue

> 受損組織

Not normally:

>  a tissue

when you mean biological tissue generally.

But it may be plural when referring to **different kinds of tissue**:

> muscles and other tissues

> 肌肉及其他組織

This countability contrast is highly useful for learners.

Key contrasts

21. tissue vs napkin

****tissue****

= soft disposable paper mainly for the nose, face, eyes, etc.

****面紙 ; 紙巾****

****napkin****

= paper or cloth used during meals for wiping hands and mouth

****餐巾 ; 餐巾紙****

Compare:

> wipe your nose with a tissue

> 用紙巾擤 / 擦鼻子

> wipe your mouth with a napkin

> 用餐巾擦嘴

22. tissue vs paper towel

****tissue****

= thin, soft paper for the face/nose

****面紙****

****paper towel****

= thicker, more absorbent paper used for wiping hands, surfaces, spills, etc.

****廚房紙巾 ; 抹手紙****

23. tissue vs toilet paper

****tissue****

= normally facial tissue unless context says otherwise

****面紙****

****toilet paper****

= paper used in the bathroom

****廁紙；衛生紙****

****Toilet tissue**** exists, but is more formal/product-label language.

24. tissue vs material

****material****

= broad substance from which something is made

****材料；物料****

****tissue****

= either:

* soft thin paper, or

* biological cellular material

So:

> packaging material

> 包裝材料

but:

> muscle tissue

> 肌肉組織

25. tissue vs organ

****tissue****

= group of similar cells carrying out a function

****組織****

****organ****

= body structure made of several types of tissue working together

****器官****

For example:

> muscle tissue

> 肌肉組織

> heart
> 心臟，一個器官

26. tissue vs cell

****cell****
= basic individual biological unit
****細胞****

****tissue****
= organized group of cells
****組織****

Basic hierarchy:

> cells → tissues → organs
> 細胞 → 組織 → 器官

Meaning map

The modern family has two dominant branches:

A. Thin paper

****tissue****
→ ****紙巾****

From this:

> facial tissue
> → 面紙

> tissue paper
> → 包裝 / 裝飾薄紙

> toilet tissue
> → 廁紙

B. Biological material

****tissue****

→ ****組織****

From this:

> soft tissue

> → 軟組織

> muscle tissue

> → 肌肉組織

> scar tissue

> → 疤痕組織

> tissue sample

> → 組織樣本

> tissue culture

> → 組織培養

There is also a smaller figurative branch:

> ****a tissue of lies****

> → ****一連串互相交織的謊言****

So ****tissue**** is a good case where two extremely common modern senses—****紙巾**** and ****生物組織****—must be distinguished immediately from context.

MCQ-ready master list

Form / sense	MCQ-ready Traditional Chinese meaning
-----	-----
tissue — facial paper	用來擦鼻、眼睛、臉等的柔軟即棄紙巾 / 面紙
facial tissue	專供擦臉、鼻子等使用的柔軟面紙
tissue paper	用於包裝、裝飾、手工藝等的極薄紙張
toilet tissue	用於如廁後清潔的衛生紙 / 廁紙
tissue — biology	由相似細胞組成並共同執行某種功能的組織
body tissue	構成人體 / 動物身體的生物組織
plant tissue	由植物細胞組成並執行共同功能的植物組織
soft tissue	骨等硬組織以外的肌肉、脂肪、肌腱等軟組織
connective tissue	支撐、連接其他組織或結構的結締組織

muscle tissue	由肌肉細胞構成的肌肉組織	
nerve/nervous tissue	負責傳遞神經訊號的神經組織	
scar tissue	傷口癒合後形成的疤痕 / 癍痕組織	
fatty tissue	主要由脂肪細胞構成的脂肪組織	
tissue sample	從身體取出作檢驗的組織樣本	
tissue culture	在實驗室控制環境中培養細胞 / 組織的組織培養	
a tissue of lies	正式 / 文學：一連串互相交織的謊言	

Passage recap

> “Before I could move, a young man crouched beside her, spoke gently, and **handed her a tissue**.”

Here:

tissue = **a small piece of soft disposable paper used for wiping the face, eyes, or nose**

Best Traditional Chinese:

* **紙巾**

* **面紙**

Natural contextual translation:

**我還沒來得及上前，一名年輕男子已蹲在她身旁，溫柔地跟她說話，並遞給她一張紙巾。 **

Passage MCQ-ready meaning

tissue

= **a soft disposable piece of paper used for wiping the nose, eyes, or face**

紙巾；面紙

The most important learner contrast is immediate:

> **hand someone a tissue**

> → 遞給某人一張**紙巾**

but:

> **damaged tissue**

> → 受損的**身體組織**

and:

> ****tissue paper****

> → ****包裝 / 裝飾薄紙****

A useful grammar clue is also:

> ****a tissue / two tissues****

> → 紙巾，通常可數

while:

> ****healthy tissue / damaged tissue****

> → 生物組織，通常作不可數物質名詞

So the passage uses the everyday ****facial-paper**** sense, specifically because the little girl is crying and Kelvin gives her something to wipe her tears with.
